The White Goddess is perhaps the finest of Robert Graves's works on the psychological and mythological sources of poetry. In this tapestry of poetic and religious scholarship, Graves explores the stories behind the earliest of European deities—the White Goddess of Birth, Love, and Death—who was worshipped under countless titles. He also uncovers the obscure and mysterious power of "pure poetry" and its peculiar and mythic language.

NEW YORK TIMES BESTSELLER • "A fascinating look at how consumers perceive logos, ads, commercials, brands, and products."—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can "cool" brands trigger our mating instincts? • Can our other senses—smell,

touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Centurions were the guardians of Rome. At the height of the Roman Republic there were over five thousand qualified Roman Centurions in the Legions. To be a Centurion required that, in a mostly illiterate society, one be able to read and write clearly, to be able to convey and create orders, to be capable of not only performing every skill of a Roman soldier but teach every skill of a Roman soldier. Becoming a Centurion required intense physical ability, courage beyond the norm, years of sacrifice and a total devotion to the philosophy which was Rome. When Rome fell to barbarian invaders, there were less than five hundred qualified Centurions. Not because Rome had fewer people but because it had fewer willing to make the sacrifices. And the last Centurions left their shields in the heather and took a barbarian bride . . . We are . . . The Last Centurions. At the publisher's request, this title is sold without DRM (Digital Rights Management).

This book focuses on the increasing difficulty of sustaining a family in England, where competition for mere subsistence and providing for children has become so fierce. In this book, the author points out that as children mature, it becomes imperative for the parent to seek some profession on which they may rely for their future support.

Ghost Rider St. Martin's Griffin

On an evening after Easter Day, I sat at a table in a homeward bound steamer's smoking-room, where half a dozen of us told ghost stories. As our party broke up a man, playing Patience in the next alcove, said to me: "I didn't quite catch the end of that last story about the Curse on the family's first-born." "It turned out to be drains," I explained. "As soon as new ones were put into the house the Curse was lifted, I believe. I never knew the people myself." "Ah! I've had my drains up twice; I'm on gravel too." "You don't mean to say you've a ghost in your house? Why didn't you join our party?"

#1 INTERNATIONAL BESTSELLER • A timeless, structure-bending classic that explores how actions of individual lives impact the past, present and future—from a postmodern visionary and one of the leading voices in fiction Featuring a new afterword by David Mitchell and a new introduction by Gabrielle Zevin, author of *Tomorrow, and Tomorrow, and Tomorrow* One of the New York Times's 100 Best Books of the 21st Century • Shortlisted for the International Booker Prize *Cloud Atlas* begins in 1850 with Adam Ewing, an American notary voyaging from the Chatham Isles to his home in California. Ewing is befriended by a physician, Dr. Goose, who begins to treat him for a rare species of brain parasite. The novel careens, with dazzling virtuosity, to Belgium in 1931, to the West Coast in the 1970s, to an inglorious present-day England, to a Korean superstate of the near future where neocapitalism has run amok, and, finally, to a postapocalyptic

Iron Age Hawaii in the last days of history. But the story doesn't end even there. The novel boomerangs back through centuries and space, returning by the same route, in reverse, to its starting point. Along the way, David Mitchell reveals how his disparate characters connect, how their fates intertwine, and how their

souls drift across time like clouds across the sky. As wild as a video game, as mysterious as a Zen koan, *Cloud Atlas* is an unforgettable tour de force that, like its incomparable author, has transcended its cult classic status to become a worldwide phenomenon.
