The Oxford Handbooks series is a major new initiative in academic publishing. Each volume offers an authoritative and state-of-the-art survey of current thinking and research in a particular subject area. Specially commissioned essays from leading international figures in the discipline give critical examinations of the progress and direction of debates. Oxford Handbooks provide scholars and graduate students with compelling new perspectives upon a wide range of subjects in the humanities and social sciences. The Oxford Handbook of International Investment Law aims to provide the first truly exhaustive account of the current state and future development of this important and topical field of international law. The Handbook is divided into three main parts. Part One deals with fundamental conceptual

issues, Part Two deals with the main substantive areas of law, and Part Three deals with the major procedural issues arising out of the settlement of international investment disputes. The book has a policy-oriented introduction, setting the more technical chapters that follow in their policy environment within which contemporary norms for international foreign investment law are evolving. The Handbook concludes with a chapter written by the editors to highlight the major conclusions of the collection, to identify trends in the existing law, and to look forward to the future development of this field.

The Oxford Handbook of Criminal Law reflects the continued transformation of criminal law into a global discipline, providing scholars with a comprehensive international resource, a common point of entry into cutting edge contemporary research and a snapshot of the state and scope of the field. To this end, the Handbook takes a broad approach to its subject matter, disciplinarily, geographically, and systematically. Its contributors include current and future research leaders representing a variety of legal systems, methodologies, areas of expertise, and research agendas. The Handbook is divided into four parts: Approaches & Methods (I), Systems & Methods (II), Aspects & Issues (III), and Contexts & Comparisons (IV). Part I includes essays exploring various methodological approaches to criminal law (such as criminology, feminist studies, and history). Part II provides an overview of systems or models of criminal law, laying the foundation for further inquiry into specific conceptions of criminal law as well as for comparative analysis (such as Islamic,

Marxist, and military law). Part III covers the three aspects of the penal process: the definition of norms and principles of liability (substantive criminal law), along with a less detailed treatment of the imposition of norms (criminal procedure) and the infliction of sanctions (prison or corrections law). Contributors consider the basic topics traditionally addressed in scholarship on the general and special parts of the substantive criminal law (such as jurisdiction, mens rea, justifications, and excuses). Part IV places criminal law in context, both domestically and transnationally, by exploring the contrasts between criminal law and other species of law and state power and by investigating criminal law's place in the projects of comparative law, transnational, and international law.

The Oxford Handbook of Transnational Law offers a unique and unparalleled treatment and presentation in the field of Transnational Law that has become one of the most intriguing and innovative developments in legal doctrine, scholarship, theory, and practice today. This in itself constitutes an ambitious editorial project, not only within law and legal doctrine, but also with regard to an increasing interest in an interdisciplinary engagement of law with social sciences - including sociology, anthropology, political science, geography, and political theory. Closely tied into the substantive transformation that many legal fields are undergoing is the observation that many of these developments are driven by changes in an increasingly global legal practice today. The concept then, of 'transnational law' aims at capturing the distinctly border-crossing nature even of those legal fields which had for the longest been time been seen as having merely 'domestic' relevance. This shift also requires a conscious effort among law school classroom instructors, casebook authors, and curriculum reformers to adapt their teaching content to these circumstances. As the

authors of this Handbook make clear, this adaptation requires a close dialogue between a scholarly investigation into the transnational 'concept of law' and the challenges faced by practicing lawyers, be that as solicitor, in-house counsel, as judges, or as bureaucrats in a globalized regulatory and socio-economic environment. While the main thrust is on the transnationalization of legal doctrine and legal theory, with a considerable contribution from and engagement with social sciences, the Handbook features numerous reflections on the relationship between transnational law and legal practice.

Featuring specially commissioned chapters from experts in the field of media and communications law, this book provides an authoritative survey of media law from a comparative perspective. The handbook does not simply offer a synopsis of the state of affairs in media law jurisprudence, rather it provides a better understanding of the forces that generate media rules, norms, and standards against the background of major transformations in the way information is mediated as a result of democratization, economic development, cultural change, globalization and technological innovation. The book addresses a range of issues including: Media Law and Evolving Concepts of Democracy Network neutrality and traffic management Public Service Broadcasting in Europe Interception of Communication and Surveillance in Russia State secrets, leaks and the media A variety of rule-making

institutions are considered, including administrative, and judicial entities within and outside government, but also entities such as associations and corporations that generate binding rules. The book assesses the emerging role of supranational economic and political groupings as well as non-Western models, such as China and India, where cultural attitudes toward media freedoms are often very different.
