The Surprising History of African American Studies and the Crisis of Race in Higher Education M E Sharpe Incorporated
 ONE OF TIME MAGAZINE'S 100 BEST YA BOOKS OF ALL TIME • NEW YORK TIMES BESTSELLER A modern-day classic from Newbery Medalist Jerry Spinelli, this beloved celebration of individuality is now an original movie on Disney+! And don't miss the author's highly anticipated new novel, *Dead Wednesday!* Stargirl. From the day she arrives at quiet Mica High in a burst of color and sound, the hallways hum with the murmur of "Stargirl, Stargirl." She captures Leo Borlock's heart with just one smile. She sparks a school-spirit revolution with just one cheer. The students of Mica High are enchanted. At first. Then they turn on her. Stargirl is suddenly shunned for everything that makes her different, and Leo, panicked and desperate with love, urges her to become the very thing that can destroy her: normal. In this celebration of nonconformity, Newbery Medalist Jerry Spinelli weaves a tense, emotional tale about the perils of popularity and the thrill and inspiration of first love. Don't miss the sequel, *Love, Stargirl*, as well as *The Warden's Daughter*, a novel about another girl who can't help but stand out. "Spinelli is a poet of the prepubescent. . . . No writer guides his young characters, and his readers, past these pitfalls and challenges and toward their futures with more compassion." —The New York Times

Winner, 2016 Liz Carpenter Award for the Research in the History of Women, presented at the Texas State Historical Association Annual Meeting At Fair Park in Dallas, a sculpture of a Native American figure, bronze with gilded gold leaf, strains a bow before sending an arrow into flight. Tejas Warrior has welcomed thousands of visitors since the Texas Centennial Exposition opened in the 1930s. The iconic piece is instantly recognizable, yet few people know about its creator: Allie Victoria Tennant, one of a notable group of Texas artists who actively advanced regionalist art in the decades before World War II. Light Townsend Cummins follows Tennant's public career from the 1920s to the 1960s, both as an artist and as a culture-bearer, as she advanced cultural endeavors, including the arts. A true pathfinder, she helped to create and nurture art institutions that still exist today, most especially the Dallas Museum of Art, on whose board of trustees she sat for almost thirty years. Tennant also worked on behalf of other civic institutions, including the public schools, art academies, and the State Fair of Texas, where she helped create the Women's Building. Allie Victoria Tennant and the Visual Arts in Dallas sheds new light on an often overlooked artist.

The history of African American studies is often told as a heroic tale, with compelling images of black power and passionate African American students who refused to take no for an answer. Noliwe M. Rooks argues for the recognition of another story, which proves that many of the programs that survived actually began as a result of white philanthropy. With unflinching honesty, Rooks shows that the only way to create a stable future for African American studies is by confronting its complex past.

Do you sometimes feel you have to check your intellect at the church door, leaving reason behind to embrace the Christian faith? Do you hunger for a "full gospel" that includes the mind as well as heart and Spirit? Full Gospel, Fractured Minds? challenges charismatic and Pentecostal believers to discover the power of a well-maintained mind—a mind on fire—to match a heart on fire and to create a life that operates within the full counsel of God. Nañez shows how human reason helps us understand and interpret God's Word as well as defend the gospel. He shows what the Bible teaches about the mind, and explores the backgrounds of nineteenth-century and modern culture, anti-intellectualism, Pentecostal history and beliefs, and popular misconceptions about human intellect in relation to the Christian faith. Full Gospel, Fractured Minds? helps men and women practice a Christian faith that reflects the whole person and the full gospel. "Rick Nañez calls Pentecostals and charismatics to seek a balance between mind and Spirit. This book will stir you to seek all that God has for you." —From the Foreword by Stanley M. Horton, PhD

This well-researched volume explores how the Black freedom struggle and the anti-Vietnam War movement dovetailed with faculty and student activism in the South to undermine the traditional role of higher education and bring about social change. It uses the battles between students, faculty, presidents, trustees, elected officials, and funding agencies to explain how Black and White southern campuses transformed themselves into reputable academic centers. No matter the type of institution, these battles represented cracks in the edifice of the Old South and precipitated wide-ranging changes in southern higher education and society as well. This thought-provoking history offers scholars and others interested in institutional autonomy and the value of civil society a deep understanding of the central role that institutions of higher education can play in social and political change and the vital importance of independent institutions during times of national crisis. "The riveting prose and well-researched narrative tell the stories of the past while also teaching lessons for today." —Marybeth Gasman, University of Pennsylvania "A must-read for every serious student of higher education, academic freedom, free speech, civil rights, student protest, and southern history." —Robert Cohen, New York University "Takes us back to a recent period in the American South in which the suppression of speech was commonplace in government and in the routines of everyday life." —James D. Anderson, University of Illinois

For all the discussion in the media about creationism and 'Intelligent Design', virtually nothing has been said about the evidence in question - the evidence for evolution by natural selection. Yet, as this succinct and important book shows, that evidence is vast, varied, and magnificent, and drawn from many disparate fields of science. The very latest research is uncovering a stream of evidence revealing evolution in action - from the actual observation of a species splitting into two, to new fossil discoveries, to the deciphering of the evidence stored in our genome. Why Evolution is True weaves together the many threads of modern work in genetics, palaeontology, geology, molecular biology, anatomy, and development to demonstrate the 'indelible stamp' of the processes first proposed by Darwin. It is a crisp, lucid, and accessible statement that will leave no one with

Adventure was one thing, art another, but the main driver for the trip to Timbuktu was to help raise funds for research at the University of Edinburgh for FragileX. Further details can be found on the website, London to Timbuktu for Fragile X. 50 countries visited and now, along with a group of friendly individuals, I had just driven through the Sahara. With these muckers I had ventured deeply into the dark-continent. In this uncertain world there is no guarantee that you will return from any journey, large or small. Some intrepid adventurers like the Victorian, Alexander Gordon Laing, who made it all the way to Timbuktu, but sadly never made it back to his homeland of Scotland - he was slain en-route. I write this promotional e-book to introduce the e-book From Blackpool Tower to Timbuktu, (and back again). The main thing I have learnt is a guess at the scope of things that are yet to be learned - a big scope. Travelling to Timbuktu was part of that scope. A significant theme of this book is autobiography in order to describe the motive; the attempt to make art. I see no fixed issues, rather developmental journeys. I hope you glean something here and that may inspire your own endeavours and that you enjoy this promotional e-book, an introduction to the larger e-book, From Blackpool Tower to Timbuktu, (and back again). This innovative book examines cross-cultural encounters before 1492, focusing in particular on the major cross-cultural influences that transformed Asia and Europe during this period: the ancient silk roads that linked China with the Roman Empire, the spread of the world religions, and the Mongol Empire of the thirteenth century. The author's goal throughout the work is to examine the conditions--political, social, economic, or cultural--that enable one culture to influence, mix with, or suppress another. On the basis of its global analysis, the book identifies several distinctive patterns of conversion, conflict, and compromise that emerged from cross-cultural encounters. In doing so, it elucidates that larger historical context of encounters between Europeans and other peoples in modern times. *Old World Encounters* is ideal for students of world geography, religion, and civilizations.

"Miriam Pawel's fascinating book . . . illuminates the sea change in the nation's politics in the last half of the 20th century."--New York Times Book

Review California Book Award Gold Medal Winner * Finalist for the Los Angeles Times Book Prize * A Los Angeles Times Bestseller * San Francisco Chronicle's "Best Books of the Year" List * Publishers Weekly Top Ten History Books for Fall * Berkeley's Best Books of the Year * Shortlisted for NCIBA Golden Poppy Award A Pulitzer Prize-winning journalist's panoramic history of California and its impact on the nation, from the Gold Rush to Silicon Valley--told through the lens of the family dynasty that led the state for nearly a quarter century. Even in the land of reinvention, the story is exceptional: Pat Brown, the beloved father who presided over California during an era of unmatched expansion; Jerry Brown, the cerebral son who became the youngest governor in modern times--and then returned three decades later as the oldest. In *The Browns of California*, journalist and scholar Miriam Pawel weaves a narrative history that spans four generations, from August Schuckman, the Prussian immigrant who crossed the Plains in 1852 and settled on a northern California ranch, to his great-grandson Jerry Brown, who reclaimed the family homestead one hundred forty years later. Through the prism of their lives, we gain an essential understanding of California and an appreciation of its importance. The magisterial story is enhanced by dozens of striking photos, many published for the first time. This book gives new insights to those steeped in California history, offers a corrective for those who confuse stereotypes and legend for fact, and opens new vistas for readers familiar with only the sketchiest outlines of a place habitually viewed from afar with a mix of envy and awe, disdain, and fascination.
