History teacher Kevin Lee is retiring from Seneca Falls High School, where he has worked for the past forty years. He decides to use the freedom of his pending exit to toss the state curriculum and teach the U.S. survey as the story of the alluring, inspiring, murderous concept we know as the American Dream—which, he understands, his students regard with justified, if instinctive, skepticism. Lee discusses the rise, fall, and legacy of the Dream with these smart, funny, and irreverent eleventh graders, in a narrative peppered with memos, email exchanges, text messages, student journalism, and other documents from beyond the walls of his classroom. The result is the best history class you never had. A chronological history of the United States, this compelling novel also offers a snapshot of American education, written by a veteran teacher who slices through the arid literature of pedagogy to vividly depict the life of the classroom. Finally, it offers a deeply affectionate and patriotic vision of American life—one fully aware of the nation's limits and failures while honoring the longings so many of us have to believe in our country, even as we harbor deepening doubts about our nation.

Gathered here for the first time are Alfred Hitchcock's reflections on his own life and work. In this ample selection of largely unknown and formerly inaccessible interviews and essays, Hitchcock provides an enlivening commentary on a career that spanned decades and transformed the history of the cinema. Bringing the same exuberance and originality to his writing as he did to his films, he ranges from accounts of his own life and experiences to techniques of filmmaking and ideas about cinema in general. Wry, thoughtful, witty, and humorous—as well as brilliantly informative—this selection reveals another side of the most renowned filmmaker of our time. Sidney Gottlieb not only presents some of Hitchcock's most important pieces, but also places them in their historical context and in the context of Hitchcock's development as a director. He reflects on Hitchcock's complicated, often troubled, and continually evolving relationships with women, both on and off the set. Some of the topics Hitchcock touches upon are the differences between English and American attitudes toward murder, the importance of comedy in film, and the uses and techniques of lighting. There are also many anecdotes of life among the stars, reminiscences from the sets of some of the most successful and innovative films of this century, and incisive insights into working method, film history, and the role of film in society. Unlike some of the complex critical commentary that has emerged on his life and work, the director's own writing style is refreshingly straightforward and accessible. Throughout the collection, Hitchcock reveals a delight and curiosity about his medium that bring all his subjects to life.

Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition—how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The

more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.

"Do I really have to teach reading?" This is the question many teachers of adolescents are asking, wondering how they can possibly add a new element to an already overloaded curriculum. And most are finding that the answer is "yes." If they want their students to learn complex new concepts in different disciplines, they often have to help their students become better readers. Building on the experiences gained in her own language arts classroom as well as those of colleagues in different disciplines, Cris Tovani, author of *I Read It, but I Don't Get It*, takes on the challenge of helping students apply reading comprehension

strategies in any subject. In *Do I Really Have to Teach Reading?*, Cris shows how teachers can expand on their content expertise to provide instruction students need to understand specific technical and narrative texts. The book includes: examples of how teachers can model their reading process for students; ideas for supplementing and enhancing the use of required textbooks; detailed descriptions of specific strategies taught in context; stories from different high school classrooms to show how reading instruction varies according to content; samples of student work, including both struggling readers and college-bound seniors; a variety of "comprehension constructors" guides designed to help students recognize and capture their thinking in writing while reading; guidance on assessing students; tips for balancing content and reading instruction. Cris's humor, honesty, and willingness to share her own struggles as a teacher make this a unique take on content reading instruction that will be valuable to reading teachers as well as content specialists.

Through his I-Maximum Approach, Dr. Shrand helps readers learn how to set aside self-doubt, show others they are valued, and make more meaningful connections. Through his I-Maximum Approach, Dr. Shrand helps readers learn how to set aside self-doubt, show others they are valued, and make more meaningful connections. In a sense, we all try to be mind readers. We "theorize" about whether we are admired or envied, despised or

loved. Psychologists use the term "Theory of Mind" to describe our natural tendency to make assumptions about what others think and how they feel about us based on the tone of their voice, facial expressions, and body language. These cues either signal us to open up further and make a connection or to put up a wall to protect ourselves from rejection. But it is also easy to misinterpret these cues and become unnecessarily guarded, such as when someone appears to be angry with us and we later learn they were just having a bad day and the negative signs we were picking up really had nothing to do with us. The more emotional baggage we bring to our interactions, the more likely we are to negatively misinterpret other people's feelings and the more disconnected from them we become. In this groundbreaking book, Joseph Shrand, MD, instructor of psychiatry at Harvard Medical School, and Leigh Devine teach us that by setting aside self-doubt and assuming the best about ourselves and others, we can make more meaningful connections based on mutual respect and value. This is the heart of Dr. Shrand's I-Maximum Approach, which teaches us to assume that we all are doing the best we can at any given time. With the heightened empathy that we gain from this approach comes a deeper understanding of our own and others' mental and emotional states and how they influence our interactions, resulting in stronger connections and more rewarding relationships.

Audrey Tennyson's *Vice-Regal Days* edited by Alexandra Hasluck, from the extensive collection of Tennyson papers in the National Library of Australia. The book is fortunate in its editor, for Lady Hasluck, besides being a skilled historian, brought to the task the

experience and insights of one who was herself the wife of a former Governor-General of Australia.

Do You Really Need It? Rowman & Littlefield

Decisions, decisions... Whether you're considering the latest tech or a new car, a destination wedding or buying a house, this runaway #1 Quebec bestseller says it all comes down to just one question: do you really need it? This common-sense guide by a CPA and journalist combines a fresh approach with sound advice and a good dose of humour--proving that having the right attitude to money is one of the keys to happiness. Do you need it? Do you really need it? Pierre-Yves McSween applies this simple question to all the decisions that have a direct effect on our bank accounts. Do You Really Need It? holds up a mirror to our life choices and their consequences. McSween questions our spending habits and assumptions, stressing the need for a fresh outlook on building financial flexibility. Mixing sound advice with humour and a touch of philosophy, McSween looks at some forty different topics, questioning what you Really Need: credit cards, brand-name products, a new car (or a used one), marriage, kids, life insurance, RRSPs and TFSAs, vacations, a will. In each chapter McSween makes his case and ends with his summary of whether you do, in fact, REALLY need it. Do You Really Need It? covers money matters with zero BS and no holds barred, offering clever strategies for you to question consumerist impulses and fill in your financial knowledge gaps. McSween seeks first to define the behaviour of a responsible citizen; and then to show readers how

to achieve a little more freedom in their lives--something they really, truly need.

Hearings Simon and Schuster

Countless books and articles have offered remedies for the poor learning outcomes of American schoolchildren. Virtually all of these publications share one thing in common: They propose improvements in the policies and practices controlled by adult educators. Grove believes that our children's poor learning cannot be totally the fault of educators. Our children are active participants in classrooms, so if there's a problem with how well our children are learning, then we as parents might be at fault. To discover what our part is and explore what can be done about it, Grove draws on over 100 anthropological studies of children's learning and child-rearing in China, Japan, and Korea. They reveal that those children, even the youngest ones, are highly receptive to classroom learning. Why do they come into classrooms with attentive and engaged attitudes? How did they acquire the drive to learn? Can American parents benefit from knowing how Chinese, Japanese, and Korean parents think about and carry out child-rearing? The Drive to Learn explores these questions.

This book is full of stories, some true happenings, some just good stories. Each of these short devotional lessons are a sermon unto themselves. I have had preachers write and tell me that they use them as sermon starters or for devotional lessons. Mostly they are written with the hopes that they will touch something in your heart and help you in your daily walk with Christ.
