A contemporary and practical guide to Mayan astrological techniques • Discusses the logic and meaning of the 20 day-signs of the Mayan calendar • Explains the many cycles of Mayan astrology, such as the 9-day cycle of the Night Lords and the 13-day trecena • Contains extensive tables of Mayan astrological data, allowing readers to cast their own Mayan horoscopes
 How to Practice Mayan Astrology presents a contemporary guide to one of the most sophisticated astrological systems ever developed. Like other ancient peoples, the Maya looked to the cycles of the planets as markers of time and designators of order. The predictable cycles they observed became codified in the Mayan calendar and astrological system as a way of organizing the seeming chaos of human life. Mayan astrology is based on 20 named days that are cycled 13 times to create a 260-day calendar, the Tzolkin. The authors explain the symbolism, logic, and meaning of the 20 day-signs; how these signs reflect 260 possible personality types; and how they can be used for divination. They also explain the important role of the Four Directions and the planet Venus in one's personality matrix and life issues. Included are extensive, easy-to-use tables of Mayan astrological data, allowing readers to determine their day-signs, to see how these signs are also influenced by the cycle of the Night Lords and the 13-day trecena, and to cast their own horoscopes.

The Maya calendar started on August 11, 3114 BCE (corresponding date in the proleptic Gregorian calendar) and will

end on December 21 2012. Will it be Armageddon or just another day? The believers are making survival preparations and turning to religious leaders for guidance and solace. Follow National Geographic through the maze of doomsday prophets, cult leaders, and international and historic end times teachings to understand the science behind the Maya calendar and the phenomenon of Armageddon predictions. Scientists and historians know that end-of-days thinking has occurred throughout time around the world. Norse mythology predicted the world would be submerged in water; ancient Greeks believed that Zeus's defeat by his son would be the grand finale. In A.D. 79, Romans thought Mount Vesuvius's eruption in Pompeii was the start of the apocalypse. Jewish, Christian, and Islamic texts all include some writing about end times. The year 1666—feared by many Christians—proved itself to be the year of the Beast when the Great Fire of London visited God's wrath (as widely believed) on the British. Hailey's Comet drove Europeans and Americans into apocalyptic fits in 1910. Individual charismatic figures have led thousands in unfulfilled Armageddon watches. For example, in 1843, spiritual leader William Miller's doomsday prediction failed (The Great Disappointment), but led followers to establish the Seventh Day Adventists. The Jehovah's Witnesses awaited the world's end in 1914. Preacher Jim Jones led hundreds of cult members to commit suicide in Ghana in the 1970s. Pat Robertson was certain Jesus was returning for the Rapture in the 1980s. The leader of the cult Heaven's Gate convinced 39 followers to commit suicide to escape imminent destruction in 1997. And there's no sign of a slow down. In fact, the Internet has spawned a plethora of doomsday cult leaders, from Y2K hysterics to the most recent religious figure Harold Camping, whose rapture predictions of 2011 left his followers earth-bound. National Geographic debunks the myth and illuminates the fascinating realities of the Maya calendar, the 2012 phenomenon, and Armageddon prophecies through the ages.

The firsthand account of a god who comes to Earth to destroy mankind and ends up being its defender. When clouds suddenly envelop the globe and a ceaseless rain begins to fall on every continent, Du Moss, an amphibious teen, has only days to save the Age of Man from the Great Flood that will wash away the modern world.

The Mayans Developed a Calendar, Mathematics and Astronomy | Mayan History Books Grade 4 | Children's Ancient History Bear
 The only small, popular book on the important subject of ancient calendars. The study of heavenly cycles is common to most

ancient cultures. The ancient Egyptians, Chinese, and Babylonians all tried to make sense of the year. But it fell to the later Mesoamerican Maya to create a series of calendars that could be cross referenced. In doing so, the Maya discovered many strange numerical harmonics. Their lunar calendar was extremely accurate—far more so than the Greek Metonic cycle; they tracked Venus to an accuracy of less than a day in five hundred years and their tables could have been used to predict eclipses seven hundred years in the future. This book will provide a much needed compact guide to the Mayan calendar systems as well as covering the essentials of calendar development throughout the world.

 Bestselling author Barbara Hand Clow shows how the Mayan Calendar is a bridge to galactic wisdom that fosters personal growth and human evolution • Unearths the meaning behind the calendar, its message for modern civilization, and what will happen when the calendar ends • Reveals how time acceleration is a manifestation of the acceleration of consciousness • By the author of *The Pleiadian Agenda* The Mayan Code is a deep exploration of how, as we approach the end of the Mayan Calendar, time and consciousness are accelerating, giving us a new understanding of the universe. Using Carl Johan Calleman's research, as well as the ideas of other Mayan Calendar scholars, Barbara Hand Clow examines 16.4 billion years of evolution to decode the creative patterns of Earth—the World Mind. These great patterns culminate in 2011, and then during 2012 major astrological influences will inspire us to attain oneness and enlightenment. The Mayan Code shows how the time cycles of the Calendar match important periods in the evolutionary data banks of Earth and the Milky Way Galaxy. These stages of evolution are converging during the final stage of the Calendar, the period between 1999 and 2011. War and territoriality, resource management and separation from nature, are all part of daily events we must process during these few short years: evidence of the tightening spiral of time that we experience as time speeding up. Barbara Hand Clow counsels that our own personal healing is the most important factor as we prepare to make this critical leap in human evolution—now referred to as the awakening of the World Mind.

 "Mayan Calendar Astrology: Mapping Your Inner Cosmos" is the quintessential handbook to help you understand the art of Mayan astrology and how to harness it for a profound illumination of your personal lifepath. If you liked "Jaguar Wisdom," this book will take you even deeper into the powerful insights that Mayan astrology can offer, whether you're a seasoned expert or just a beginner. Included in the book are: - Complete information about the day signs and numbers - The importance of the Year Lord - The Mayan Destiny chart (also known as the Mayan Cross) - The complete

nine-sign horoscope - Solar and lunar cycles - A unique method for determining the phases of human life - The personal compatibility matrices embedded within the Tzolk'in - A little-known technique for assessing human relationships by combining two horoscopes into a composite chart - Calendar diagrams and horoscope templates - A powerful and meditative technique called the "Path of Feathered Serpent," based on our own "personal lunar month" and designed, through a series of guided meditations, to awaken the koyopa or inner lightning we all possess. REVIEWS: "I am profoundly grateful to Kenneth Johnson for sharing his experientially based understanding of the Tzolk'in in this remarkable book. As a long-time lover of the Mayan world, 'Mayan Calendar Astrology' finally opened my eyes to the subtle workings of the 260-day calendar and led me to embrace it as a genuine path to self-understanding. The author's work is based upon his years of work with several aj q'ijab' in the Guatemalan highlands, primarily in Momostenango, the important center for contemporary Mayan calendar knowledge. Johnson's explanations of the significance of the 13 numbers, the Mayan Destiny chart, the Year Lords, and the Path of Feathered Serpent are unique in popular literature and will enrich the understanding of even dedicated scholars." - Robert Sitler, PhD, Director, Latin American Studies, Stetson University

You've noticed lately -- haven't you? -- that for the past few years, UFOs and phenomena in the skies are all over the place. Well, hold on to your hats! You can be pretty sure this is only going to increase in its frequency in the skies. In this book, you'll be able to read a little bit about who the beings in the UFOs are, where they're from, why they're here, and so on. In the future, it won't just be airplane pilots reporting on these things. You'll be talking about it among yourselves because regular folks just like you will be seeing these ships. This time, don't keep it quiet. Just talk about it with your neighbors or your friends online. It gives other people permission to believe what they saw. People have been taught, you know, not to believe what they see. So you can believe it -- it's real.

Mayan Calendar Prophecies takes a look at the science behind the Mayan calendar, prophecies and mythology. The Maya believed multiple cycles governed civilization. They created various calendars to track these cycles. Their short count calendar tracked a 256-year cycle believed to control epidemics, famines, warfare and more. Scientists have found a 250-year solar cycle that also appears to affect epidemics, famines, warfare and more. Their long count calendar tracked a 5000-year cycle related to natural disasters and cosmic catastrophes. Scientists have also discovered that the Earth is subjected to periodic bombardment by comets, asteroids, and other space debris that plunges the world into long periods of darkness and cold. Mayan mythology appears to record such events and in some instances even the exact dates on which these catastrophes occurred in the past. By comparing these dates with evidence from multiple scientific disciplines including ice core records, sedimentary records, and climate records, Mayan Calendar Prophecies unveils the truth about civilization's darkest days. And what may lie ahead in the future.

Crocodile Goes Out is a delightfully illustrated tale of the Day Lords of the Mayan Calendar that captures both the wit and wisdom of this ancient people. Written in English and Spanish, with Mayan glyphs, Crocodile Goes Out is a wonderful way to introduce children to the fascinating world of the Maya while honing their English and Spanish reading skills. Crocodile Goes Out brings the Day Lords who circle the sacred calendar of the Maya to life. Page by page, as the story unfolds, readers learn the English, Spanish and Maya names of these deities and gain insight into their vital role in the everyday life of the Maya. The twenty Day Lord glyphs of the Tzolk'in calendar always follow the same cyclical order. The story in this book was created as a device for remembering the twenty glyphs of the Mayan Calendar in proper order. Unlike Christian rectangular calendars, the calendars of the Maya are circular in design, without defined beginning or end. Scholars currently start the cycle with Crocodile and end it with Sun as has been done in this book. Because the World of the Maya spreads over vast areas, it is continuously influencing and being influenced by other cultures with differing languages and artistic traditions. Thus, Day Lord names and symbols used to depict them vary by region and when the symbols were carved, painted or embroidered. This book endeavors to remain true to the style of the ancient glyphs while creating images that effectively convey their sacred meaning.

The Book of Revelation tells of angels who fall from their heavenly estates. The Mayan calendar foretells the fall to some two hundred thousand years ago. The discord that followed sent repercussions to earth, arriving about nine thousand years ago when the first generation of the human race Israel emerged. By 4500 BC, an Agenda of a Snake from the fallen angels began to breed the biblical lines of Cain and Seth. Soon, the third generation emerged, and the conditions man calls good and evil began proliferating on the earth. Man's spirit commenced through the spirit of the angel Michael, but today it remains trapped within the human mind. Six thousand years ago, the angels Michael, Ra, Viracocha, and Ra Agenda came to earth to free man's spirit by attempting to prevent the creation of the human race. Unsuccessful, they left earth, bequeathing the Mayan calendar, which contains information about the five Ages, to the Mayan people. The Ra Agenda reemerged by 1948 as the mysterious UFO that defied the laws of reality. They have come to secretly assist mankind through the approaching shift in human consciousness scheduled to occur in the fifth Mayan Age of Aquarius in the year 2040.

Mayan daykeeper Hunbatz Men reveals the multi-calendar system of the Maya that guided the lives of his ancestors and how it can guide us today • The first book to reveal the secrets of the Mayan Pleiades calendar: the Tzek'eb • Explains how the Maya used their astronomical knowledge to guide their lives on Earth The Mayan Calendar has taken on special prominence with the imminent arrival of 2012, a date that many claim is the end of that calendar. However, as Mayan elder and daykeeper Hunbatz Men shows, the cosmological understanding of his ancestors was so sophisticated that they had not one, but many calendars, each based on the cycles of different systems in the cosmos. In this book he reveals for the first time the Tzek'eb, or Pleiades, Calendar of 26,000 years, which charts the revolution of our solar system around Alcyone, the central star of the Pleiades system. He also discusses the K'uuk'ulcan Calendar of the 4 seasons of the solar year and the wheel of the K'altunes Calendar, which is composed of 13 cycles of 20 years each that form a calendar of 260 years. In traditional Mayan culture the computation of time was not determined by simple economic or social motives. The calendars served the higher purpose of synchronizing the lives of human beings and their societies to the great cosmic pulsation, to the rhythm of the annual seasons, and to the other cycles that dictate changes upon Earth. Mayan understanding of the cosmic cycles was so exact that this knowledge could be used to influence all stages of life--from planning when to conceive (parents could choose not only the sex of their child but its vocation and future destiny) to plotting out the course of the entire society. Pyramids played a crucial role in applying this wisdom because, as Hunbatz Men shows, they were able to produce and transform energy in accordance with the cosmic cycles charted by the calendars. This book reveals for the first time the wisdom of the multi-calendar Mayan system and how it can help guide our modern world.
