Farming Ahead with the Kondinin Group
Springer
An action-

packed celebration of the world of trucks, this guide presents the fastest, loudest, most powerful, most expensive,

and most outrageous trucks ever to hit the road. In addition to featuring pick-up trucks, military trucks, tankers, desert racers,

monster trucks, and more, Super Trucks also tells amazing human-interest stories. Readers will take a trip with a long-distance trucker, find out what it's like to be a life-saving paramedic in an ambulance zooming to the scene of an emergency, and discover how much it costs Dekotora owners to adding to their lit-up trucks. *International Motor Business*

Motorbooks Increasing levels of auto ownership and use are causing severe social, economic, and environmental problems in virtually all countries in Europe and North America. This book documents the worsening transport crisis and differences among countries in their urban transport and land-use systems. The focus is on public policies to deal with urban transport

problems. Through in-depth case studies of eight countries, the book seeks to evaluate the effectiveness of alternative solutions to transport problems, and thus a way out of the transport crisis. Fiat Fox Chapel Publishing This book is an authentic historical document, supported by extensive analytical information, in which former Fiat top manager Giorgio

Garuzzo passionately recounts his experience within Fiat between 1976 and 1996. It is a narrative from the inside that sheds new light on events that have remained cloaked in mystery: the arrival and departure of Carlo De Benedetti, the “march of the forty thousand”, the sacking of Vittorio Ghidella, the clashes between Umberto Agnelli and Cesare Romiti,

the Group’s involvement in the “clean hands” scandal, the role of Gianni Agnelli and his relationships with his brother and Cesare Romiti and the intervention of Mediobanca. Garuzzo discusses the issues connected with the range of cars and marques, touching on major themes of national or international relevance that were unrelated to Fiat but nonetheless conditioned its activities:

terrorism and the unmanageability of the factories, inflation, the devaluation of the lira, the role of the trade unions and the General Confederation of Italian Industry, Japanese competition and European integration.

Automobile Abstracts

Seventy Years of Farm Tractors 1930-2000
Get the entire history of the best trucks on the road. The International Truck and

Engine Corporation has built the trucks that have been a staple of both agricultural and industrial trucking for nearly 100 years. International Harvester Trucks: The Complete History tells the complete story of the light-, medium-, and heavy-duty trucks, vans, and station wagons built by International Harvester during over a century of history, starting from the company's

early days, through its first truck model in 1907, and right up to the present. The focus is firmly on the trucks themselves including collectible machines such as the Travelall and Scout. Author Patrick R. Foster is one of the world's premier transportation historians. His accessible writing style, illustrated with hundreds of never-before-seen archival photographs, makes this book the best

examination of one of the world's most prolific truck manufacturers .

Information

Group

By the end of the twentieth century there were some

half-million tractors on British farms - more machines than people to drive them.

Brian Bell's encyclopaedic book traces the evolution of the farm tractor from the days of starting handle and

pan seat to current 4-wheel drive machines with air-

conditioned cabs and computer management systems. He deals in particular with developments of the classic period from the 1950s to

the 1990s.

The book is arranged alphabetically by manufacturer from Allis-Chalmers to Zetor, one hundred marques in total. These are all machines to be found on British farms irrespective of their country of manufacture. Brian runs concisely through the histories of the companies and their major models, illustrated with a wealth of photographs and extracts

from sales literature. He adds some special features on items such as hydraulic systems and cold-starting aids. He includes a glossary and full index. This book replaces the author's earlier, successful, *Fifty Years of Farm Tractors*. Many of the photographs are new and the text has been brought up to date to include developments of the early twenty-first century.
