There's almost nothing in the modern home that can delight us more than an intelligently organized, nicely featured closet—a place where things are organized in pleasing geometry, here we can find and retrieve that perfect tie or that just-right sweater, instantly. And there's nothing more disheartening and irritating than that murky closet from the netherworld, where boxes tumble down on our heads whenever the door opens, where the sheer clutter makes it impossible to identify what's inside, much less retrieve the item you need. Consumer desperation is why entire companies have sprung up devoted to closet organizing—it's the reason homeowners sometimes spend literally thousands of dollars to have a custom closet organizer designed and installed. Or, they can buy this book and do it themselves for a fraction of the cost. Today, virtually all the materials and hardware used by custom closet fabricators is available to consumers on the racks of home centers and hardware stores. *Build Your Own Custom Closet* is the first book to show consumers all the inside tips on designing a custom closet, and how to install it using materials they can buy themselves. This is the book that will lift readers from closet purgatory into the heaven of the well-organized closet—without selling their souls.

No buts: discover the addictive joy of raising goats. Goats are amazing, multi-talented creatures that have been domesticated for over 10,000 years. As well as being a source of food, clothes, and milk, they're wonderful companions: cute, intelligent, and playful—and often as friendly and attentive as dogs. In addition, they make endearing noises and—according to ancient Ethiopian legend—discovered coffee. So what's holding you back? The new edition of *Raising Goats For Dummies* rebuts all your excuses, and shows you why having one—or, actually, a few—of these companionable ruminants (cud-chewing animals) in your life will bring you great joy, and, if you choose, unbeatable homemade milk and cheese—and possibly a cozy new sweater. A happy goat aficionado since 1998, Cheryl K. Smith takes you from the grassroots of raising your goat—choosing and buying the breed you want, building and maintaining goat-friendly housing—to more elevated terrain, including how to build your own milk stand, participate in online goat shows (it's a thing!), and even monetize your goat. You'll also learn the fundamentals of proper care to make sure your goats are fed, kept healthy, and bred in ways that ensure they have the happiest life you can provide. Study the history and breeds of goat, like the Nigerian Dwarf or Pygmy Live sustainably from and even profit from your goat. Identify and alleviate common ailments. Have fun raising the

kids! Whether you're researching buying a goat or learning on the hoof about the ones you have, this book has everything you need to see why getting your goat will bring years and years of joy.

In Santa's Christmas village at the North Pole, the elves celebrate special days all year round. Apart from Christmas, though, nothing is more exciting to a scout elf than a birthday—and elves celebrate birthdays with a tradition that goes back thousands of years. Now, at the request of children from around the world, Santa has given his scout elves special permission to share that birthday tradition with the families they love. An elf cannot come to a celebration, though, unless it is invited.

The Low-Tech, No-Grow-Lights Approach to Abundant Harvest Year-Round Indoor Salad Gardening offers good news: with nothing more than a cupboard and a windowsill, you can grow all the fresh salad greens you need for the winter months (or throughout the entire year) with no lights, no pumps, and no greenhouse. Longtime gardener Peter Burke was tired of the growing season ending with the first frost, but due to his busy work schedule and family life, didn't have the time or interest in high-input grow lights or greenhouses. Most techniques for growing what are commonly referred to as "microgreens" left him feeling overwhelmed and uninterested. There had to be a simpler way

to grow greens for his family indoors. After some research and diligent experimenting, Burke discovered he was right—there was a way! And it was even easier than he ever could have hoped, and the greens more nutrient packed. He didn't even need a south-facing window, and he already had most of the needed supplies just sitting in his pantry. The result: healthy, homegrown salad greens at a fraction of the cost of buying them at the market. The secret: start them in the dark. Growing "Soil Sprouts"—Burke's own descriptive term for sprouted seeds grown in soil as opposed to in jars—employs a method that encourages a long stem without expansive roots, and provides delicious salad greens in just seven to ten days, way earlier than any other method, with much less work. Indeed, of all the ways to grow immature greens, this is the easiest and most productive technique. Forget about grow lights and heat lamps! This book is a revolutionary and inviting guide for both first-time and experienced gardeners in rural or urban environments. All you need is a windowsill or two. In fact, Burke has grown up to six pounds of greens per day using just the windowsills in his kitchen! Year-Round Indoor Salad Gardening offers detailed step-by-step instructions to mastering this method (hint: it's impossible not to succeed, it's so easy!), tools and accessories to have on hand, seeds and greens varieties, soil and compost, trays and planters, shelving, harvest and storage, recipes, scaling up to serve local markets, and much more.
