Curious about the world of obstetrics and gynecology? Want to know why a future doctor would want to specialize in gynecology? Or perhaps you'd just like a peek behind the curtain, so to speak -- and to hear some OBGYN secrets. If you're intrigued by any of these topics, or just want to know about women's health from an OBGYN who tells it like it is, this book is for you. "Confessions of a Male Gynecologist" reveals not only what your gynecologist is thinking when your feet are in the stirrups, but provides women with some frank advice. Dr. Bellanger provides readers with an education, gets on his high horse, and shares some unbelievable (and in many cases), "laugh-out-loud" stories. Here's what readers have to say ... "... full of insights you had no idea you wanted to know." "... informational, educational, and at times downright hysterical" "... answers all the questions you've ever had about your gynecologist" "... an entertaining experience." "... an insightful look into the complexity and realities of not only women's health, but the state of our health care system today."

"Gardening is the most basic of languages, the labor from which we're all born and nourished. . . ." In these pages, we travel the country with Debra Landwehr Engle as she visits 20 gardens and gardeners from California to Maine and Minnesota to Arkansas, showing us that grassroots campaigns actually can and do involve roots--and seeds and garden trowels. That any person with a steadfast resolve and an open patch of dirt can help bridge the gap between multinational refugees. That lush vegetation and running water and cool stones can help spark the fading memories of our elderly. And that our children can learn about where food comes from, labyrinths, wetlands systems, and healing from grief and loss just by digging in the earth with a caring adult hand to guide them. As the stories in this remarkable collection demonstrate, the simplest act of gardening can produce significant changes in the lives of people we might never even meet. Consider the man who sends seedlings and greenhouses halfway around the world to feed hospital patients, or the immigrant woman who began selling her own flowers as a way to raise money for overseas charities, or the couple who offers their land as a midday retreat for the residents of nearby nursing homes. These acts and others are not heroic--or even unusual--as Ms. Engle tells us. We see ourselves in these uplifting tales from the garden, as they inspire us to transform our own little parts of the world into places of greater peace, repose, play, and healing. For gardeners, community activists, and those who understand the spiritual value of putting a spade in the soil, these stories capture the promise renewed each time we plant a seed and give us fresh ideas for changing the world, one garden at a time.

**NEW YORK TIMES BESTSELLER** • The extraordinary story of the World War II air, land, and sea campaign that brought the U.S. Navy to the apex of its strength and marked the rise of the United States as a global superpower Winner, Commodore John Barry Book Award, Navy League of the United States • Winner, John Lehman Distinguished Naval Historian Award, Naval Order of the United States With its thunderous assault on the Mariana Islands in June 1944, the United States crossed the threshold of total war. In this tour de force of dramatic storytelling, distilled from extensive research in newly discovered primary sources, James D. Hornfischer brings to life the campaign that was the fulcrum of the drive to compel Tokyo to surrender—and that forever changed the art of modern war. With a close focus on high commanders, front-line combatants, and ordinary people, American and Japanese alike, Hornfischer tells the story of the climactic end of the Pacific War as has never been done before. Here are the epic seaborne invasions of Saipan, Tinian, and Guam, the stunning aerial battles of the Great Marianas Turkey Shoot, the first large-scale use of Navy underwater demolition teams, the largest banzai attack of the war, and the daring combat operations large and small that made possible the strategic bombing offensive culminating in the atomic strikes on Hiroshima and Nagasaki. From the seas of the Central Pacific to the shores of Japan itself, *The Fleet at Flood Tide* is a stirring, authoritative, and cinematic portrayal of World War II's world-changing finale. Illustrated with original maps and more than 120 dramatic photographs "Quite simply, popular and scholarly military history at its best."—Victor Davis Hanson, author of *Carnage and Culture* "The dean of World War II naval history . . . Author and industry insider Paul Morley explores the musical and cultural legacies left behind by "The Man Who Fell to Earth." Respected arts commentator and author Paul Morley, an artistic advisor to the curators of the highly successful retrospective exhibition David Bowie is for the Victoria & Albert Museum in London, constructs a definitive story of Bowie that explores how he worked, played, aged, structured his ideas, influenced others, invented the future, and entered history as someone who could and would never be forgotten. Morley captures the greatest moments from across Bowie's life and career; how young Davie Jones of South London became the international David Bowie; his pioneering collaborations in the recording studio with the likes of Tony Visconti, Mick Ronson, and Brian Eno; to iconic live, film, theatre, and television performances from the 1970s, 80s, and 90s, as well as the various encounters and artistic relationships he developed with musicians from John Lennon, Lou Reed, and Iggy Pop to Trent Reznor and Arcade Fire. And of course, discusses in detail his much-heralded and critically acclaimed finale with the release of *Blackstar* just days before his shocking death in New York. Morley offers a startling biographical critique of David Bowie's legacy, showing how he never stayed still even when he withdrew from the spotlight, how he always knew his own worth, and released a dazzling plethora of personalities, concepts, and works into the world with a single-minded determination and a voluptuous imagination to create something the likes of which the world had never seen before—and likely will never see again.

"Modern Arab Art provides a historical and theoretical overview of the forces that have spawned artistic movements across the Middle East from the 1940s through today. Nada Shabout recognizes the important distinction between Arabic art and Islamic art, and views them as overlapping rather than synonymous subjects. Based on interviews with Arab artists, reviews of Arabic resources, and visits to sites and galleries in the Arab world, Shabout provides an introduction to a field that has been long neglected. With particular emphasis on production, reception, and the intersection between art and politics in Iraq and Palestine, she reveals the fallacy in Western fascination with Arab art as a timeless and exotic 'other'."—Jacket.

"A literary tour de force that is destined to become one of the . . . definitive works about the battle for Guadalcanal . . . [James D.] Hornfischer deftly captures the essence of the most pivotal naval campaign of the Pacific war."—*San Antonio Express-News* *The Battle of Guadalcanal* has long been heralded as a Marine victory. Now, with his powerful portrait of the Navy's sacrifice, James D. Hornfischer tells for the first time the full story of the men who fought in destroyers, cruisers, and battleships in the narrow, deadly waters of "Ironbottom Sound." Here, in stunning cinematic detail, are the seven major naval actions that began in August 1942, a time when the war seemed unwinnable and America fought on a shoestring, with the outcome always in doubt. Working from new interviews with survivors, unpublished eyewitness accounts, and newly available documents, Hornfischer paints a vivid picture of the officers and enlisted men who opposed the Japanese in America's hour of need. The first major work on this subject in almost two decades, *Neptune's Inferno* does what all great battle narratives do: It tells the gripping human stories behind the momentous events and critical decisions that altered the course of history and shaped so many lives. Praise for *Neptune's Inferno* "Vivid and engaging . . . extremely readable, comprehensive and thoroughly researched."—Ronald Spector, *The Wall Street Journal* "Superlative storytelling . . . the masterwork on the long-neglected topic of World War II's surface ship combat."—Richard B. Frank, *World War II* "The author's two previous World War II books . . . thrust him into the major leagues of American military history writers. *Neptune's Inferno* is solid proof he deserves to be there."—*The Dallas Morning News* "Outstanding . . . The author's narrative gifts and excellent choice of detail give an almost Homeric quality to the men who met on the sea in steel titans."—Booklist (starred review) "Brilliant . . . a compelling narrative of naval combat . . . simply superb."—*The Washington Times*

Of the many good gifts the Lord has given his church on earth, none exceeds that of his love. The things of this earth are temporary, but "love never ends" (1 Cor. 13:8)—it is a present taste of future glory, made available through communion with the Holy Spirit. In this classic work, *Heaven Is a World of Love*, New England pastor Jonathan Edwards encourages Christians struggling through the imperfect life here on earth to experience the perfect love of God through an exposition of the biblical foundations for the cause of God's love, the objects of God's love, the enjoyment of God's love, and the fruits of God's love. Each page of pastoral insight will leave readers hungry to experience more of God.

Work occupies a pivotal role in the daily activities and over the course of a lifetime of members of modern societies. In anticipation, work influences education and training; it has much to do with shaping current earned income and status in the community; and in retrospect, it influences retirement income and activities. It is a powerful force affecting personal associations. In our society work is deeply encased in moral and religious values: As Poor Richard says, A Life of Leisure and a Life of Laziness are two Things. Do you imagine that Sloth will afford you more Comfort than Labour? No, for as Poor Richard says: ... Industry gives Comfort, and Plenty and Respect. Study to show thyself approved unto God a workman that needeth not to be ashamed. But few words have as many different meanings and nuances as "work": to forge or to shape, to stir or to knead, to solve, to exploit, to practice trickery for some end, to excite or to provoke, to persuade or to influence, to toil, and the like. A need for precision in meaning is requisite with respect to work, not only in common discourse, but, even more so, in scholarly communication.

In 2001, Kenneth Deffeyes made a grim prediction: world oil production would reach a peak within the next decade—and there was nothing anyone could do to stop it. Deffeyes's claim echoed the work of geophysicist M. King Hubbert, who in 1956 predicted that U.S. oil production would reach its highest level in the early 1970s. Though roundly criticized by oil experts and economists, Hubbert's prediction came true in 1970. In this updated edition of *Hubbert's Peak*, Deffeyes explains the crisis that few now deny we are headed toward. Using geology and economics, he shows how everything from the rising price of groceries to the subprime mortgage crisis has been exacerbated by the shrinking supply—and growing price—of oil. Although there is no easy solution to these problems, Deffeyes argues that the first step is understanding the trouble that we are in.
