A brand new book, FUNDAMENTALS OF CHEMICAL ENGINEERING

THERMODYNAMICS makes the abstract subject of chemical engineering thermodynamics more accessible to undergraduate students. The subject is presented through a problem-solving inductive (from specific to general) learning approach, written in a conversational and approachable manner. Suitable for either a one-semester course or two-semester sequence in the subject, this book covers thermodynamics in a

complete and mathematically rigorous manner, with an emphasis on solving practical engineering problems. The approach taken stresses problem-solving, and draws from best practice engineering teaching strategies. FUNDAMENTALS OF CHEMICAL ENGINEERING

THERMODYNAMICS uses examples to frame the importance of the material. Each topic begins with a motivational example that is investigated in context to that topic. This framing of the material is helpful to all readers, particularly to global learners who require big picture insights, and hands-on learners who struggle with abstractions. Each worked example is fully annotated with sketches and comments on the thought process behind the solved problems. Common errors are presented and explained. Extensive margin notes add to the book accessibility as well as presenting opportunities for investigation. A Global Context South Western Educational Publishing

In this haunting tale of love and learning, the existential chaos of a life ravaged by

circumstance takes on a rhythm of its own, one bound by loss and loneliness, but also an intelligent awareness of self. Sometimes melancholy, sometimes brutal, occasionally funny and infuriating, a journalist-comrade-lover caught up in the shade and shadow of politics and social injustice faces treachery and betrayal on every level. Set against the backdrop of a cityscape that taunts and tantalises, this is where love fails and passion wanes, "where suffering has no meaning", where an individual escapes death only to find himself confronted with choices wrought by remorse and retribution, by conscience and character. And yet, with all trauma, there is a distinct musicality to the lyrical unpacking that follows a string of small things ...

Classroom Studies of Religion in Africa Once a creature is extinct, it's gone for ever, isn't it? Not any more - as a butterfly from the past proves. The physicist mother of Kizzy Rye and Fraser Rye has invented an amazing time machine that can travel back into the past, snatch a plant or animal now extinct and bring it back into

the present. It's a wonderful achievement, a real scientific breakthrough. But the machine - 'Rye's Apparatus' - has a horrifying potential. Suddenly Kizzy and Fraser find themselves caught up in a terrifying spiral of events - events that lead finally to a monstrous demand from a sinister and violent organization... This book is above all an example of philosophical reflection in Africa, refuting traditional commonplaces concerning the continent. The texts comprising this

volume disprove the misconceptions that Africa has never understood itself and has never contributed to the enrichment of knowledge, the development of rational thought, philosophy, the arts, science and technology as well as civilization. For the members of the recently established network Africa In-The-World, the contributions dealing with musical rhythms, dances and the continental humanist philosophy confirm that Africanisation is a process that continues unabated to this day. The multiple and significant African contributions are often difficult to see because they have long since been adopted and integrated into the heritage of humanity. Africa In-The-World is working toward the construction of a universal humanity - one conceived in terms of a "give and take mentality." In Terms of the Road Accident Fund Act 56 of 1996 The New Law of Evidence Annotation and Commentary on the Uniform Evidence Acts A unique resource that presents 'the new law of evidence' in an accessible form. In this work, the large body of 'new law of evidence' is presented in an accessible form: that is, the law arising from the

extensive statutory revision by the Commonwealth and New South Wales in 1995, Tasmania in 2001 and Victoria in 2008. Complex statutory construction and substantive law issues receive comprehensive treatment. Differences between jurisdictions are also highlighted and discussed. Cross-referencing to relevant provisions helps to navigate around the Acts. In addition, readers may draw on numerous case examples and an alphabetical guide to the changes that the legislation has effected to common law principles. THE NEW LAW OF EVIDENCE annotates the forthcoming amendments to the Commonwealth and New South Wales Acts following the joint review and report of the Australian, New South Wales and Victorian Law Reform Commissions. Important Features: Annotations to forthcoming amendments following the review of the Australian, New South Wales' and Victorian Law Reform Commissions, a glossary guides the reader to changes that the legislation has effected to common law evidence principles, Separate section on 'Introduction to Evidence Act 2001 (Tas)'. Fundamentals of Digital and Computer Design with VHDL Berrett-Koehler Publishers

"This comparative and historical study focuses on religious aspects of disease etiologies among five, systematically selected, African peoples: the San, Maasai, Sukuma, Kongo and Yoruba. Unlike the homogenizing tendencies of many earlier comparative works by scholars of religion, this book highlights the differences between and the plurality within the religions and cultures of the selected peoples, as well as processes of change.

The work covers a period of about 100 years, from the late 19th to the late 20th century, and much of the material used comes from European mission archives. To different degrees among the peoples studied, there has been a gradual shift from an emphasis on spiritual beings such as God and ancestors to living humans like 'witches' as agents of disease. In a theoretically eclectic analysis, possible reasons for this shift are discussed."--
