This book discusses the use, economic importance and impact of Information and Communication Technologies (ICT) in public and private Sudanese universities. The author provides an in-depth analysis of the economic impact of ICT from the demand perspective as well as from the public-private perspective. This book also examines the status, pattern, structure, trend and determinants of the demand for ICT in public and private Sudanese

universities. It investigates the economic impacts of the uses of ICT, the potential opportunities and challenges that ICT is expected to create for public and private Sudanese universities, and explains the role of ICT in facilitating the production, creation and transfer of knowledge in Sudanese universities.

We are now entering the third decade of

the 21st Century, and, especially in the last years, the achievements made by scientists have been exceptional, leading to major advancements in the fast-growing field of Healthcare Profession Educations. Frontiers has organized a series of Research Topics to highlight the latest advancements in science in order to be at the forefront of science in different fields of research. This editorial initiative of particular relevance, led by Dr. Jacqueline Bloomfield and Lynn Monrouxe, Specialty Chief Editors of the Healthcare Professions Education section, is focused on new insights, novel developments, current challenges, latest discoveries, recent advances, and future perspectives in the field of Healthcare Professions Education.

*Wastes and Their Treatment* CRC Press  
In the first half of the twentieth century, a pioneering generation of young women exited their homes and entered public space, marking a new era for women's civic participation in northern Sudan. A provocative new public presence, women's civic engagement was at its core a bodily experience. Amid the socio-political upheavals of imperial rule, female

students, medical workers, and activists used a careful choreography of body movements and fashion to adapt to imperial mores, claim opportunities for political agency, and shape a new standard of modern, mobile womanhood. *Khartoum at Night* is the first English-language history of these women's lives, examining how their experiences of the British Empire from 1900–1956 were expressed on and through their bodies. Central to this story is the *tobe*: a popular, modest form of dress that wrapped around a woman's head and body. Marie Grace Brown shows how northern Sudanese women manipulated the tucks, folds, and social messages of the *tobe* to deftly negotiate the competing pulls of modernization and cultural authenticity that defined much of the imperial experience. Her analysis weaves together the threads of women's education and activism, medical midwifery, urban life, consumption, and new behaviors of dress and beauty to reconstruct the worlds of politics and pleasure in which early-twentieth-century Sudanese women lived. [World List of Universities / Liste Mondiale des Universités 1985–1986](#) Elsevier

*The Real Politics of the Horn of Africa* delves into the business of politics in the turbulent, war-torn countries of north-east Africa. It is a contemporary history of how politicians, generals and insurgents bargain over money and power, and use of war to achieve their goals. Drawing on a thirty-year career in Sudan, Ethiopia, Eritrea and Somalia, including experience as a participant in high-level peace talks, Alex de Waal provides a unique and compelling account of how these countries' leaders run their governments, conduct their business, fight their wars and, occasionally, make peace. De Waal shows how leaders operate on a business model, securing funds for their 'political budgets' which they use to rent the provisional allegiances of army officers, militia commanders, tribal chiefs and party officials at the going rate. This political marketplace is eroding the institutions of government and reversing statebuilding—and it is fuelled in large part by oil exports, aid funds and western military assistance for counter-terrorism and peacekeeping. *The Real Politics of the Horn of Africa* is a sharp and disturbing book with profound implications for

international relations, development and peacemaking in the Horn of Africa and beyond.

Hazardous waste is a particularly serious problem for many countries. This publication examines the elements of an effective management strategy for hazardous waste, outlining the contributions made by the United Nations Environmental Programme & other international Organizations. It provides a selection of the most important sources of information & expertise on wastes & their treatment.

**Gum Arabic** World Scientific

This is the first volume of the Biographical Dictionary of South Sudan, an ongoing research project begun in July 2001. As the subtitle of the book, the Notable Firsts, suggests, this volume is primarily concerned with historically significant South Sudanese personalities, deceased

and contemporary alike, and their illustrious careers. Luminaries from all walks of life are featured, including politics, traditional leadership, civil service, academia, and sports. This book has several main aims. Its primary aim is historical. It presents biographical profiles or accounts of the entrants and highlights the accomplishments and contributions of entrants in their respective fields of expertise or in the public sphere. But the aim of this study is not only to present entrants biographies. It is mostly to place the entries in a broader historical perspective. The biographical dictionary, though concerned about personal accounts of entrants, it discusses pivotal events that shaped the history of South Sudan. The biographies are essentially linked to historical events that shaped or influenced the countrys trajectory throughout the period in question. Central to understanding the history of South Sudan is the biographical information of personalities who have taken part in major events or who have assumed important offices in the country.

*Who's Who in the Arab World 2007-2008* compiles information on the most notable individuals in the Arab world. Additionally, the title provides insight into the historical background and the present of this influential and often volatile region. Part I sets out precise biographical details on some 6,000 eminent individuals who influence every sphere of public life in politics, culture and society. Part II surveys the 19 Arab Countries, providing detailed information on the geography, history, constitution, economy and culture of the individual countries. Part III provides information on the historical background of the Arab world. Indexes by country and profession supplement the biographical

section. A select bibliography of secondary literature on the Middle East is also included.

"This book is composed of transcriptions of 30 radio interviews conducted by the Voice of America with African scientists from 1978 to 1980. A total of 41 interviews were broadcast in the series, "Science in Africa," from 1979 to 1981. ... Scientists from most English-speaking countries in Africa are included; scientists from French-speaking nations were not covered in the broadcast series because it was designed for the English-to-Africa Branch of the VOA. The series was organized by VOA Africa Division Special Projects Officer Lee Nichols .... The programs were produced by the Production Branch of the VOA Africa Division."--Page v.

Nutritional Deficiency The Moshe Dayan Center

This book arises from a 2011 international conference entitled Climate Change, Agri-Food, Fisheries and Ecosystems: Reinventing Research, Innovation, and Policy Agendas for an Environmentally and Socially-Balanced Growth (ICCAFFE2011), organized by the North-South Center for Social Sciences (NRCS) in collaboration with the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH, Germany and the Institute for Research and Development (IRD), France. Coverage focuses on the agricultural sector and helps improve understanding of the relationships between agriculture and the environment and between human communities and nature, so as to sustainably manage agricultural development. The contributors analyze the interdependence between sustainable agricultural development and environmental, economic and social dynamics; assess the impacts of soil degradation on agricultural productivity; present ways to enhance livestock production and recommend mechanisms for managing links between agro-

biodiversity, climate change and livelihoods. Part I examines sustainable agriculture development and environmental, economic and social dynamics, addressing topics such as global climate change, agriculture and challenges including socio-economic factors, adaptation, poverty reduction and water management. Part II covers the impacts of soil degradation on agricultural productivity and discusses the use of expert systems to assess and manage degraded lands, agricultural productivity, land suitability and rehabilitation. Part III focuses on livestock production enhancements, such as feed resources and supplemental feeds for animals and capacity building for women in dairy management. Part IV shares the outcomes of research in agro-biodiversity, climate change and livelihoods, addressing topics such as co-management of forests, carbon consumption models, biodiversity conservation and carbon sequestration and scarce mangrove forests. Current environmental and agro-ecological research focuses on understanding the cause-consequence relationships between specific agricultural practices and land use

and the responses at different levels of ecosystems. This book is intended to contribute to this discussion.

*Automatic Defense Against Zero-day Polymorphic Worms in Communication Networks* ScholarlyEditions

Able to propagate quickly and change their payload with each infection, polymorphic worms have been able to evade even the most advanced intrusion detection systems (IDS). And, because zero-day worms require only seconds to launch flooding attacks on your servers, using traditional methods such as manually creating and storing signatures to de

Issues in Dentistry, Oral Health, Odontology, and Craniofacial Research: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Dentistry, Oral Health, Odontology, and Craniofacial Research. The editors have built Issues in Dentistry, Oral Health, Odontology, and Craniofacial Research: 2011 Edition on the vast information databases of ScholarlyNews.™ You can

expect the information about Dentistry, Oral Health, Odontology, and Craniofacial Research in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Dentistry, Oral Health, Odontology, and Craniofacial Research: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>. *The World of Learning* Cambridge University Press

Machine learning, one of the top emerging sciences, has an extremely broad range of applications. However, many books on the subject provide only a theoretical approach, making it difficult for a newcomer to grasp the subject material. This book provides a more practical

approach by explaining the concepts of machine learning algorithms and describing the areas of application for each algorithm, using simple practical examples to demonstrate each algorithm and showing how different issues related to these algorithms are applied.

*Developing Mathematics in Third World Countries* Academic Press

Intake of a sufficient diet will provide an individual to live a healthy and functional life. However, poor intake of different nutritional components, such as proteins, vitamins, minerals, and trace elements, may lead to health problems that can cause morbidity and finally mortality. Assessment of nutritional status involves physical examination, comprehensive evaluation of biochemical tests, body composition, and organ functions. Both high and low intake of nutritional elements may lead to significant health impairment. The main aim of the book Nutritional Deficiency is to determine the relationships between nutritional status and general health. The authors, who are contributing to the book, particularly focused on iron, vitamin D, and zinc deficiencies, which are global health

problems. Besides, some chapters mention the impact of different nutritional deficiencies in susceptible periods of life, such as pregnancy and elderly. Besides, as a result of these deficiencies, different health conditions, such as depression, anemia, loss of neuronal plasticity, and cancer, are widely scrutinized in the book. One chapter mainly focuses on the effects of disasters on nutrition and disaster-caused malnutrition in underdeveloped

countries. This book will widen the knowledge store of the readers on the effects of nutrition on general health, how nutritional deficiencies arise when there is a health problem, and how the nutritional status affects susceptible populations.

**دليل المستغلين بالعلوم الاجتماعية في الشرق الاوسط** Walter de Gruyter GmbH & Co KG

This book charts the developments in the discipline of geography from the 1950s to

the 1980s, examining how geography now connects with urban, regional and national planning, and impacts on areas such as medicine, transport, agricultural development and electoral reform. The book also discusses how technical and theoretical advancements have generated a renewed sense of philosophic reflection – a concern closely linked with the critical examination and development of social theory.
