Beyond Collective Memory analyzes how two African places became icons of collective memory for certain publics, yet remain marginal to national and continental memory discourses. Thiaroye, a Senegalese location of colonial-era massacre, and District Six, a South African neighborhood destroyed under apartheid, have epitomized a shared "memory" of racist violence and resistant community. Analyzing diverse cultural texts surrounding both places,

this book argues that the metaphor of collective memory has obscured the structural character of colonial and apartheid violence, and made it difficult to explore the complicit positions that structures of violence produce. In investigating the elisions of memory discourses, *Beyond Collective Memory* challenges the dominance of collective memory, and calls attention to the African pasts, metaphors, and imaginaries that exist beyond it.

In Search of History V&R unipress GmbH In Honest Patriots,

renowned public theologian and ethicist Donald W. Shriver, Jr. argues that we must acknowledge and repent of the morally negative events in our nation's past. The failure to do so skews the relations of many Americans to one another, breeds ongoing hostility, and damages the health of our society. Yet our civic identity today largely rests on denials, forgetfulness, and inattention to the memories of neighbors whose ancestors suffered great injustices at the hands of some dominant majority. Shriver contends that repentance for these injustices must find a place in our political culture. Such repentance must be carefully and deliberately cultivated through the accurate teaching of history, by means of public symbols that embody both positive and negative memory, and through public leadership to this end. Religious people and religious organizations have an important role to play in this process. Historically, the Christian tradition has concentrated on the personal dimensions of forgiveness and repentance to the near-total neglect of their collective aspects.

Recently, however, the idea of collective moral responsibility has gained new and public visibility. Official apologies for past collective injustice have multiplied, along with calls for reparations. Shriver looks in detail at the examples of Germany and South Africa, and their pioneering efforts to foster and express collective repentance. He then turns to the historic wrongs perpetrated against African Americans and Native Americans and to recent efforts by American citizens and governmental bodies to seek public justice by remembering public injustice. The call for collective repentance presents many challenges: What can it mean to morally master a past whose victims are dead and whose sufferings cannot be alleviated? What are the measures that lend substance to language and action expressing repentance? What symbolic and tangible acts produce credible turns away from past wrongs? What are the dynamics-psychological, social, and political-whereby we can safely consign an evil to the past? How can public life witness to corporate

crimes of the past in such a way that descendants of victims can be confident that they will never be repeated? In his provocative answers to these questions Shriver creates a compelling new vision of the collective repentance and apology that must precede real progress in relations between the races in this country.

History for the IB Diploma Paper 3 European States in the Interwar Years (1918-1939) Cambridge University Press

The teaching of history in South African and Japanese schools has attracted sustained criticism for the alleged attempts to conceal the controversial aspects of their countries' past and to inculcate ideologies favourable to the ruling regimes. This book is the first attempt to systematically compare the ways in which education bureaucracy in both nations dealt with opposition and critics in the period from ca. 1945 to 1995, when both countries were dominated by single-party governments for most of the fifty years. The author argues that both South African and Japanese education bureaucracy did not overtly express its intentions in the curriculum documents or in the textbooks, but found ways to enhance its authority through a range of often subtle measures. A total of eight themes in 60 officially approved Standard 6 South African and Japanese middle-school history textbooks

have been selected to demonstrate the changes and continuity. This work contributes to the existing literature of comparative history by drawing lessons that would probably not have emerged from the study of either country by itself.

Whether we are carrying out routine life behaviors, trying to pray, or conversing with others, the way our minds work significantly impacts how well we function. But many times we may feel like our mind has a mind of its own. -- You fall into bed exhausted at the end of the day, craving a good night's sleep, only to have your mind race in a million directions. -- Prayer is an exercise in futility, full of distractions and wandering thoughts. - - In the midst of a conversation, you suddenly realize you haven't heard a word the other person has said.-- You arrive at a destination with no recollection of how you got there. These all-too-common occurrences are examples of how our minds can seem to be completely out of our control. We end up merely going through the motions day after day, feeling anxious and preoccupied. But it doesn't have to be that way. Dr. Greg Bottaro explains how mindfulness can help us become aware of the present moment and accept it.

Catholic mindfulness is a way to practically trust God more in our lives. Instead of separating faith from day-to-day life, mindfulness helps bridge the gap so we can feel the sense of safety and peace God intends us to have. Following the simple exercises in this book, you'll discover how mindfulness can help you be more present to everything in your life from a trip to the grocery store or relaxing with friends to listening more attentively to a homily or meditating on the mysteries of the Rosary.
