In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not

optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Special Depreciation Allowance (US Internal Revenue Service Regulation) (IRS) (2018 Edition) The Law Library presents the complete text of the Special Depreciation Allowance (US Internal Revenue Service Regulation) (IRS) (2018 Edition). Updated as of May 29, 2018

This document contains final regulations relating to the depreciation of property subject to section 168 of the Internal Revenue Code (MACRS property) and the depreciation of computer software subject to section 167. Specifically, these final regulations provide guidance regarding the additional first year depreciation allowance provided by

sections 168(k) and 1400L(b) for certain MACRS property and computer software. The regulations reflect changes to the law made by the Job Creation and Worker Assistance Act of 2002, the Jobs and Growth Tax Relief Reconciliation Act of 2003, the Working Families Tax Relief Act of 2004, the American Jobs Creation Act of 2004, and the Gulf Opportunity Zone Act of 2005. This book contains: - The complete text of the Special Depreciation Allowance (US Internal Revenue Service Regulation) (IRS) (2018 Edition) - A table of contents with the page number of each section

Although proposals for "flat" taxes have received a good deal of attention, a majority of Americans say that, for

reasons of fairness, they favor a progressive tax. The USA Tax: A Progressive Consumption Tax presents an alternative to both the present tax system and a flat tax. The USA (unlimited savings allowance) tax is a progressive consumption tax that differs fundamentally from our current tax structure in that it taxes consumption rather than income. In April 1995, the USA tax bill was introduced into the United States Senate. Whatever the fate of the bill, this book is an important contribution to the literature on the theory and design of a progressive consumption tax. The USA tax has two components—the household tax, which replaces the current household income tax, and the business tax, which replaces the corporate income tax. A

fundamental purpose of the USA tax is to raise the level of national saving and investment. It accomplishes this by making all household saving and business investment in capital goods tax-deductible. Seidman describes the ideals on which the USA tax is founded: the household component is based on the progressive personal consumption tax, and the business component is based on the consumption-type value-added tax (VAT). He then shows how the version of the USA household tax presented in the 1995 bill differs in critical aspects from the ideal of a personal consumption tax, and how it can be improved by amendments. Seidman devotes most of his book to the impact on saving, the issue of fairness, practical design options, simplification,

and a variety of questions and criticisms. The book, written in straightforward language, will help guide the non-economist through the coming debates on the USA tax.

Two tiny trilobites in a vast Cambrian ocean drift past sea cucumber parasols and a shaggy, tree-like sponge. Snail tracks loop enigmatically against

brushed-gray Silurian slate, and ghostly white crinoids feather a Devonian seascape. A delicate pterosaur flies bravely into the Jurassic gloom, while a Tyrannosaurus rex so big that its teeth fill our field of vision stalks the deep orange sands that mark the end of the Cretaceous period. These are just a few scenes from the magnificent drama that unfolds in glorious full color and three-dimensional texture in *Rock of Ages, Sands of Time*. Each of Barbara Page's 544 contiguous painted panels represents a million years of the history of life on earth, with fossil plants and animals depicted at the same scale and in association with each other just as they might be found by a paleontologist in the field. A muted rainbow of background colors evoke the rocks in

which the fossils were found—the Texas Red Beds, for instance, or the yellow Solnhofen limestone—and keystone events are shown metaphorically, with fat rolls of paint marking major extinctions or continental drift. To fully experience the awesome impact of an eon's worth of time spread across 500 feet of bas-relief panels, you'd have to visit the Museum of the Earth in Ithaca, New York, where Page's specially commissioned work will be installed when the museum opens in 2002. But this book is the next best thing. Not only does it contain crisp color reproductions of each painting, but it also includes an accessible essay from paleontologist Warren Allmon giving the scientific context behind the art. For fossil lovers of all ages, and anyone interested in the

merging of art and science, Rock of Ages, Sands of Time will be the find of a lifetime.

Rock and Brock may be twins, but they are as different as two twins can be. One day, their grandpa offers them a plan—for ten straight weeks on Saturday he will give them each one dollar. But there is a catch! "Listen now, for here's the trick, each buck you save, I'll match it quick. But spend it, there's no extra dough, so save your cash, and watch it grow." Rock is excited—there are all sorts of things he can buy for one dollar! So each week he spends his money on something different—an inflatable

moose head, green hair goo, white peppermint wax fangs. But while Rock is spending his money, Brock is saving his. And each week when Rock gets just one dollar, Brock's savings get matched. By the end of summer, Brock has five hundred and twelve dollars, while Rock has none. When Rock sees what his brother has saved, he realizes he has made a mistake. But Brock shows him that it is never too late to start saving.
