Plunkett's Automobile  
Industry Almanac 2008  
Trucks at Work  
XaaS: Everything-as-a-  
Service: The Lean and  
Agile Approach to  
Business Growth takes  
the reader into the bold

new world of pay-per-use  
for a product or service.  
From the perspective of  
the customer, the  
servitization model yields  
multiple benefits: the  
consumer can try out the  
product/service at a  
relatively low cost, the  
risk is mitigated, capital  
expenses can be  
converted into operating  
expenses, it is not needed

to forecast how often the  
product/service is used,  
and only parts of the  
product/service needed  
can be used. Similarly, a  
provider can benefit by  
having a larger market  
coverage, steadier stream  
of revenues, upgrades as  
and when needed, sharing  
of fixed assets across  
consumers, practicing of  
value-based pricing, and

unbundling or bundling utility for consumers using appropriate pricing techniques. However, this 'nanoization' of products/services is tricky, and has to be designed carefully. This book provides a set of recipes to providers to adopt the XaaS model by changing the provider's mindset: dividing the product/service forces the provider to take a value-driven approach to his product/service, and consequently, eliminate all non-value added activities. The

requirements of the XaaS model serve both as an objective to the innovation and internal processes of the provider, and as guide to understanding the customer's needs. The book also covers data acquisition, data analysis and synthesis, and data application needs of the XaaS model, with simple examples and case studies from the business world of firms that achieve these objectives successfully.

Franklin, Jack, Marla,

Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasts, creepies, and ghoulies. It

all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

Professional Truckers Guide: To Certified Truck Dealerships for Parts and Service Cengage Learning  
 Volvo revolutionised heavy truck design in 1964 with the introduction of the L4951 Titan TIPTOP. The new model brought the principle of the tilting cab to Europe and provided the foundations for the F88 of the following year. Safe, comfortable, powerful and reliable: the F88 was everything that the competition was not.

'Driver appeal' as a concept was born. Furthermore, it arrived exactly when the rapidly expanding international haulage scene needed it most. The result: Volvo could not fail to make an impact. The F89, with more power, followed in 1970 and the UK only F88 290 was introduced in 1975. Over a twelve-year production life, Volvo built over 60,000 examples of the F88 and F89. This second edition of Patrick Dyer's book includes virtually all the photographs that were in

the original publication and also contains 50 additional shots, many from the Volvo company archive. This has enabled Patrick to give greater coverage to the G88 and G89 models which were infrequent visitors to the UK. Patrick has also heavily revised and developed his text. The format of the book is larger than before, in keeping with his books on Scania, DAF and the Ford Transcontinental.

The book outlines and develops an integrated and pragmatic socio-economic approach towards undertaking effective MNC strategy in emerging country markets. This, labelled the 'institutional network approach' (INA), applies a new strategic perspective to international business operations and emphasises the continuous interplay between institutions and networks in designing and executing global strategies. The INA integrates the shareholder

and stakeholder viewpoint into a comparative holistic perspective of international business strategy based on a broader societal approach.

Berggren evaluates in detail the reorganization of work within the Swedish auto industry from 1970 to 1990. In his introduction to the new edition, he explores the significance of Volvo's decision to close its two most innovative plants.
