1 in 15 men. 1 in 18 women. Every year in the UK 43,000 people are newly diagnosed with colorectal cancer. Dr Anisha Patel is one of them. Young, fit, and married to a consultant gastroenterologist and bowel cancer screening specialist, in 2018 she was diagnosed with Stage 3 colorectal cancer. Despite being a family doctor, Anisha had no idea what would come next. With the benefit of hindsight, and after first-hand experience, she understands now that the diagnosis is just the beginning, that treatment can be physically and mentally overwhelming, and that the hard work really starts when the treatment ends. Drawing on her own experience and her medical expertise, as well as that of specialists in the field, Anisha's book is an essential companion for anyone facing a cancer diagnosis. She outlines what to expect at each stage, from diagnosis, through treatment and into the 'new normal' that awaits, with practical advice and emotional guidance for every step of the way. Hers is not the only voice; here you will find a chorus of individuals who share their own lived experiences of colorectal cancer and its aftermath, in the hope that they, too, can navigate you through the eye of the cancer storm, to thrive in the life beyond. Powerful and personal, this is a life-saving book for a life-changing diagnosis, and a testament to human resilience and the enduring power of hope. Search skills of today bear little resemblance to searches through print publications. Reference service has become much more complex than in the past, and is in a constant state of flux. Learning the skill sets of a worthy reference librarian can be challenging, unending, rewarding, and-- yes, fun.

Steps to Knowledge: The Book of Inner Knowing Steps to Knowledge is the Book of Inner Knowing. Its one-year study plan, which is divided into 365 "steps," or lessons, is designed to enable students to learn to experience and to apply their Self-Knowledge, or Spiritual Power, in the world. Steps to Knowledge sets out to accomplish this task in a step-by-step manner as students are introduced to the essential ideas and practices which make such an undertaking possible. Practicing every day provides a solid foundation of experience and develops the thinking, perception and self-motivation necessary for both worldly success and spiritual advancement. Steps to Knowledge describes Knowledge in the following way: "Knowledge represents your True Self, your True Mind and your True Relationships in the universe. It also possesses your greater calling in the world and a perfect utilization of your nature, all of your inherent abilities and skills, even your limitations, all to be given for good in the world." (Step 2) Knowledge is the deeper spiritual mind that the Creator has given to each person. It is the source of all meaningful action, contribution and relationships. It is our natural Inner Guidance system. Its reality is mysterious, but its Presence can be directly experienced. Knowledge is remarkably wise and effective in guiding each person in finding his or her right relationships, work and contribution. It is equally effective in preparing one to recognize the many pitfalls and deceptions that exist along the way. It is the basis for seeing, knowing, and acting with certainty and strength. It is the foundation of life. Steps to Knowledge has been provided as a Way for individuals who feel that a spiritual calling and purpose are emerging in their lives, but who need a new approach to fully comprehend what this means. Often these individuals have felt this pull for a long time. Steps provides a foundation upon which they can begin to respond to this calling. The only entrance requirement is the determination to know one's purpose, meaning and direction.

Philosophy should give the human being a mental basis that will allow man to lead a happy life and solve the problems of the now. Philosophy does not consist of making things complicated and incomprehensible like today's degenerate philosophies do. In this book, no philosophical phrases are discussed in order to play mental soccer. This book gives basics about life, which one can apply to lead to a fulfilled, happy existence. Basic questions about life itself are solved. What is life? What is man? Is it that a creature arose from mud by chance as science tells you? Or is it that matter is motivated by a soul as the priest makes you believe. Why does man think the way he thinks? What is the goal of existence?

In *Dimensions of Faith*, cognitive scientist Steve Donaldson takes readers on a journey from the world of assumptions, set minds, widely varying beliefs, and popular misconceptions to an understanding of the true essence and role of faith as the natural and inevitable product of brains. Using numerous illustrations and examples, Donaldson shows how faith is necessitated by a variety of unavoidable limitations, exposes the myth of a divide between faith and critical thinking, provides practical advice for crafting coherent beliefs, and explains why there can never be such a place as "Factland." Along the way he takes a special look at religious faith—evaluating its attributes, exploring its relation to other manifestations of faith, investigating whether God has done his job well enough to warrant the faith placed in him, and pondering how truth seekers can sometimes end up in very different places.
