*Building Websites with Joomla! 1.5 Beta 1* Pearson Education Building on the first edition of Joomla!: Visual QuickStart Guide, this task-based guide is the perfect tool for those just starting with Joomla, as well as, seasoned professionals who want to know how to use the latest version of the software to its fullest. It shows how to create, customize, and maintain a dynamic Joomla 1.6 website starting with fundamental concepts for using Joomla and then walks the user through every function of the system. It details the requirements for operating a secure and efficient Joomla website, including server configuration and website planning. The reader learns not only the functions of Joomla, such as adding content and structure, creating menus, using components, modules, plug-ins, and templates, but also how each function integrates as a whole. Each chapter ends with increasingly advanced topics, such as installation and

configuration of the administrative back end, using 3rd-party extensions to create a portfolio, a blog, an e-commerce site, magazine, or news portal, as well as, how to use content construction kits, create custom templates, and integrate social media. New features covered in this edition include: how to use the redesigned admin interface; new menu systems, including advanced functions for developers; how to use the category-article structure of content; the ability for users to create their own groups and assign access control levels; and control and customization of templates.

Increasingly humanitarian NGOs operate in the context of armed conflicts where the security risks are higher than in contexts of natural disaster. Working in Afghanistan, Somalia, Sudan, South Sudan, Pakistan and Sri Lanka is particularly dangerous for humanitarians. This existential threat affects the physical existence of aid workers and the implementation of humanitarian programs, and the core beliefs of humanitarians and the underlying principles of humanitarian action. For NGOs it is difficult to accept that they are attacked despite their good intentions, sometimes even by the very communities they seek to help. For these reasons, humanitarian NGOs have to change their approaches to security by not only adapting their policies, procedures and structures to the changing environment, but also reviewing the underlying principles of their work. This book contributes to debates by demonstrating how issues of (in)security affect humanitarian NGOs and the humanitarian identity, situating the structural changes within the humanitarian NGO community in the context of conflict aid governance and explains how non-state actors establish their own governance structures, independent from state-sponsored solutions, and contributes to the emerging literature on the redefinition of the concept of epistemic communities.
