*Transforming Water Management in South Africa* Harcourt Brace Jovanovich  
A child wanders too far into the Knysna Forest ... he never returns. Nine years later government officials working on a census find a white child living with a Coloured family in the mountains beyond the forest. They take him away from the stricken Fiela, who has brought him up as her son, and give him back to his 'original' family. Stunned and helpless, Benjamin waits for Fiela to reclaim him. But, powerless against authority, Fiela never comes. Benjamin has to grow up before he can go in search of the truth ...

A Xhosa prince reluctantly leaves the University College of Fort Hare and goes back to the land of his ancestors to take his place as king of the Mpondomise. The clash of his modern ideas and the traditional beliefs of his people mirrors the dash of the western way of life with African custom and tradition -- church-people versus traditionalists, school people versus 'red-ochre people', boarding school activities versus the inkundla or assembly at the royal place. The conclusion, that disaster can be averted only by the willingness of opposing forces to work together for mutual comprehension of the legitimate claims of tradition and modernity, gives a foretaste of the spirit that governed modern South Africa's political transformation. *Ingqumbo Yeminyanya -- The Wrath of the Ancestors* -- is a classic of Xhosa literature. A C Jordan has a keen eye for detail, a delightful sense of humour and a dramatic style. Literal translations of Xhosa images, idioms and proverbs transport readers to the Tsolo district and conjure up the memorable speeches of the Mpondomise counsellors.

Rurality and Education NB Publishing Rethinking Normalcy introduces the growing field of disability studies to an undergraduate audience in a variety of disciplines and programs based in the social sciences, humanities, and health sciences. The authors articulate the depth and breadth of this newly emerging field of study and provide a vibrant foretaste of the kind of work disability studies scholars and activists do to provocatively question the power of normalcy. Strongly interdisciplinary, this volume draws upon many different

social and cultural approaches to the study of disability, and essentially addresses disability as a social and political issue. The chapters in this book exemplify ways of questioning our collective relations to normalcy, as such relations affect the lives of both disabled and currently non-disabled people. Over sixty per cent of this book features the work of disability studies scholars located in Canada.

This book broadens the scope of the subject of rural education and enlivens the ways in which the subject may be studied. Through textual and visual analysis of a range of sources - including young adult novels, the farming simulation game 'Hay Day' and reality television programs - the contributors investigate how the lives of young

people in rural spaces are mediated by a range of social locations including class, ethnicity and sexuality. Additionally, through rich and detailed ethnographic work, the book explores the complicated and multifaceted meanings of rural places and examines how these meanings shape experiences of schooling for teachers and students. In doing so, the book embeds the study of rural education in explorations of patrilineal inheritance on family farms, international migration, globalisation and economic restructuring. It aims to start a conversation about the robust and complex ways in which the confluence between 'rural' and 'education' may be imagined, experienced and researched. This book was originally published as a special issue of *Discourse: Studies in the Cultural Politics of Education*.

Romeo and Juliet is a tragedy written by William Shakespeare early in his career about two young Italian star-crossed lovers whose deaths ultimately reconcile their feuding families. It was among Shakespeare's most popular plays during his lifetime and, along with Hamlet, is one of his most frequently performed plays. Today, the title characters are regarded as archetypal young lovers.

*Physical Sciences, Grade 10* Little, Brown Books for Young Readers

"A true benchmark. This work will set a new standard for the conceptualization--let alone the study--of missionization and religious conversion, colonial language policy, and language-oriented social history. Hanks provides a framework for thinking about language history that integrates language ideology, linguistic form (from phonology to speech genres), social organization, and the phenomenology of experience that goes so far beyond traditional historical, linguistic, or philological perspectives as to constitute a new paradigm for the field. *Converting Words* will be a classic work that will stimulate others to emulate Hanks's powerful scholarly example. The field will never be the same after this book appears."--Richard

Bauman, author of *A World of Others' Words: Cross-Cultural Perspectives on Intertextuality* "Hanks's work is utterly original and unprecedented... I don't think historians of the Mesoamerican colonial regimes should write anything until they read this book; it's that important."--Jane H. Hill, author of *A Grammar of Cupeño*
