Providing an overview of the entire thriller genre, this book examines over 160 movies from classic Hollywood and British studios, including such essential film noir entries as "Murder, My Sweet," "The Dark Corner," "The Maltese Falcon" and "Afraid To Talk." Great cinema detectives are represented by William Powell (all six of his Thin Man pictures are detailed and discussed), Basil Rathbone (Sherlock Holmes), Warner Oland (Charlie Chan), Sidney Toler (Charlie Chan), Peter Ustinov (Hercule Poirot), Margaret Rutherford (all four of her Miss Marple films are covered), and others including the Saint, the Falcon, Bulldog Drummond and Philo Vance. From director Alfred Hitchcock comes "Notorious," "Saboteur," "Number 17" and "Rich and Strange." A few comedies and spoofs, such as "Satan Met a Lady" (an amazing re-make of the original "Maltese Falcon" with Bette Davis

and Warren William) and "Who Done It?" (with Abbott and Costello) round out the survey.

For more than two decades, the concept of student engagement has grown from simple attention in class to a construct comprised of cognitive, emotional, and behavioral components that embody and further develop motivation for learning. Similarly, the goals of student engagement have evolved from dropout prevention to improved outcomes for lifelong learning. This robust expansion has led to numerous lines of research across disciplines and are brought together clearly and comprehensively in the Handbook of Research on Student Engagement. The Handbook guides readers through the field's rich history, sorts out its component constructs, and identifies knowledge gaps to be filled by future research. Grounding data in real-world learning situations, contributors analyze indicators and facilitators of student engagement, link engagement to motivation, and gauge the impact of family, peers, and teachers on engagement in elementary and secondary grades. Findings on the effectiveness of classroom interventions are discussed in detail. And because assessing engagement is still a relatively new endeavor, chapters on measurement methods and issues round out this important resource. Topical areas addressed in the Handbook include: Engagement across developmental stages. Self-efficacy in the

engaged learner. Parental and social influences on engagement and achievement motivation. The engaging nature of teaching for competency development. The relationship between engagement and high-risk behavior in adolescents. Comparing methods for measuring student engagement. An essential guide to the expanding knowledge base, the Handbook of Research on Student Engagement serves as a valuable resource for researchers, scientist-practitioners, and graduate students in such varied fields as clinical child and school psychology, educational psychology, public health, teaching and teacher education, social work, and educational policy.

Military analyst Michael O'Hanlon shows how outside forces could successfully intervene to stop an ongoing cycle of warfare in a country whose government has collapsed or come under severe internal challenge. Based largely on recent U.S. experiences in Panama, Somalia, Bosnia, and elsewhere, as well as on U.S. military doctrine and information from the Pentagon's training and simulation centers, the book discusses the steps in an intervention and estimates likely casualties and costs. O'Hanlon shows that modern Western militaries are capable of executing these types of operations with high proficiency. While conditions

are unlikely to resemble those of Desert Storm, which allowed the U.S. and allies to take full advantage of modern technology, top-notch militaries have advantages in infantry combat situations—night-vision equipment, attack and transport helicopters, counterartillery radars—that would enable them to establish order and prevail in any firefights. O'Hanlon warns that operations as casualty-free as those in Haiti and, to date, in Bosnia would be unlikely. Moreover, the political framework that outside powers would attempt to employ in establishing a new order would be critical: if intervening forces are seen as taking sides or occupying territory without legitimacy, they could meet protracted guerrilla-style resistance of the types witnessed in Vietnam, Afghanistan, and Somalia.
