Announced on Thursday, the new owner of OMG Network is planning to accelerate the growth of the blockchain network and increase its adoption in 'Asia and beyond'. Moreover, GVB outlined its plans for introducing new services with its

new subsidiary, especially in the hyped area of decentralized finance (DeFi). Venture Firm Eyes DeFi after OMG Network Acquisition A network processor is an integrated circuit which has a feature set specifically targeted at the networking application domain.. Network processors are typically software programmable devices and would have generic characteristics similar to general purpose central processing units that are commonly used in many different types of equipment and products. Network processor - Wikipedia OMG Network, formerly known as OmiseGo network has been acquired by an investment company based in Hong Kong, Genesis Block. According to the announcement on 3 December, Genesis Block Ventures will work together with OMG Network to build lending and trading platforms for the DeFi sector. GBV has been an active participant in the DeFi revolution in 2020 and has built connections with different projects and exchanges like Binance and FTX, in this space.
