□ Why do some students achieve more than others? □ Do we have to wait until pupils are "ready"? □ Can children discover math for themselves? □ Does language interfere with the learning of math? This classic text, written from the viewpoint of the math teacher, provides answers to these and many more questions. Each chapter explores a particular issue that illustrates the interaction between theory and practice. New chapters have been included

on cognition, pattern, and ICT.

Beast Academy is the new elementary-school math curriculum from Art of Problem Solving. When complete, Beast Academy will provide a full, rigorous, and entertaining curriculum for aspiring math beasts in grades 2-5. The series consists of four two-book sets for each grade. The Guide book of each set presents the lessons and the Practice book provides exercises and problems to reinforce the lessons. Beast Academy 3D is the fourth set in the four-set series for Grade 3. Guide 3D delivers complete lessons to the students of Beast Academy in an engaging comic-book style. The companion book, Practice 3D (sold separately), provides over 400 problems ranging from introductory level exercises to very challenging puzzles and word problems, to reinforce the lessons in the Guide.

The textbook has four chapters. Each chapter covers a grammatical point/component/element. Chapter 1 is a review of the BE verb. The BE is special and has it's own rules (different from other verbs). Chapter 2 is the Present Progressive tense. This is the tense we use when we are talking about things happening now or near now. Chapter 3 is the Simple Present Tense. We use the Simple Present Tense to talk about facts, routines, and habitual activities. Chapter 4 is a comparison of chapter 3 and 4. Each chapter has the same "layout" (arrangement, presentation, design, organization). First there is a section to "activate", or prepare your mind for learning. It includes a discussion with your classmates. Next you read a story about some ESOL students whose lives may be similar to yours. Then we break verb learning into many smaller sections for ease of learning, such as; affirmativenegativeyes/no questionsinformation questions(other important things to know)
