Between 1949 and 1997, Hong Kong transformed from a struggling British colonial outpost into a global financial capital. Made in Hong Kong delivers a new narrative of this metamorphosis, revealing Hong Kong both as a critical engine in the expansion and remaking of postwar global capitalism and as the linchpin of Sino-U.S. trade since the 1970s. Peter E. Hamilton explores the role of an overlooked transnational Chinese elite who fled to Hong Kong amid war and revolution.

Despite losing material possessions, these industrialists, bankers, academics, and other professionals retained crucial connections to the United States. They used these relationships to enmesh themselves and Hong Kong with the U.S. through commercial ties and higher education. By the 1960s, Hong Kong had become a manufacturing powerhouse supplying American consumers, and by the 1970s it was the world's largest sender of foreign students to American colleges and universities. Hong Kong's reorientation toward U.S. international leadership enabled its transplanted Chinese elites to benefit from expanding American influence in Asia and positioned them to act as shepherds to China's reengagement with global capitalism. After China's reforms accelerated under Deng Xiaoping, Hong Kong became a crucial node for China's export-driven development, connecting Chinese labor with the U.S. market. Analyzing untapped archival sources from around the world, this book demonstrates why we cannot understand postwar globalization, China's economic rise, or today's Sino-U.S. trade relationship without centering Hong Kong.

Geopolitical Economy Pearson Higher Ed

Why have countries increasingly restricted immigration even when they have opened their markets to foreign competition through trade or allowed their firms to move jobs overseas? In *Trading Barriers*, Margaret Peters argues that the increased ability of firms to produce anywhere in the world combined with growing international competition due to lowered trade barriers has led to greater limits on immigration. Peters explains that businesses relying on low-skill labor have been the major proponents of greater openness to immigrants. Immigration helps lower costs, making these businesses more competitive at home and abroad. However, increased international competition, due to lower trade barriers and greater economic development in the developing world, has led many businesses in wealthy countries to close or move overseas. Productivity increases have allowed those firms that have chosen to remain behind to do more with fewer workers. Together, these changes in the international economy have sapped the crucial business support necessary for more open immigration policies at home, empowered anti-immigrant groups, and spurred greater controls on migration. Debunking the commonly held belief that domestic social concerns are the deciding factor in determining immigration policy, *Trading Barriers* demonstrates the important and influential role played by international trade and capital movements.

For a century, economists have driven forward the cause of globalization in financial institutions, labour markets, and trade. Yet there have been consistent warning signs that a global economy and free trade might not always be advantageous. Where are the pressure points? What could be done about them? Dani Rodrik examines the back-story from its seventeenth-century origins through the milestones of the gold standard, the Bretton Woods Agreement, and the Washington Consensus, to the present day. Although economic globalization has enabled unprecedented levels of prosperity in advanced countries and has been a boon to hundreds of millions of poor workers in China and elsewhere in Asia, it is a concept that rests on shaky pillars, he contends. Its long-term sustainability is not a given. The heart of Rodrik's argument is a fundamental 'trilemma': that we cannot simultaneously pursue democracy, national self-determination, and economic globalization. Give too much power to governments, and you have protectionism. Give markets too much freedom, and you have an unstable world economy with little social and political support from those it is supposed to help. Rodrik argues for smart globalization, not maximum globalization.

We live amid increasing ethical plurality and fragmentation while at the same time more and more questions of moral gravity confront us. Some of these questions are new, such as those around human cloning and genetics. Other questions that were previously settled have re-emerged, such as those around the place of religion in politics. Responses to such questions are diverse, numerous and often vehemently contested. Hospitality as Holiness seeks to address the underlying question facing the church within contemporary moral debates: how should Christians relate to their neighbours when ethical disputes arise? The problems the book examines centre on what the nature and basis of Christian moral thought and action is, and in the contemporary context, whether moral disputes may be resolved with those who do not share the same framework as Christians. Bretherton establishes a model - that of hospitality - for how Christians and non-Christians can relate

to each other amid moral diversity. This book will appeal to those interested in the broad question of the relationship between reason, tradition, natural law and revelation in theology, and more specifically to those engaged with questions about plurality, tolerance and ethical conflict in Christian ethics and medical ethics.

Translation and Globalization is essential reading for anyone with an interest in translation, or a concern for the future of our world's languages and cultures. This is a critical exploration of the ways in which radical changes to the world economy have affected contemporary translation. The Internet, new technology, machine translation and the emergence of a worldwide, multi-million dollar translation industry have dramatically altered the complex relationship between translators, language and power. In this book, Michael Cronin looks at the changing geography of translation practice and offers new ways of understanding the role of the translator in globalized societies and economies. Drawing on examples and case-studies from Europe, Africa, Asia, and the Americas, the author argues that translation is central to debates about language and cultural identity, and shows why consideration of the role of translation and translators is a necessary part of safeguarding and promoting linguistic and cultural diversity.

Geopolitical Economy radically reinterprets the historical evolution of the world order, as a multi-polar world emerges from the dust of the financial and economic crisis. Radhika Desai offers a radical critique of the theories of US hegemony, globalisation and empire which dominate academic international political economy and international relations, revealing their ideological origins in successive failed US attempts at world dominance through the dollar. Desai revitalizes revolutionary intellectual traditions which combine class and national perspectives on 'the relations of producing nations'. At a time of global upheavals and profound shifts in the distribution of world power, Geopolitical Economy forges a vivid and compelling account of the historical processes which are shaping the contemporary international order.

Bourdieu's Secret Admirer in the Caucasus Pearson Higher Ed

Bourdieu's Secret Admirer in the Caucasus is a gripping account of the developmental dynamics involved in the collapse of Soviet socialism. Fusing a narrative of human agency to his critical discussion of structural forces, Georgi M. Derluguian reconstructs from firsthand accounts the life story of Musa Shanib—who from a small town in the Caucasus grew to be a prominent leader in the Chechen revolution. In his examination of Shanib and his keen interest in the sociology of Pierre Bourdieu, Derluguian discerns how and why this dissident intellectual became a nationalist warlord. Exploring globalization, democratization, ethnic identity, and international terrorism, Derluguian contextualizes Shanib's personal trajectory from de-Stalinization through the nationalist rebellions of the 1990s, to the recent rise in Islamic militancy. He masterfully reveals not only how external economic and political forces affect the former Soviet republics but how those forces are in turn shaped by the individuals, institutions, ethnicities, and social networks that make up those societies. Drawing on the work of Charles Tilly, Immanuel Wallerstein, and, of course, Bourdieu, Derluguian's explanation of the recent ethnic wars and terrorist acts in Russia succeeds in illuminating the role of human agency in shaping history.
