 This is a concise presentation of the concepts underlying the design of digital communication systems, without the detail that can overwhelm students. Many examples, from the basic to the cutting-edge, show how the theory is used in the design of modern systems and the relevance of this theory will motivate students. The theory is supported by practical algorithms so that the student can perform computations and

simulations. Leading edge topics in coding and wireless communication make this an ideal text for students taking just one course on the subject. *Fundamentals of Digital Communications* has coverage of turbo and LDPC codes in sufficient detail and clarity to enable hands-on implementation and performance evaluation, as well as 'just enough' information theory to enable computation of performance benchmarks to compare them against. Other unique features include space-time communication and geometric insights into noncoherent communication and equalization. *Fundamentals of Investments* Pearson

'Her eyes seemed flecked with gold when the sun was on them. And as the sun set over the mountains, drawing a deep red wound across the sky, there was more than gold in Kiran's eyes. There was anger...' Who does not enjoy short stories that are pithy, compelling and gripping? In this collection, Ruskin Bond selects some of the best short stories for

his readers. There is O. Henry's classic story about hunting in the great outdoors; Guy de Maupassant's Gothic horror classic about a severed hand with a mind of its own; Edgar Allan Poe's tale about a heart that doesn't seem to stop beating; and stories by H.G. Wells, Arthur Conan Doyle, Charles Dickens and by Ruskin Bond himself. Always entertaining and completely unputdownable, the stories in Eyes of the Cat will keep readers riveted till the very last page.

Fundamentals of Investments was written to: 1. Focus on students as investment managers, giving them

information they can act on instead of concentrating on theories and research without the proper context. 2. Offer strong, consistent pedagogy, including a balanced, unified treatment of the main types of financial investments as mirrored in the investment world. 3. Organize topics in a way that makes them easy to apply--whether to a portfolio simulation or to real life--and support these topics with hands-on activities. The approach of this text reflects two central ideas. First, there is a consistent focus on the student as an individual investor or investments manager. Second, a consistent, unified treatment of the four basic types of

financial instruments--stocks, bonds, options, and futures--focusing on their characteristics and features, their risks and returns, and the markets in which they trade.

CIMA Official Sahitya Bhawan Publications 'An excellent book' - Ted Honderich, Emeritus Professor of Philosophy of Mind and Logic at University College London (UCL) *Introducing Consciousness* provides a comprehensive guide to the current state of consciousness studies. It starts with the history of the philosophical relation between mind and matter, and proceeds to scientific attempts to explain consciousness in terms of neural mechanisms, cerebral computation

and quantum mechanics. Along the way, readers will be introduced to zombies and Chinese Rooms, ghosts in machines and Erwin Schrodinger's cat.

First delivered as a
speech to schoolgirls in
Kent in 1926, this
enchancing short essay
by the towering

Modernist writer
Virginia Woolf
celebrates the
importance of the
written word. With a
measured but ardent
tone, Woolf weaves
together thought and
quote, verse and prose
into a moving tract on
the power literature
can have over its
reader, in a way which
still resounds with truth
today. I have
sometimes dreamt, at
least, that when the
Day of Judgement
dawns and the great
conquerors and
lawyers and statesmen
come to receive their
rewards - their crowns,
their laurels, their
names carved indelibly
upon imperishable
marble - the Almighty
will turn to Peter and
will say, not without a
certain envy when he
sees us coming with
our books under our

arms, "Look, these need no reward. We have nothing to give them here. They have loved reading."
