 In this book we demonstrate a mode of teacher education that is practical in a non-technical sense and relies on Dewey's notion of curriculum as the reconstruction

of experience. We present a curriculum that emerged through collaborative self-reflection and seeks to reconstruct personal histories of schooling. As four former preservice teachers and their instructor, we engaged in jointly constructed autobiographical inquiry in order to generate data on our own past and on our current histories of teaching and learning. We wanted to illuminate

parts of our lives in schools that until now belonged to our 'normal' and taken-for-granted past. We did this in order to enjoy certain degrees of awareness and choice as to which of our living stories to reinforce and which to "let run out" in our classrooms today.

secondary schools in India, Malaysia, Nigeria, Pakistan, Samoa, Seychelles, and Trinidad & Tobago, this book analyses whether schools perpetuate gender stereotypes and investigates how this can be prevented. It provides insights and recommendations useful for policy-makers and educators worldwide. Western Spectrum Pergamon The book provides new

insights into written corrective feedback by describing students' expectations as well as mediating factors that influence their engagement with it. The book draws on an extensive dataset to illustrate secondary school students' behavioural, cognitive and emotional engagement with written corrective feedback and the extent to which mediating factors, such as teachers,

peers, feedback options, attitudes and emotions, foster or hinder it. It shows why teachers need to provide students with the purpose of the corrective feedback they provide, explain how such feedback works and introduce strategies that can be employed to engage with it. Based on the finding that a combination of several feedback types is essential to ensure learner

engagement, the book also provides an extensive description and multiple authentic examples of the Engagement-Feedback-Mediator Model that was developed in the context of this study.
