In this book, Jayne Godfrey and Keryn Chalmers explore the intricacies of the globalisation of accounting standards - arguably one of the most significant business developments of the wider globalisation process during the past two decades. They examine the key issues and implications of this harmonization of accounting standards from the perspectives of a diverse range of worldwide stakeholders. "Globalisation of Accounting Standards" shows that globalisation approaches differ significantly because countries seek to maintain varying degrees of sovereignty over their regulations. International differences in economic, political, legal, religious and social characteristics also affect globalisation approaches and, in turn, influence national accounting standard-setting agendas. The book explores why countries relinquish their existing national accounting standard-setting regimes to join the global movement. It also seeks to resolve questions such as: To what extent are national incentives altruistic, economic, political or social? Who are the winners and losers in the process? This authoritative book is thoroughly researched and expertly informed. Written by both academics and regulators, it tackles a critical and controversial issue in the globalisation movement. As such, it will be of great interest to a wide-ranging audience including: international, national, private and public sector standard-setters, economic regulators, accounting academics and political economists and strategists.

From the Enron and WorldCom scandals of the early 2000s to the financial crisis of 2007–2008 to present-day issues and challenges related to significant estimation uncertainty, understanding the auditor's responsibility related to fraud, maintaining a clear perspective, probing for details, and understanding the big picture are indispensable to effective auditing. With the availability of greater levels of qualitative and quantitative information ("big data"), the need for technical skills and challenges facing today's auditor is greater than ever. The author team of Louwers, Blay, Sinason, Strawser, and Thibodeau has dedicated years of experience in the auditing field to this new edition of Auditing & Assurance Services, supplying the necessary investigative tools for future auditors.

This type of approach has long been acknowledged as a superior manner in which to teach. Since the authors present the concepts of auditing using actual corporate contexts, they seek to provide students with a real-life appreciation of these issues and clearly demonstrate the value of the Sarbanes-Oxley Act of 2002 and the post-Sarbanes technical audit guidance. The Third Edition has been updated to reflect all of the major changes happening in today's society with actual companies such as Enron, WorldCom, Qwest, Sunbeam, that have become synonymous with the capital markets' crisis in confidence. With 45 different short cases, instructors can assign 8 to 9 different cases for each of four different semesters.
