This book concerns a
polyglot medical
manuscript, Kitab al-
Musta'ini, by Jewish
physician, Ibn Baklarish
for his Muslim patron, al-
Musta'in bi-llah (reg.
Saragossa 1085 - 1110).
Tables give properties,
uses, and names in other
languages, of over 700

medicinal substances. Latin and Romance annotations attest to Christian readers.

Early Medieval Europe 300-1000 BRILL

In this concise book, Richard Hodges and David Whitehouse review the 'Pirenne thesis' in the light of archaeological information from northern Europe, the Mediterranean and western Asia.

How 17 Molecules Changed History Museum of Fine Arts Houston
Awarded an Honorable Mention by The Eleanor

Tufts Award. The Award Committee called the book a "transformative scholarly contribution." Recently identified by the editors as the Rua Nova dos Mercadores, the principal commercial and financial street in Renaissance Lisbon, two sixteenth-century paintings, acquired by Dante Gabriel Rossetti in 1866, form the starting point for this portrait of a global city in the early modern period. Focusing on unpublished objects, and incorporating newly discovered

documents and inventories that allow novel interpretations of the Rua Nova and the goods for sale on it, these essays offer a compelling and original study of a metropolis whose reach once spanned four continents. The Rua Nova views painted by an anonymous Flemish artist portray an everyday scene on a recognizable street, with a diverse global population. This thoroughfare was the meeting point of all kinds of people, from rich to poor, slave to knight,

indigenous Portuguese to Jews and diasporic black Africans. The volume highlights the unique status of Lisbon as an entrepôt for curiosities, luxury goods and wild animals. As the Portuguese trading empire of the fifteenth and sixteenth century expanded sea-routes and networks from West Africa to India and the Far East, non-European cargoes were brought back to Renaissance Lisbon. Many rarities were earmarked for the Portuguese court, but simultaneously

exclusive items were readily available for sale on the Rua Nova, the Lisbon equivalent of Bond Street or Fifth Avenue. Specialized shops offered West African and Ceylonese ivories, raffia and Asian textiles, rock crystals, Ming porcelain, Chinese and Ryukyuan lacquerware, jewelry, precious stones, naturalia and exotic animal byproducts. Lisbon was also a hub of distribution for overseas goods to other courts and cities in Europe. The cross-cultural and artistic influences

between Lisbon and Portuguese Africa and Asia at this date will be reassessed. Lisbon was imagined as the head of empire or caput mundi, while the River Tagus became the aquatic gateway to a globally connected world. Lisbon evolved into a dynamic Atlantic port city, excelling in shipbuilding, cartography and the manufacture of naval instruments. The historian Damião de Góis bragged of the "Tagus reigning over the world". Lisbon's fame depended on its

river, an aquatic avenue that competed with the Rua Nova, providing a means of interaction, trade and communication along Lisbon's coastline. Even for the cosmopolitan Góis, who traveled extensively for the Portuguese crown, Lisbon's chaotic docks were worth describing. Of all the European cities he experienced, only Lisbon and her rival Seville could be "rightfully called Ladies and Queens of the Sea". Góis contended that they had opened up the early modern world through

circumnavigation. Lisbon was destroyed in a devastating earthquake and tsunami in November 1755. These paintings are the only large-scale vistas of Rua Nova dos Mercadores to have survived, and together with the new objects and archival sources offer a fresh and original insight into Renaissance Lisbon and its material culture. REVIEWS "This handsomely illustrated book offers a tantalising view of a vanished city that in its day, according to do Góis, "reigned over

the world." "Apollo The Global City, far more than a catalogue of beautiful things, expertly explores the contradictions between power and accumulation, commerce and art, that complicated the imperial project." "World Of Interiors "A deeply important addition to its genre." Arts of Asia March/April 2016 "[The Global City] brings the forgotten importance and contribution of a great European city to fresh attention." The Art Newspaper, April

2016 "This is modern historical inquiry at its best: clear, precise, forthcoming about problems of evidence, and relentlessly focused on its central questions...[The Global City] restores Lisbon to its rightful place as one of the most important centres in the history of the modern world." Times Literary Supplement 12 February 2016 Cultural history at its most original and sustaining." Literary Review a superbly produced and illustrated volume of essays that

examine different aspects of the other half of Crowley's story--the impact, not of Portugal on the wider world, but of the wider world on Portugal, as seen on the streets and in the houses of Renaissance Lisbon The New York Review of Books [A Movement of Protest in Roman North Africa](#) New York ; Toronto : McGraw-Hill A classic of Brazilian literary criticism and historiography, Brazil and the Dialectic of Colonization explores the unique character of Brazil

from its colonial beginnings to its emergence as a modern nation. This translation presents the thought of Alfredo Bosi, one of contemporary Brazil's leading intellectuals, to an English-speaking audience. Portugal extracted wealth from its Brazilian colony. Slaves--first indigenous peoples, later Africans--mined its ore and cut its sugarcane. From the customs of the colonists and the aspirations of the enslaved rose Brazil. Bosi scrutinizes signal points in

the creation of Brazilian culture--the plays and poetry, the sermons of missionaries and Jesuit priests, the Indian novels of José de Alencar and the Voices of Africa of poet Castro Alves. His portrait of the country's response to the pressures of colonial conformity offers a groundbreaking appraisal of Brazilian culture as it emerged from the tensions between imposed colonial control and the African and Amerindian cults--including the Catholic-influenced ones--that

resisted it. *Historical Perspectives on Native American Women* Smithsonian Institution "The Arabic language across the ages" represents a significant contribution to Arabic linguistics and philology. The book provides a variety of studies that address different aspects of the Arabic language. Some of the contributions are diachronic, focusing on the status quo of the language while others explore its history and development. It also provides text-analysis as

well as geographical-based studies. Moreover, the relationship between Arabic and other languages is underlined. More specifically, the book presents studies on Arabic dialectology (e.g., Arabic North-African dialects), morphology (e.g., The Arabic plural), lexicology and lexicography (e.g., culinary lexicon), phonetics and phonology (e.g., vocalization), syntax (e.g., the function of the particle bi-), sociolinguistics (e.g. A lexical atlas of the Arab

world), and history (e.g., dialects of Arabic before and after Classical Arabic). The present book is intended to be the first of a forthcoming series of publications on different aspects of the Arabic language, history and culture. The topics addressed offer a balanced treatment of the Arabic of today and the Arabic of the past. The book can be of great interest for linguists of Arabic, the students of Arabic as a native language or a foreign language, professors and

students at departments of Semitic studies, Islamic studies and Middle Eastern studies at all universities. It can be also of interest for scholars studying the history and culture of the Arab world. Needless to say, general linguists may find some of the linguistic issues addressed quite relevant and of universal significance (e.g., Arabic broken plural). Dialectologists and researchers interested in language varieties will, undoubtedly, find some of the studies quite

interesting since some understudied historical and current dialects of Arabic are investigated. This specific aspect of Arabic linguistics offers infinite number of research possibilities due to the diglossic relationship between Modern Standard Arabic or Classical Arabic and its various dialects as well as the rich variety of dialects spoken throughout the Arab World. The contributions presented in this book are simply eye opening, whetting our appetite for more. They

definitely demonstrate that the Arabic language is still almost a virgin field of study, providing various research ideas to pursue.

Negotiators of Change

United Nations

Despite intermittent turbulence and destruction, much of the Roman West came under barbarian control in an orderly fashion. Goths, Burgundians, and other aliens were accommodated within the provinces without disrupting the settled population or overturning

the patterns of landownership. Walter Goffart examines these arrangements and shows that they were based on the procedures of Roman taxation, rather than on those of military billeting (the so-called hospitalitas system), as has long been thought. Resident proprietors could be left in undisturbed possession of their lands because the proceeds of taxation, rather than land itself, were awarded to the barbarian troops and their leaders.

This work has been

selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America,

and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of

the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant. Approaches to Arabic Dialects Sagwan Press This is a reproduction of a book published before 1923. This book may have occasional imperfections such as missing or blurred pages, poor pictures, errant marks, etc. that were either part of the original artifact, or were introduced by the scanning process. We believe this work is culturally important, and

despite the imperfections, have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide. We appreciate your understanding of the imperfections in the preservation process, and hope you enjoy this valuable book.

Language, Religion, Culture and the Sciences

Three Continents

This is the first book to study the effects of cross-cultural contact and confrontation on frontier

societies, particularly those between England and Scotland, Wales and Ireland, Castille and Granada, and on the Elbe.

Medieval Frontier

Societies Routledge Napoleon's Buttons is the fascinating account of seventeen groups of molecules that have greatly influenced the course of history. These molecules provided the impetus for early exploration, and made possible the voyages of discovery that ensued. The molecules resulted in grand feats of engineering

and spurred advances in medicine and law; they determined what we now eat, drink, and wear. A change as small as the position of an atom can lead to enormous alterations in the properties of a substance- which, in turn, can result in great historical shifts. With lively prose and an eye for colorful and unusual details, Le Couteur and Burreson offer a novel way to understand the shaping of civilization and the workings of our contemporary world.

On the Streets of Renaissance Lisbon

Penguin

The European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways (ADN) done at Geneva on 26 May 2000 under the auspices of the United Nations Economic Commission for Europe (UNECE) and the Central Commission for Navigation on the Rhine (CCNR) has been in force since February 2008. This version has been prepared on the basis of

amendments applicable as from 1 January 2017. The Regulations annexed to the ADN contain provisions concerning dangerous substances and articles, their carriage in packages and in bulk on board inland navigation vessels or tank vessels, as well as provisions concerning the construction and operation of such vessels. They also address requirements and procedures for inspections, the issue of certificates of approval, recognition of

classification societies, monitoring, and training and examination of experts. They are harmonized to the greatest possible extent with the dangerous goods agreements for other modes of transport.

European Agreement Concerning the International Carriage of Dangerous Goods by Inland Waterways (ADN) 2017 Cornell University Press

As the wealthiest German merchant family of the sixteenth century, the Fuggers have attracted

wide scholarly attention. In contrast to the other famous merchant family of the period, the Medici of Florence, however, no English-language work on them has been available until now. The Fuggers of Augsburg offers a concise and engaging overview that builds on the latest scholarly literature and the author's own work on sixteenth-century merchant capitalism. Mark Häberlein traces the history of the family from the weaver Hans Fugger's immigration to the imperial city of Augsburg

in 1367 to the end of the Thirty Years' War in 1648. Because the Fuggers' extensive business activities involved long-distance trade, mining, state finance, and overseas ventures, the family exemplifies the meanings of globalization at the beginning of the modern age. The book also covers the political, social, and cultural roles of the Fuggers: their patronage of Renaissance artists, the founding of the largest social housing project of its time, their support of Catholicism in

a city that largely turned Protestant during the Reformation, and their rise from urban merchants to imperial counts and feudal lords. Häberlein argues that the Fuggers organized their social rise in a way that allowed them to be merchants and feudal landholders, burghers and noblemen at the same time. Their story therefore provides a window on social mobility, cultural patronage, religion, and values during the Renaissance and the Reformation.

The Abbé Constantin
Springer

This edited collection is an interdisciplinary study of gems in the early modern

world. It examines the relations between the art, science, and technology of gems, and it does so against the backdrop of an expanding global trade in gems. The eleven chapters are organised into three parts. The first part sets the scene by describing how gems moved around the early modern world, how they were set in motion, and how they were pulled together in the course of

their travels. The second part is about value. It asks why people valued gems, how they determined the value of a given gem, and how the value of a gem was connected to its perceived place of origin. The third part deals with the skills involved in cutting, polishing, and mounting gems, and how these skills were transmitted and articulated by artisans.

The common themes of all these chapters are materials, knowledge and global trade. The contributors to this volume focus on the material properties of gems such as their weight and hardness, on the knowledge involved in exchanging them and valuing them, and on the cultural consequences of the expanding trade in gems in Eurasia and the Americas.
