The Algebra Miracle: The True Story of a High-Poverty School's Triumph in the Age of Accountability

This book develops the Weyr matrix canonical form, a largely unknown cousin of the Jordan form. It explores novel applications, including include matrix commutativity problems, approximate simultaneous diagonalization, and algebraic geometry. Module theory and algebraic geometry are employed but with self-contained accounts.

This step-by-step resource offers three block schedule models, sample lessons, instructional strategies, and templates to get a successful alternative scheduling program up and running.

Oklahoma High School Manual and the Reports Submitted at the Meeting of the City Superintendents and High School Principals Corwin Press

A concise analysis of the basic problems with our Public Schools, and a succinct

guide to fixing them! Once in the classroom I learned the limitations of the current platform that dictates the operation of Public Schools in the United States. This book addresses 25 primary and secondary topics that should be addressed if we are serious about Public School reform in the United States. Each chapter is easily read and digested in 20 minutes. The reader should find each chapter entertaining as each contains at least one story that showcases the problem and the ensuing discussion is brief and to the point. The author grew up in Wyoming, attended an exploratory high school attached to the University of Wyoming, earned a Bachelor of Science with honors in Mechanical Engineering from the University of Wyoming, worked in the mining and chemical processing industry in Wyoming and Colorado, taught high school math for seven years, and is now retired in Jackson, Wyoming.

The purpose of this study was to evaluate the effectiveness of two different eighth-grade algebra support programs. Algebra Topics is a year-long elective math course in which students enroll in addition to their eighth grade algebra course. The Algebra Academy is a second semester support program, serving recommended students with low first semester Algebra 1 grades. We hypothesized that both the Algebra Topics course and Algebra Academy would improve the performance of eighth grade students simultaneously enrolled in Algebra I. The effect of the Algebra Topics course on the 20 students enrolled was assessed by reviewing their first semester grades and SAT -9 scores. These scores were compared to the grades and test scores of 21 students who did not enroll in Algebra Topics. The second semester grades and SAT -9 scores of the 9 students enrolled in the Algebra Academy were also compared to the grades and test scores of the 9 students not enrolled. Both teachers administrating the two support programs were also interviewed. The findings suggest that students enrolled in the Algebra Topics performed better on semester grades and SAT -9 tests than students not enrolled. The data revealed that students enrolled in Algebra Academy had lower semester grades and comparable SAT -9 scores. Although both programs offered a "double dose" of Algebra, the two programs differed in accountability, time, structure, and student perception. Recommendations for eighth grade algebra support programs are included.

The Mathematics Teacher

Considers. S. 3046, to provide grants for education of low-income children, including migrant farmworkers' and Indians' children. S. 2778, to provide grants assisting education of orphans and handicapped children. S. 2928, to provide assistance programs grants for the eradication of school racial imbalance. S. 3012, to provide grants furthering remedial adult education.

The Block Scheduling Handbook

Enacting an effective grading system that emphasizes the secondary student's learning process! The book is written in an articulate and direct format that highlights successful practices, programs and activities that support effective implementation of changing grading systems. Providing research of grading reforms that were enacted by an active teacher dialogue with the student's perspective taken into consideration

Addressing the shortcomings of no failure policies in the overall learning process Researching perception of effort limitations and the impact of grades given to the student by an instructor Considering restraints of grading policies due to vagueness and constrictive focus
