"This book presents a great deal of new material. It also presents new interpretations of materials discussed earlier and elsewhere. As the editors point out in the introduction, discussion of opera has only in recent years taken on an analytical dimension. The scholars represented in this volume are among those at the forefront of the new critical and analytical movement. What they write is perhaps at times controversial, but it is always important."--William C. Holmes, University of California, Irvine  
 "The editors' introduction to this collection. . . speaks eloquently for a richer and more varied approach to the analysis of opera. . . . The contributors are among the most accomplished scholars in nineteenth-century music studies. . . . More impressive is the depth and range of scholarship and analysis displayed. . . to the

end of changing the historical and analytical stance toward the operas of Verdi and Wagner, by eschewing the partisan quarrels of the past and by the application of similar rigorous standards to each composer's music. . . . This volume will have a wide influence upon scholarly and analytical approaches to the music of Verdi and Wagner."--Richard Swift, University of California, Davis

"Emanuele Taglietti was one of the most talented cover artists working in Italian comics in the 1970s and '80s. His unrestrained and salacious work overflows with sex and horror and is populated with an extraordinary host of characters -- from female musketeers and voluptuous vampiresses to vengeful monsters and raunchy fairies. Emanuele created more than 500 covers for comics such as Sor la Vampira, Sukia, Mafia, and Playcolt, and this book showcases the best of them in all their lurid glory"--Inside cover.

The Atlas of Italian Amphibians and Reptiles presents the distribution, ecology and conservation status of the 37 species of amphibians and the 50 species of reptiles found in Italy. A 10x10 km UTM grid map is supplied for each species, on the basis of more than 70.000 records contributed by 900 collaborators during the Societas Herpetologica Italica survey project, started in 1994. Entries, illustrated with photos, are subdivided into the following headings: taxonomy, general distribution, comments on the distribution map, habitat, altitudinal distribution, annual activity cycle, reproduction and status of the Italian populations. General sections on biogeography, history of herpetology in Italy, paleoherpetology and herpetological fauna of the small Italian islands are also included. Italian and English text.

### A Memoir of Auschwitz Springer Nature

"He is our Dante . . . writing a modern masterpiece about his journey into Hell . . . [that is] unique in the literature of the Holocaust." --USA Today  
 A Penguin Classic  
 Primo Levi was one of the most astonishing voices to emerge from the twentieth century: a man who survived one of the ugliest times in history, yet who was able to describe his own Auschwitz experience with an unaffected tenderness. Levi was a master storyteller but he did not write fairytales. These stories are an elegy to the human

figures who stood out against the tragic background of Auschwitz, "the ones in whom I had recognized the will and capacity to react, and hence a rudiment of virtue." Each centers on an individual who--whether it be through a juggling trick, a slice of apple or a letter--discovers one of the "bizarre, marginal moments of reprieve." For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,800 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Technological pedagogical content knowledge (TPCK) reflects a new direction in understanding the complex interactions among content, pedagogy, learners and technology that can result in successful integration of multiple technologies in teaching and learning. The purpose of this edited volume is to introduce TPCK as a conceptual framework for grounding research in the area of teachers' cognitive understanding of the interactions of technology with content, pedagogy and learner conceptions. Accordingly, the contributions will constitute systematic research efforts that use TPCK to develop lines of educational technology research exemplifying current theoretical conceptions of TPCK and methodological and pedagogical approaches of how to develop and assess TPCK.

Dante on View opens an important new dimension in Dante studies: for the first time a collection of essays analyses the presence of the Italian Medieval poet Dante Alighieri in the visual and performing arts from the Middle Ages to the present day. The essays in this volume explore the image of Dante emerging in medieval illuminated manuscripts and later ideological and nostalgic uses of the poet. The volume also demonstrates the rich diversity of projects inspired by the Commedia both as an overall polysemic structure and as a repository of scenes, which generate a repertoire for painters, actors and film-makers. In its original multimodality, Dante's Commedia stimulates the performance of readers and artists working in different media from manuscript to stage, from ballet to hyperinstruments, from film to television. Through such a variety of media, the reception of Dante in the visual and performing arts enriches our understanding of the poet

and of the arts represented at key moments of formal and structural change in the European cultural world.

In 1935, as the artists and animators at the Disney Studio toiled on the animated feature film *Snow White and the Seven Dwarfs*, Walt and Roy Disney traveled with their wives to New York and boarded the luxury liner *Normandie* to begin their "grand tour" of Europe. With the full cooperation of Walt's late daughter Diane Disney Miller, Didier Ghez spent years researching this seminal but little-known event that became so vital to the continued growth of the Disney company right through the creation of Disneyland two decades later. His book, *Disney's Grand Tour*, is the culmination of that research. In addition to the many "small and delightful surprises" that noted animation historian (and author of *The Animated Man: A Life of Walt Disney*) Michael Barrier mentions in his preface to the book, *Disney's Grand Tour* features over 200 notes for those inclined to dig deeper into the story. It also contains a list of the hundreds of books that Walt personally selected in Europe for transfer back to the Disney Studio library. These books inspired Disney artists and animators for decades. So pack your bags. The *Normandie* whistle blows. Embark with Walt Disney and join him on a grand tour of Europe!

Featuring a wide range of exercises, examples, and images, this textbook provides a practical way of analyzing the discourses of the global media industries. Building on a comprehensive introduction to the history and theory of global media communication, specific case studies of lifestyle and entertainment media are explored with examples from films, global women's magazines, Vietnamese news reporting and computer war games. Finally, this book investigates how global media communication is produced, looking at the formats, languages and images used in creating media materials, both globally and in localized forms. At a time when the media is becoming increasingly global, often with the same films, news and television programmes shown all over the world; *Global Media Discourse* provides an accessible, lively introduction into how globalization is changing the language and communicative practices of the media. Integrating a range of approaches, including political economy, discourse analysis and ethnography, this book will be of particular interest to students of media and communication studies, applied linguistics, and (critical) discourse analysis.

Between the 1960s and the early '80s Italy went crazy for the 'fumetti sexy', a genre of comics with a unique brand of twisted humour, violence, and up-front sensuality. Wilder and weirder than you can imagine, they were some of the most outrageous and shocking comics ever produced. One of the most accomplished and prolific fumetti cover artists was Alessandro Biffignandi, whose artworks featured horror, fantasy and sci-fi elements. This book collects some of the sexiest and most provocative examples of his work, which is highly coveted by collectors today.

1775—The conflict between the British Empire and the American colonies erupts in all-out war. Rebels and loyalists to the British Crown compete for an alliance with the Six Nations of the Iroquois, the most powerful Indian confederation, boasting a constitution hundreds of years old. In the Mohawk River Valley, Native Americans and colonists have co-existed for generations. But as the thunder of war approaches and the United States struggles violently into existence, old bonds are broken, friends

and families are split by betrayal, and this mixed community is riven by hatred and resentment. To save his threatened world, the Mohawk war chief Joseph Brant sets off in a restless journey that will take him from New York to the salons of Georgian London at the heart of the British Empire.

Exploring a topic of vital and ongoing importance, *Traditional Forest Knowledge* examines the history, current status and trends in the development and application of traditional forest knowledge by local and indigenous communities worldwide. It considers the interplay between traditional beliefs and practices and formal forest science and interrogates the often uneasy relationship between these different knowledge systems. The contents also highlight efforts to conserve and promote traditional forest management practices that balance the environmental, economic and social objectives of forest management. It places these efforts in the context of recent trends towards the devolution of forest management authority in many parts of the world. The book includes regional chapters covering North America, South America, Africa, Europe, Asia and the Australia-Pacific region. As well as relating the general factors mentioned above to these specific areas, these chapters cover issues of special regional significance, such as the importance of traditional

knowledge and practices for food security, economic development and cultural identity. Other chapters examine topics ranging from key policy issues to the significant programs of regional and international organisations, and from research ethics and best practices for scientific study of traditional knowledge to the adaptation of traditional forest knowledge to climate change and globalisation.

This is the first volume to focus on the role of media in processes of linguistic change, one of the most contested issues in contemporary sociolinguistics. Its 17 chapters and five section commentaries present cutting-edge research from variationist and interactional sociolinguistics, media linguistics, language ideology research, and minority language studies. The volume advances our understanding of linguistic change in a mediatized world in three ways. First, it introduces the notions of sociolinguistic change and mediatization to create a broader theoretical framing than the one offered by 'the media' and 'language change'. Second, it takes the discussion beyond the notions of 'influence' and 'effect' and the binary distinction of 'media' vs. 'community language'. Third, it examines the relation of sociolinguistic change and mediatization and from five complementary viewpoints: media influence on linguistic structure; media engagement in interaction; change in mass and new media language; language-ideological change; and the role of media for minority languages. Bringing these strands of sociolinguistic scholarship together, this volume examines their shared references and common lines of thinking.

Attempts to define what comics are and explain how they work have not always been successful because they are premised upon the idea that comic strips, comic books and graphic novels are inherently and almost exclusively visual. This book challenges that premise, and asserts that comics is not just a visual medium. The book outlines the multisensory aspects of comics: the visual, audible, tactile, olfactory and gustatory elements of the medium. It rejects a synaesthetic approach (by which all the senses are engaged through visual stimuli) and instead argues for a truly multisensory model by which the direct stimulation of the reader's physical senses can be understood. A wide range of examples demonstrates how multisensory communication systems work in both commercial and more experimental contexts. The book concludes with a case study that looks at the works of Alan Moore and indicates areas of interest that multisensory analysis can draw out, but which are overlooked by more conventional approaches.

'Over a hundred years ago, the German poet Heine warned the French not to underestimate the power of ideas: philosophical concepts nurtured in the stillness of a professor's study could destroy a civilisation' - Isaiah Berlin, *Two Concepts of Liberty*, 1958. The nineteen essays collected here show Isaiah Berlin at his most lucid: these short, introductory pieces provide the perfect starting point for the reader new to his work. Their linking theme is the crucial social and political role of ideas, and of their progenitors. The subjects vary widely - from philosophy to education, from Russia to Israel, from Marxism to romanticism - and the appositeness of Heine's warning is exemplified on a broad front. The contents include Berlin's last essay - a retrospective autobiographical survey and the classic statement of his Zionist views. As a whole the book exhibits the full range of his expertise, and demonstrates the enormously engaging individuality, as well as the power, of his own ideas.
