"A brilliant debut novel full of romance and heartbreak, that pulls tight at your heartstrings and ensnares you with magical prose and lyrical beauty." 1900 - Annabelle yearns for nothing more than motherhood and her duty to provide an heir to devoted husband Richard Hardwick, successor to a wealthy family fortune. Her younger sister Emily, engaged to Lance Corporal James Wright, imagines only wedded bliss, but as darkness falls in the shape of War, James is deployed to South Africa, leaving her alone with an uncertain future. As melancholy festers, Emily escapes taking solace by the sea. As the distance stretches between the sisters, so too does the life-thread of family. 1997 - As her 21st birthday approaches, April reluctantly moves closer to her Grandmother Sarah, to her mother's childhood home of Bury St Edmunds, in the heart of the Suffolk countryside. As she struggles to adjust, pining for her seaside upbringing, she takes solace in the bond she shares with her grandmother. In a visit to the attic one December afternoon, she discovers more than just dusty tea chests and old suitcases. She encounters an ancestor that has remained, a ghostly apparition whispering secrets in the shadows. Confronted with visions and dreams; memories of a lost time, grave secrets, sisterly love, romance and family loyalties that stretch beyond even love's limits. April is thrown into turmoil, living moments in two eras, experiencing love and loss in both. Piecing together snippets of another life, giving peace back to the house and laying ghosts to rest; she unfolds the mystery of her family's Supernatural legacy.

Across the realms of multimedia production, information design, web development, and usability, certain truisms are apparent. Like an Art of War for design, this slim volume contains guidance, inspiration, and reassurance for all those who labor with the user in mind. If you work on the web, in print, or in film or video, this book can help. If you know someone working on the creative arena, this makes a great gift. Funny, too.

Conventional chronologies of world history concentrate on the reigns of kings and queens, the dates of battles and treaties, the publication dates of great books, the completion of famous buildings, the deaths of iconic figures, and the years of major discoveries. But there are other more interesting stories to tell-- stories that don't usually get into the history books, but which can nevertheless bring the past vividly and excitingly to life. Imagine a history lesson that spares you the details of such seminal events as the 11th-century papal-imperial conflict, that fails to say much at all about the 1815 Congress of Vienna--and that neglects entirely to mention the world-changing moment that was the 1521 Diet of Worms. Imagine instead a book that tells you the date of the ancient Roman law that made it legal to break wind at banquets; the name of the defunct medieval pope whose putrefying corpse was subjected to the humiliation of a trial before a court of law; the identity of the priapic monarch who sired more bastards than any other king of England; and last but not least the date of the demise in London of the first goat to have circumnavigated the globe twice. Imagine a book crammed with such deliciously disposable information, and you have *History without the Boring Bits*. By turns bizarre, surprising, trivial, and enlightening, *History without the Boring Bits* offers rich pickings for the browser, and entertainment and inspiration aplenty for those who have grown weary of more conventional works of history.

Our lives are spent watching the clock. We go to sleep by it. Wake up to it. Rely on it. Race it. It's easy to forget that we're only given so much. We ignore it because we're convinced we'll always have more. I am proof that we aren't promised anything. The clock owes us nothing. I know this because not only was Time my name, I wasn't given enough of it. Sure I had challenges but I vowed to make the most of it, of my young life. My limitations wouldn't hold me back. Time was on my side. Then I was told otherwise. Now the clock was working against me. I would face this disease alone. Then he walked in and changed everything. He gave me a reason to fight. He helped me prepare. Like others before me, when time slowed I wasn't ready. I begged for more. But the clock, it stopped for no one. On the day my world went black, I refused to take him with me. Only he didn't listen. I was a doctor. A bringer of bad news. I read the chart. She was fucked. My hands, they were tied. I was a doctor who could not heal what was beyond that door. I had no hope to offer her. But I wanted this over with. The sooner the better. I walked in, looked up and saw color. Not one. All of them. They surrounded her. She was a patient. You did not cross that line. I would not cross that line. I should have kept my eyes closed. Life was easier when you didn't see. But they were open now. They saw her. They saw everything. Suddenly invisible lines ceased to matter. For me, Time mattered. How far would you go to

make sure the one you loved had enough of it? Would you challenge the clock? Help them prepare? Could you watch them suffer? Could you accept a life without them in it? Or, would you follow them into the darkness? I did. This is our story.

Small print edition 5x8 Starkishia: Estrella is a story about a little girl who grew up too fast to feel the grass wear thin under the soles of her shoes. Abuse thickened her skin, yet her nightmares were as dark as they were real. The library became her sanctuary where stories took her to another place and time. But, in reality there was nothing imaginary about the bruises under her clothing as she advanced from one classroom to another during middle school, or nothing fictitious about being molested by the maggot hands of a despicable relative. Her plight was hidden in a small town in Georgia, just as her physical abuse was disregarded by the school's social worker. This colored child was brought into this world by her 14 year old mother who was ruthlessly dominated by her husband. Starkishia loved her mother above all else; her step-father who provided shelter for them witnessed her birth and helped raise her. She consumed pieces of joy, but sometimes she received broken reprisals and ended up walking down the dark road alone; yet in some fortunate way humanity was always within reach. After her parents split up, Starkishia and her family ended up in Texas. Single parenthood changed their family structure forevermore. Starkishia became a wage earner at age 13; she also became homeless the following year. She was, for years, engulfed by her impoverished and dysfunctional environment. She married a native of Mexico a few days after her 15th birthday. He nicknamed her 'Estrella' a Spanish term which means 'Star.' It goes without saying that Starkishia was born in the land of opportunity, but it was not exactly within her reach. Yes, she was her grandmother's star, but she was a statistic of minimal proportions as far as small town and suburbia America was concerned. Shortly after marriage, she became a mother. Afterward the life of this teen went downhill at lightning speed. Many readers will identify with her; for, she walked away from her husband broken hearted; then, she fell in love with another man,

and as new babies arrived, she took her limited funds and focused on the lives of those under her roof; in time, her parental absence to her oldest two children turned flat out into abandonment. Have mercy! Starkishia was a lost teen, but through grace she eventually became a productive woman in American society. Meredith Etc., a small press, proudly introduces readers to Starkishia: Estrella, a story about the perils of teen parenthood, economic dispossession, and the charity of new beginnings. There are many theories about what caused the Great Depression, and the truth is that there is no simple answer. Rather, a perfect storm of events came together and changed the lives of millions of people. One of the first signs of this dark period was the stock market crash in October 1929. In the aftermath, the country fell into the Great Depression, the longest and most significant economic depression since the Civil War. Through most of the 1920s, the United States economy was growing, and the stock market had reached new highs. People were making money in the stock market and having a grand time, so much so that few noticed the dark clouds forming on the horizon. By the end of the decade, industrial production had begun to decline, while unemployment was steadily rising. Stock market prices were

plummeting from their peak in September 1929, and sales reached a crescendo in late October. On October 29, over sixteen million shares were traded in just one day. Billions of dollars were lost, with thousands of investors wiped out, and stock tickers were running hours behind because they were simply unequipped to manage this unprecedented amount of trading. The crash was not the only cause of the Great Depression, but it was certainly a symptom of a larger set of problems. Earlier in 1929, Herbert Hoover won the presidency under a wealth and prosperity platform. He made several unsuccessful attempts to prevent the economy from weakening during his administration. Despite his best efforts, banks continued to fail, and more Americans entered the ranks of unemployment. No one understood the extent of this economic downturn. But the election of 1932 brought Democrat Franklin D. Roosevelt into the White House by a landslide. Roosevelt wasted no time, proposing extensive legislation called the New Deal to create new jobs, revitalize the banks, and give hope to the American people. Some of the New Deal programs were successful, while other fell short; but by the end of the 1930s, things had finally begun to improve. However, it would take the massive spending required during World War II for the economy to return to where it was a decade before. Ah, Deutschland.... As you can imagine, there's far more to Germany than beer and pretzels. For starters, citizens. Obviously, they're responsible for a considerable chunk of the GDP. (Gross domestic pretzels. Cheap joke, I know.) And, surprisingly, these days, remarkably few Germans live in gingerbread trilevels. No, they've got world-class cities like Berlin and Munich to call home, not to mention castle country along the Rhine. I could go on and on, but it'd be easier to read the book. Alright, just a taste. I Don't Like To Fly is a collection of stories and observations torn from the pages of Adam's travel journals. In it, you'll experience such classic sights as Oktoberfest, the Cologne Cathedral, and Berlin's Checkpoint Charlie—all through his very American eyes.

Winner • 2021 An Post Irish Book Award — Nonfiction Book of the Year • from the judges: "The most remarkable Irish nonfiction book I've read in the last 10 years"; "[A] book for the ages." "We Don't Know Ourselves is a feast: a deeply absorbing chronicle of the 'known and unknowable,' and of the profound transformation of a place." —Patrick Radden Keefe, New York Times best-selling author of Say Nothing: A True Story of Murder and Memory in Northern Ireland A celebrated Irish writer's magisterial, brilliantly insightful chronicle of the wrenching transformations that dragged his homeland into the modern world. Fintan O'Toole was born in the year the revolution began. It was 1958, and the Irish government—in despair, because all the young people were leaving—opened the country to foreign investment and popular culture. So began a decades-long, ongoing experiment with Irish national identity. In *We Don't Know Ourselves*, O'Toole, one of the Anglophone world's most consummate stylists, weaves his own experiences into Irish social, cultural, and economic change, showing how Ireland, in just one lifetime, has gone from a reactionary "backwater" to an almost totally open society—perhaps the most astonishing national transformation in modern history. Born to a working-class family in the Dublin suburbs, O'Toole served as an altar boy and attended a Christian Brothers school, much as his forebears did. He was enthralled by American Westerns suddenly appearing on Irish television, which were not that far from his own experience, given that Ireland's main export was beef and it was still not unknown for herds of cattle to clatter down Dublin's streets. Yet the Westerns were a sign of what was to come. O'Toole narrates the once unthinkable collapse of the all-powerful Catholic Church, brought down by scandal and by the activism of ordinary Irish, women in particular. He relates the horrific violence of the Troubles in Northern

Ireland, which led most Irish to reject violent nationalism. In O'Toole's telling, America became a lodestar, from John F. Kennedy's 1963 visit, when the soon-to-be martyred American president was welcomed as a native son, to the emergence of the Irish technology sector in the late 1990s, driven by American

corporations, which set Ireland on the path toward particular disaster during the 2008 financial crisis. A remarkably compassionate yet exacting observer, O'Toole in coruscating prose captures the peculiar Irish habit of "deliberate unknowing,"

which allowed myths of national greatness to persist even as the foundations were crumbling. Forty years in the making, *We Don't Know Ourselves* is a landmark work, a memoir and a national history that ultimately reveals how the two modes are entwined for all of us.
