*Leadership in American Academic Geography* University of Chicago Press  
 Why does the Christian walk often feel like an ongoing struggle and why does God's creation include imperfection, let alone forces that are intent on thwarting God's creative work? In seeking a response to these questions, this book argues that the biblical accounts describe creation in terms of a progressive transformation process whereby the initially incomplete created order will reach perfection only in the fulfillment of new creation. The following discussion then outlines a comprehensive framework for the biblical theology of humanity's struggles, centered on three key themes: corporeal temptation, deficient social structures, and the much-debated notion of spiritual warfare. The book presents an overarching canonical narrative that threads together a series of diverse biblical topics, from Job's temptation to the Atonement. The final part surveys biblical teaching on how human conduct can be aligned with God's creative purpose, and discusses three "assignments" from Jesus

to believers: to celebrate the Eucharist, to pray the Lord's Prayer, and to fulfill the Great Commission.

*How Maps Restrict and Control* University of Chicago Press  
 For more than thirty years, the History of Cartography Project has charted the course for scholarship on cartography, bringing together research from a variety of disciplines on the creation, dissemination, and use of maps. Volume 6, *Cartography in the Twentieth Century*, continues this tradition with a groundbreaking survey of the century just ended and a new full-color, encyclopedic format. The twentieth century is a pivotal period in map history. The transition from paper to digital formats led to previously unimaginable dynamic and interactive maps. Geographic information systems radically altered cartographic institutions and reduced the skill required to create maps. Satellite positioning and mobile communications revolutionized wayfinding. Mapping evolved as an important tool for coping with complexity, organizing knowledge, and influencing public opinion in all parts of the globe and at all levels of society. Volume 6 covers these changes comprehensively, while thoroughly demonstrating the far-reaching effects of maps on science, technology, and society—and vice versa. The lavishly produced volume includes more than five hundred articles accompanied by

more than a thousand images. Hundreds of expert contributors provide both original research, often based on their own participation in the developments they describe, and interpretations of larger trends in cartography. Designed for use by both scholars and the general public, this definitive volume is a reference work of first resort for all who study and love maps. Hybrid Rule and State Formation Routledge

In the global North the commoditization of creativity and knowledge under the banner of a creative economy is being posed as the post-industrial answer to dependency on labour and natural resources. Not only does it promise a more stable and sustainable future, but an economy focused on intellectual property is more environmentally friendly, so it is suggested. *Contested Powers* argues that the fixes being offered by this model are bluffs; development as witnessed in Latin American energy politics and governance remains hindered by a global division of labour and nature that puts the capacity for technological advancement in private hands. The authors call for a multi-layered understanding of sovereignty, arguing that it holds the key to undermining rigid accounts of the relationship between carbon and democracy, energy and development, and energy and political expression. Furthermore, a critical focus on energy politics is crucial to wider debates on development and sustainability. *Contested Powers* is essential reading for those wondering how energy resources are converted into political power and why we still value the energy we take from our surroundings more than the means of its extraction.

Robot Theology Cambridge University Press

Some maps help us find our way; others restrict where we go and what we do. These maps control behavior, regulating activities from flying to fishing, prohibiting students from one part of town from being schooled on the other, and banishing certain individuals and industries to the periphery. This restrictive cartography has boomed in recent decades as governments seek regulate activities as diverse as hiking, building a residence, opening a store, locating a chemical plant, or painting your house anything but regulation colors. It is this aspect of mapping—its power to prohibit—that celebrated geographer Mark Monmonier tackles in *No Dig, No Fly, No Go*. Rooted in ancient Egypt's need to reestablish property boundaries following the annual retreat of the Nile's floodwaters, restrictive mapping has been indispensable in settling the American West, claiming slices of Antarctica, protecting fragile ocean fisheries, and keeping sex offenders away from playgrounds. But it has also been used for opprobrium: during one of the darkest moments in American history, cartographic exclusion orders helped send thousands of Japanese Americans to remote detention camps. Tracing the power of prohibitive mapping at multiple levels—from regional to international—and multiple dimensions—from property to cyberspace—Monmonier demonstrates how much boundaries influence our experience—from homeownership and voting to taxation and airline travel. A worthy successor to his critically acclaimed *How to Lie with Maps*, the book is replete with all of the hallmarks of a Monmonier classic, including the wry observations and witty humor. In the end, Monmonier looks far beyond the lines on the page to observe that mapped boundaries, however persuasive their appearance, are not always as permanent and impermeable as their cartographic lines might suggest. Written for anyone who votes, owns a home, or aspires to be an informed citizen, *No Dig, No Fly, No Go* will change the way we look at maps forever.

A Critical Appraisal of Modern and Postmodern Approaches to Scripture Zed Books Ltd.

The descent of Jesus Christ to the dead has been a fundamental tenet of the Christian faith, as indicated by its inclusion in both

the Apostles' and Athanasian Creeds. But it has also been the subject of suspicion and scrutiny, especially from evangelicals. Led by the mystery and wonder of Holy Saturday, Matthew Emerson offers an exploration of the biblical, historical, theological, and practical implications of the descent.

Examining the Martyrdom Accounts of the Closest Followers of Jesus Routledge

The CQ Press Guide to U.S. Elections is a comprehensive, two-volume reference providing information on the U.S. electoral process, in-depth analysis on specific political eras and issues, and everything in between. Thoroughly revised and infused with new data, analysis, and discussion of issues relating to elections through 2014, the Guide will include chapters on: Analysis of the campaigns for presidency, from the primaries through the general election Data on the candidates, winners/losers, and election returns Details on congressional and gubernatorial contests supplemented with vast historical data. Key Features include: Tables, boxes and figures interspersed throughout each chapter Data on campaigns, election methods, and results Complete lists of House and Senate leaders Links to election-related websites A guide to party abbreviations

Issues and Debates CQ Press

The World of the American West is an innovative collection of original essays that brings the world of the American West to life, and conveys the distinctiveness of this diverse, constantly changing region. Twenty scholars incorporate the freshest research in the field to take the history of the American West out of its timeworn "Cowboys and Indians" stereotype right up into the major issues being discussed today, from water rights to the presence of the defense industry. Other topics covered in this heavily illustrated, highly accessible volume include the effects of leisure and tourism, western women, politics and politicians, Native Americans in the twentieth century, and of course, oil. With insight both informative and unexpected, *The World of the American West* offers perspectives on the latest developments affecting the modern American West, providing essential reading for all scholars and students of the field so that they may better understand the vibrant history of this globally significant, ever-evolving region of North America.

The Fate of the Apostles AOSIS

This collected work, written primarily by practical theologians, reflects on the phenomenon of corruption in the liberal democracy of post-apartheid South Africa. Liberal democracy has considerable salience in the contemporary world. Not only is it the form that many of the world's most powerful and influential nations approve of, but it is a political system that has been tried – and used – by many developing countries. South Africa is described as predominantly Christian, and in such a context corruption should not be expected. However, it is strongly prevalent and undermines the values of both democracy and Christianity. Not only does corruption promote a general lack of trust in institutions and leadership, but it stimulates a perpetual culture of corruption that invades all spheres of life. The book suggests strategies for redressing the current 'culture of corruption'. Although the chapters represent different perspectives, the shared objective is to emphasise that corruption is unethical, as well as to describe and explain why it is taking place and how the situation should appear. The explanation focuses on the negative consequence of corruption: it does not respect human dignity or the 'otherness' of others; it exacerbates poverty; it weakens religious values and norms; and it is not conducive to social cohesion in the country. The authors also share the theological premise that God is present in this world. In the kingdom of God, believers are encouraged to participate in the 'clean-up' process which includes combating

the phenomenon of corruption.

*Transformations in a City and Its Region* Wipf and Stock Publishers

How do we make sense of Ezekiel 40–48? Ezekiel's temple vision has long mystified Bible readers and scholars. Is this a temple that is going to be built in the future? Or is this merely symbolic? Why so many details? Is there any relevance to this section of the Old Testament at all? This book addresses these important questions, showing how Ezekiel's temple is more than just symbolic. Yet its ultimate fulfillment is not in any physical building, but, according to the New Testament, in Jesus and the new heavens and new earth. Not only will this book illuminate Ezekiel 40–48 for you, it will also help you understand important issues of interpretation in our day, such as typology, the role of the temple in biblical theology, and the New Testament use of the Old Testament. You will learn that yes, in fact, Ezekiel 40–48 is very relevant to the Bible's storyline.

*Progressive Creation and the Struggles of Humanity in the Bible* Routledge

A fully revised and updated new edition of the classic history of western America The newly revised second edition of this concise, engaging, and unorthodox history of America's West has been updated to incorporate new research, including recent scholarship on Native American lives and cultures. An ideal text for course work, it presents the West as both frontier and region, examining the clashing of different cultures and ethnic groups that occurred in the western territories from the first Columbian contacts between Native Americans and Europeans up to the end of the twentieth century.

**The History of Cartography, Volume 6** Encounter Books  
Isaiah 7:14 is one of the most debated verses in all of Scripture. Scholars from all backgrounds have provided countless works on the interpretation of this one verse. Yet, there is no decisive material that confirms exactly what the verse means. The implications of this one verse carry into prophecy, biblical inspiration, biblical infallibility, and numerous other issues. This book analyzes the way the writers of the Old Testament used the Hebrew word 'ot, which is often translated "sign." The author then takes that information and discusses the implications of that usage regarding Isaiah 7:14. For example, in some instances, the word referred to miraculous events. In others, it may have referred to something symbolic. Throughout the work, the writer analyzes various aspects of the usage of the word and seeks to determine if there is a relevant pattern to apply to the way the word is used in Isaiah 7:14.

*Why Place Matters* B&H Publishing Group

What is the relationship between artificial intelligence, robots, and theology? The connections are much closer than one might think. There is a deep spiritual longing in the world of AI and robotics. Technology is a prayer; it reveals the depth of our eschatology. Through the study of AI and robotic literature one can see a clear desire to both transcend human limitations and overcome the fallenness of human nature. The questions of ethics, power, and responsibility are not new to Christian anthropology. This book will introduce and examine some of the major ethical issues surrounding current AI and robotic technology from a theological and philosophical lens. In the study of AI and robot ethics, the Christian community has a chance to join the global efforts to build technology for good. Will we join them?

*Do Historical Matters Matter to Faith?* Taylor & Francis

Examines how public attitudes toward the exploration and the commemorations have changed from the Lewis and Clark Exposition in 1905 to the Lewis and Clark Trail in 1978 and the bicentennial from 2003-2007.

**YHWH Is There** Zondervan

In an effort to explain why housing remains among the United States' most enduring social problems, *Housing America* explores five of the U.S.'s most fundamental, recurrent issues in housing its population: affordability of housing, homelessness, segregation and discrimination in the housing market, homeownership and home financing, and planning. It describes these issues in detail, why they should be considered problems, the history and fundamental social debates surrounding them, and the past, current, and possible policy solutions to address them. While this book focuses on the major problems we face as a society in housing our population, it is also about the choices we make about what is valued in our society in our attempts to solve them. *Housing America* is appropriate for courses in urban studies, urban planning, and housing policy.

*National Union Catalog* Wipf and Stock Publishers

A detailed study of the history of African Americans in a small upstate New York city from the days of the Underground Railroad to the deindustrialization of the 1980s. *Blacks in Niagara Falls* narrates and analyzes the history of Black Niagarans from the days of the Underground Railroad to the Age of Urban Renewal. Michael B. Boston details how Black Niagarans found themselves on the margins of society from the earliest days to how they came together as a community to proactively fight and struggle to obtain an equal share of society's opportunities. Boston explores how Blacks came to Niagara Falls in increasing numbers usually in search of economic opportunities, later establishing essential institutions, such as churches and community centers, which manifested and reinforced their values, and interacted with the broader community, seeking an equitable share of other society opportunities. This singular examination of a small city significantly contributes to Urban History and African American Studies scholarly research, which generally focuses on large cities. Combining primary source data with extensive interviews gathered over an eighteen-year period in which the author immersed himself in the Niagara community, *Blacks in Niagara Falls* offers an insightful study of how one small city community grew over its unique history. Michael B. Boston is Associate Professor of African and African American Studies at the College at Brockport, State University of New York. He is the author of *The Business Strategy of Booker T. Washington: Its Development and Implementation* and *Dr. Skinner's Remarkable School for Colored Deaf, Dumb, and Blind Children 1857–1860*.

*The Gospel of John : 2 Volumes* InterVarsity Press

Based on the John 3:16 Conference of 2008, this book presents essays that offer an alternative to Calvinism in regard to understanding how God works in salvation.

*The Hebrew Word for 'sign' and its Impact on Isaiah 7:14* Springer Nature

*Grasping God's Word* has proven itself in classrooms across the country as an invaluable help to students who want to learn how to read, interpret, and apply the Bible for themselves. The third edition, revised based on feedback from professors, will continue to serve college-level students and lay learners well in their quest to gain a firm grasp on the rock of God's word. Old Testament scholar J. Daniel Hays and New Testament expert J. Scott Duvall provide practical, hands-on exercises to guide students through the interpretive process. To emphasize the Bible's redemptive arc and encourage correlation across the biblical canon, the authors have included a call to "Consult the biblical map. How does a theological principle fit with the rest of the Bible?" as an additional step in the Interpretive Journey. This edition has also been rearranged for clarity and includes updated illustrations, appendices, bibliography, and assignments. A robust suite of learning aids is available for purchase to be used alongside the

textbook to help students excel in their studies. These include a workbook, video lectures for each chapter featuring the authors, and a laminated quick study sheet with key concepts from the book.

**Neutrality, Opening or Closure?** Routledge

Contemporary American society, with its emphasis on mobility and economic progress, all too often loses sight of the importance of a sense of “place” and community. Appreciating place is essential for building the strong local communities that cultivate civic engagement, public leadership, and many of the other goods that contribute to a flourishing human life. Do we, in losing our places, lose the crucial basis for healthy and resilient individual identity, and for the cultivation of public virtues? For one can’t be a citizen without being a citizen of some place in particular; one isn’t a citizen of a motel. And if these dangers are real and present ones, are there ways that intelligent public policy can begin to address them constructively, by means of reasonable and democratic innovations that are likely to attract wide public support? *Why Place Matters* takes these concerns seriously, and its contributors seek to discover how, given the American people as they are, and American economic and social life as it now exists—and not as those things can be imagined to be in some utopian scheme—we can find means of fostering a richer and more sustaining way of life. The book is an anthology of essays exploring the contemporary problems of place and placelessness in American society. The book includes contributions from distinguished scholars and writers such as poet Dana Gioia (former chairman of the National Endowment for the Arts), geographer Yi-Fu Tuan, urbanist Witold Rybczynski, architect Philip Bess, essayists Christine Rosen and Ari Schulman, philosopher Roger Scruton, transportation planner Gary Toth, and historians Russell Jacoby and Joseph Amato.

*The Role of Jewish Feasts in John's Gospel* Wipf and Stock Publishers

Neoliberalism has been the reigning ideology of our era. For the past four decades, almost every real-world event of any consequence has been traced to the supposedly omnipresent influence of neoliberalism. Instead, this book argues that states

across the world have actually grown in scope and reach. The authors in this volume contest the view that the past three decades have been marked by the diminution of the state in the face of neoliberalism. They argue instead that we are witnessing a new phase of state formation, which revolves around hybrid rule—that is, a more expansive form of state formation that works through privatization and seeks pacification and depoliticization as instrumental to enhancing state power. Contributors argue that the process of hybridization, and hybrid rule point towards a convergence on a more authoritarian capitalist regime type, possibly, but not necessarily, more closely aligned with the Beijing model—one toward which even the United States, with its penchant for surveillance and discipline, appears to be moving. This volume will shed new light on evolving public-private relations, and the changing nature of power and political authority in the 21st century and will be of interest to students and scholars of IPE, international relations and political theory.

**Toronto** Yale University Press

The *Book of Martyrs* by John Foxe written in the 16th century has long been the go-to source for studying the lives and martyrdom of the apostles. Whilst other scholars have written individual treatments on the more prominent apostles such as Peter, Paul, John, and James, there is little published information on the other apostles. In *The Fate of the Apostles*, Sean McDowell offers a comprehensive, reasoned, historical analysis of the fate of the twelve disciples of Jesus along with the apostles Paul, and James. McDowell assesses the evidence for each apostle’s martyrdom as well as determining its significance to the reliability of their testimony. The question of the fate of the apostles also gets to the heart of the reliability of the kerygma: did the apostles really believe Jesus appeared to them after his death, or did they fabricate the entire story? How reliable are the resurrection accounts? The willingness of the apostles to die for their faith is a popular argument in resurrection studies and McDowell offers insightful scholarly analysis of this argument to break new ground within the spheres of New Testament studies, Church History, and apologetics.
