The Road to Wigan Pier is Orwell's 1937 study of poverty and working-class life in northern England.

John Reynolds Gardiner's classic action-packed adventure story about a thrilling dogsled race has captivated readers for more than thirty years. Based on a Rocky Mountain legend, Stone Fox tells the story of Little Willy, who lives with his grandfather in Wyoming. When Grandfather falls ill, he is no longer able

to work the farm, which is in danger of foreclosure. Little Willy is determined to win the National Dogsled Race—the prize money would save the farm and his grandfather. But he isn't the only one who desperately wants to win. Willy and his brave dog Searchlight must face off against experienced racers, including a Native American man named Stone Fox, who has never lost a race. Exciting and heartwarming, this novel has sold millions of copies and was named a New York Times Outstanding Children's Book. *Arizona Highways Scenic Drives* Firefly Books

*On the Road* National Geographic Books  
In the 1930s, the Federal Writers' Project sent mostly anonymous writers, but also

Zora Neale Hurston and Stetson Kennedy, into the depths of Florida to reveal its splendor to the world. The FWP and the State of Florida jointly published the results as *Florida: A Guide to the Southernmost State*, which included twenty-two driving tours of the state's main roads. Eventually, after Eisenhower built the interstates, drivers bypassed the small towns that thrived along these roads in favor of making better time. Those main roads are now the state's backroads--forgotten by all but local residents, a few commuters, and dedicated road-trippers. Retracing the original routes in the Guide, Cathy Salustri rekindles our notions of paradise by bringing a modern eye to the historic travelogues. Salustri's 5,000-mile road trip reveals a patchwork quilt of Florida

cultures: startling pockets of history and environmental bliss stitched against the blight of strip malls and franchise restaurants. The journey begins on US 98, heading west toward the Florida/Alabama state line, where coastal towns dot the roadway. Here, locals depend on the tourism industry, spurred by sugar sand beaches, as well as the abundance of local seafood. On US 41, Salustri takes us past the state's only whitewater rapids, a retired carnie town, and a dazzling array of springs, swamps, and rivers interspersed with farms that produce a bounty of fruit. Along US 17, she stops for milkshakes and hamburgers at Florida's oldest diner and visits a collection of springs interconnected by underwater mazes tumbling through white spongy

limestone, before stopping in Arcadia, where men still bring cattle to auction. Desperately searching for skunk apes, the Sunshine State's version of Bigfoot, she encounters more than one gator on her way through the Everglades, Ochopee, and the Skunk Ape Research Headquarters. Following the original Guide, Salustri crisscrosses the state from the panhandle to the Keys. She guides readers through forgotten and unknown corners of the state--nude beaches, a rattlesnake cannery, Devil's Millhopper in Gainesville--as well as more familiar haunts--Kennedy Space Center and The Villages, "Florida's Friendliest Retirement Hometown." Woven through these journeys are nuggets of history, environmental debates about Florida's future, and a

narrative that combines humor with a strong affection for an oft-maligned state. Today, Salustri urges, tourists need a new nudge to get off the interstates or away from Disney in order to discover the real Florida. Her travel narrative, following what are now backroads and scenic routes, guides armchair travelers and road warriors alike to historic sites, natural wonders, and notable man-made attractions-- comparing the past views with the present landscape and commenting on the changes, some barely noticeable, others extreme, along the way.

In a profound work that pivots from the biggest questions about American history and ideals to the

most intimate concerns of a father for his son, Ta-Nehisi Coates offers a powerful new framework for understanding our nation’s history and current crisis. Americans have built an empire on the idea of “race,” a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates’s attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and

readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children’s lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear

guidelines and instructions on how to do the job right.

The travel writer Paul Theroux turns his unflinching eye on an American South too often overlooked. He finds there a

paradoxical place, full of incomparable music, unparalleled cuisine, and yet also some of the nation's worst schools, housing, and unemployment rates. On road trips spanning four seasons, wending along rural highways, Theroux visits gun shows and small-town churches, laborers in Arkansas, and parts of Mississippi where they still call the farm up the road 'the plantation.' He talks to mayors and social workers, writers and reverends, the working poor and farming families ... the unsung heroes of the south, the people who, despite it all, never left, and also those who returned home to rebuild a place they could never live without

The classic work on the evaluation of city

form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book. Deep South Farrar, Straus and Giroux A behind-the-scenes look at the making of the iconic Back to the Future trilogy—the perfect movie gift for fans of

the franchise, actors, writers, and filmmakers who contributed to this beloved pop culture phenomenon. Long before Marty McFly and Doc Brown traveled through time in a flying DeLorean, director Robert Zemeckis, and his friend and writing partner Bob Gale, worked tirelessly to break into the industry with a hit. During their journey to realize their dream, they encountered unprecedented challenges and regularly took the difficult way out. For the first time ever, the story of how these two young filmmakers struck lightning is being told by those who witnessed it. We Don't Need Roads draws from over 500 hours of interviews, including original interviews with Zemeckis, Gale, Christopher Lloyd, Lea Thompson, Huey Lewis, and over fifty others who

contributed to one of the most popular and profitable film trilogies of all time. The book includes a 16-page color photo insert with behind-the-scenes pictures, concept art, and more. With a focus not only on the movies, but also the lasting impact of the franchise and its fandom, *We Don't Need Roads* is the ultimate read for anyone who has ever wanted to ride a Hoverboard, hang from the top of a clock tower, travel through the space-time continuum, or find out what really happened to Eric Stoltz after the first six weeks of filming. So, why don't you make like a tree and get outta here—and start reading! *We Don't Need Roads* is your density. “What fun! Deeply researched and engagingly written...the book *Back to the Future* fans have been craving for decades. Geekily enthusiastic

and chock full of never-before-heard tales of what went on both on and off the screen, *We Don't Need Roads* is a book worthy of the beloved trilogy itself.”—Brian Jay Jones, author of the national bestseller *Jim Henson: The Biography* “A very compelling and enjoyable history of our trilogy. For me, reading it was like going back in time. And—Great Scott—there were even a few anecdotes that I'd never heard!”—Bob Gale, co-creator, co-producer, and co-writer of the *Back to the Future* trilogy

**Guide to Colorado Backroads & 4-Wheel Drive Trails** Vintage  
 NATIONAL BESTSELLER • WINNER OF THE PULITZER PRIZE • A searing, post-apocalyptic novel about a father and son's fight to survive, this "tale of

survival and the miracle of goodness only adds to McCarthy's stature as a living master. It's gripping, frightening and, ultimately, beautiful" (San Francisco Chronicle). A father and his son walk alone through burned America. Nothing moves in the ravaged landscape save the ash on the wind. It is cold enough to crack stones, and when the snow falls it is gray. The sky is dark. Their destination is the coast, although they don't know what, if anything, awaits them there. They have nothing; just a pistol to defend themselves against the lawless bands that stalk the road, the clothes they are wearing, a cart of scavenged food—and each other. *The Road* is the profoundly moving story of a journey. It boldly imagines a future in which no hope remains, but in which the father

and his son, "each the other's world entire," are sustained by love. Awesome in the totality of its vision, it is an unflinching meditation on the worst and the best that we are capable of: ultimate destructiveness, desperate tenacity, and the tenderness that keeps two people alive in the face of total devastation. *We Don't Need Roads* Cambridge University Press

Small-scale traders play a crucial role in forging Asian connectivity, forming networks and informal institutions separate from those driven by nation-states, such as China's Belt and Road Initiative. This ambitious study provides a unique insight into the lives of the mobile traders from Afghanistan who traverse Eurasia. Reflecting on over a decade of intensive ethnographic

fieldwork, Magnus Marsden introduces readers to a dynamic yet historically durable universe of commercial and cultural connections. Through an exploration of the traders' networks, cultural and religious identities, as well as the nodes in which they operate, Marsden emphasises their ability to navigate Eurasia's geopolitical tensions and to forge transregional routes that channel significant flows of people, resources, and ideas. Beyond the Silk Roads will interest those seeking to understand contemporary iterations of the Silk Road within the context of geopolitics in the region. This title is also available as Open Access.

Driving is a privilege and not a right. Drivers must drive responsibly and safely, obey traffic laws, and never drink and drive. Finally, make sure that you and your passengers are properly buckled up - it's the law! Today's vehicles are loaded with technology that was unheard of even a decade ago. Systems that warn when you are drifting from your lane, assist you in parallel parking, automatically brake in emergency situations and provide 360 degrees of vision around the vehicle via a camera are becoming standard, even on moderately priced vehicles. As remarkable as these leaps in automotive technology are, the truth is that the most important safety feature in any vehicle remains you as the driver. Therefore, it is to your benefit to

continue improving and expanding your knowledge of traffic laws and safe driving practices. Driving is a privilege. Once you have been issued a driver's license, you have the responsibility to continually demonstrate the skill and knowledge to drive safely. Whether you have been behind the wheel for decades or are just starting to venture out, driving is a discipline that requires judgment, knowledge, physical and mental self-awareness, and practice.
