General Anatomy - E-book Jaypee Brothers Medical Publishers Pvt. Limited

This book is primarily designed for undergraduate medical and dental students. Also, it is an authoritative reference source for postgraduates and practicing neurologists and neurosurgeons. All chapters revised and updated, including details on cranial nerves and their lesions, blood supply and cerebrovascular accidents, motor and sensory disorders. new line diagrams, and real life photographs and MRI scans. Simple, to-the-point, easy-to-understand exam-oriented text Numerous, four coloured, large sized, and easy-to-draw diagrams Text provides unique problem based clinical and functional perspective

Inderbir Singh's Textbook of Anatomy Jaypee Brothers Medical Publishers

Printed throughout in full colour. Short descriptions of each figure in the colour Atlas now appear alongside it. Atlas figures have been repeated in the text chapters wherever necessary. Matters

of detail are now clearly demarcated from the main text.

Textbook of Human Neuroanatomy (Fundamental and Clinical) Jaypee Brothers, Medical Publishers Pvt. Limited

This is an exceptional textbook on embryology with 3-dimension illustrations drawn to create a life-like effect in understanding the intricacies of developing human structure. This text focuses on clinical cases with clinical facts. With concise text, the highlights of the book include flowcharts, tables, summary (examination guide), boxes, interesting facts, electron micrographs, clinical cases, special topics, MCQs and viva-voce questions.

Textbook of Clinical Neuroanatomy Wife Goes On

There are several classic atlases of human anatomy available to the student, with excellent illustrations. However in most cases they are the work of an artist, seeking to present each detail to be seen in the field of view. And such drawings may not be useful to the uninitiated student of anatomy. An anatomy student needs illustrations that give a clear depiction of the layout of individual structures, unobscured by detail that detracts from the main relationships within those structures. Such illustrations can be produced only by a very close collaboration of artist and anatomist and better still if the anatomist himself draws them.

This atlas is the result of Dr. Singh's life time's work as both anatomist and artist.

Textbook of Anatomy Jaypee Brothers Medical Publishers Pvt. Limited

This new edition of Jaypee's well established "Colour Atlas and Practical Guide" has been enriched by the addition of a large number of new photomicrographs of human tissues. The text has been updated and the layout redesigned. Slides are arranged in groups based on similarity of appearance to aid accurate identification and extensive new material on the spinal cord and cerebral cortex is included.

Textbook of Anatomy Elsevier Health Sciences

Textbook of Anatomy is divided into three volumes, with volume one on upper and lower extremities, volume two on thorax, abdomen and pelvis and volume three on head, neck and central nervous system. Written for both undergraduate and postgraduate students, the text is presented in an easy to understand format, with detailed explanations of clinical correlations of anatomical structures. Each volume contains numerous high quality illustrations and tables to enhance learning, as well as supplementary free online access to a colour atlas, review questions and answers and self assessment of pictures.

Inderbir Singh's Textbook of Anatomy Jaypee Brothers Medical Publishers

This is a system-based textbook which means that it deals with anatomy system-by-system (eg cardiovascular system, central nervous system). As well as the subject index, the textbook contains a regional index to make it relevant also to students following regional anatomy courses.

Inderbir Singh's Textbook of Human Histology With Colour Atlas and Practical Guide John Wiley & Sons

Thoroughly updated to reflect all of the latest concepts and advances in the field, this concise, extensively illustrated text presents the basic science and clinical application of cellular and molecular biology. Functioning as a combined text and atlas, it is essentially two books for the price of one providing a comprehensive, visually engaging histology education from the ground up. Illustrations, tables, chapter summaries and multiple choice questions facilitate comprehension of concepts, and clinical correlations underscore the practical relevance of the material. Superb illustrations—including photomicrographs, electron micrographs, schematic diagrams and drawings—provide a visual grasp and easier retention of difficult concepts. Clinical correlations throughout the text demonstrate clinical applications and reinforce the idea that histology is pertinent not only to pathology and physiology, but in fact comprises one of the essential bases of clinical practice. New! "Pathological Considerations" section at the end of each chapter. Helpful tables provide an at-a-glance summary statement of key points. Bolded key terms, bulleted lists and chapter summaries emphasize the "need to know" information in every chapter. A combination of USMLE-style questions and image based questions in each chapter.

Inderbir Singh's Textbook of Human Osteology Anshan Pub

This new edition has been fully revised to provide undergraduate medical students with the latest information on human embryology. Beginning with an introduction to the topic, the following chapters guide students step by step through the complete process of human development. Presented in an easy to read format, the tenth edition includes numerous images and illustrations and a 'Timetable of Events' at the end of each chapter summarises the developmental processes described in that section. The accompanying CD ROM reiterates the key learning points in the book. Key points Fully revised, new edition

presenting latest information on human embryology 'Timetable of Events' in each chapter summarises developmental processes Includes CD highlighting key learning points Previous edition published in 2012

Textbook of Anatomy Jaypee Brothers Publishers

Inderbir Singh's Textbook of Anatomy is the latest edition of this comprehensive, illustrated, three volume guide to human anatomy. This edition includes fully revised and updated content, with current clinical advances. - The first volume includes a new, expanded chapter on general anatomy and further sections on upper and lower limb. - The second volume covers the anatomy of the thorax, abdomen and pelvis. - The third volume covers the head and neck, central nervous system, and anatomy in genetics. This new edition of Inderbir Singh's Textbook of Anatomy is enhanced by over 900 full colour images and illustrations across its three volumes. Other improvements include frequently asked questions at the beginning of every chapter, and dissections new to this edition highlighted in red throughout the books. Brand new clinical correlations with full explanations have been highlighted in orange and other colour coded information boxes are included throughout. Each chapter ends with MCQs and questions based on clinical cases to improve clinical problem solving. This extensive yet practical textbook is invaluable for medical undergraduates and general physicians wishing to update their knowledge of anatomy. Key Points New edition of three volume guide to human anatomy Previous edition published August 2011 (9789350253816/9789350253823/9789350253830) Over 900 full colour images and illustrations throughout Highlighted boxes for new dissections and clinical correlations FAQs and MCQS at start and end of every chapter

Inderbir Singh's Textbook of Human Histology JP Medical Ltd

Concise, step by step guide to osteology of the human skull for dental students, with section on muscle attachments in the head and neck.

TEXTBOOK OF HUMAN EMBRYOLOGY WITH CLINICAL CASES AND 3D ILLUSTRATIONS Jaypee Brothers Medical Publishers

Fully revised, new edition presenting undergraduates with latest information in human histology. Includes colour atlas of more than 80 slides, histological plates and a new section on light microbiology. Previous edition published in 2014.

Inderbir Singh's Textbook of Human Histology Jaypee Brothers Medical Publishers

Textbook of Anatomy is divided into three volumes, with volume one on upper and lower extremities, volume two on thorax, abdomen and pelvis and volume three on head, neck and central nervous system. Written for both undergraduate and postgraduate students, the text is presented in an easy to understand format, with detailed explanations of clinical correlations of anatomical structures. Each volume contains numerous high quality illustrations and tables to enhance learning, as well as supplementary free online access to a colour atlas, review questions and answers and self assessment of pictures.

A Textbook of Neuroanatomy Elsevier Health Sciences

Osteology is the study of the structure and function of the skeleton and bony structures. This new edition is a comprehensive guide to human osteology for postgraduate medical students. Beginning with an introduction to the skeletal system, the following chapters cover bones in different anatomical regions - upper and lower limb, sternum and ribs, vertebral column, head and neck, and skull. Chapters are followed by numerous images illustrating muscle attachments. The fourth edition has been fully revised to provide students with the latest information in the field. Highly illustrated with nearly

500 clinical photographs and diagrams, the book also includes questions and answers to help students prepare for examinations. Key points Fully revised, new edition providing latest information in field of osteology Covers bones and muscle attachments in each anatomical region Highly illustrated with clinical photographs and diagrams Previous edition (9788184483000) published in 2008

Textbook of Anatomy is divided into three volumes, with volume one on upper and lower extremities, volume two on thorax, abdomen and pelvis and volume three on head, neck and central nervous system. Written for both undergraduate and postgraduate students, the text is presented in an easy to understand format, with detailed explanations of clinical correlations of anatomical structures. Each volume contains numerous high quality illustrations and tables to enhance learning, as well as supplementary free online access to a colour atlas, review questions and answers and self assessment of pictures.

Textbook of Human Osteology Jaypee Brothers, Medical Publishers Pvt. Limited

Newly revised and updated, A Textbook of Neuroanatomy, Second Edition is a concise text designed to help students easily master the anatomy and basic physiology of the nervous system. Accessible and clear, the book highlights interrelationships between systems, structures, and the rest of the body as the chapters move through the various regions of the brain. Building on the solid foundation of the first edition, A Textbook of Neuroanatomy now includes two new chapters on the brainstem and reflexes, as well as dozens of new micrographs illustrating key structures. Throughout the book the clinical relevance of the material is emphasized through clinical cases, questions, and follow-up discussions in each chapter, motivating students to learn the information. A companion website is also available, featuring study aids and artwork from the book as PowerPoint slides. A Textbook of Neuroanatomy, Second Edition is an invaluable resource for students of general, clinical and behavioral neuroscience and neuroanatomy.

Textbook of Human Histology with Colour Atlas Jaypee Brothers, Medical Publishers Pvt. Limited

This book is designed for undergraduate medical and dental students. The present updated edition is an illustrated account of microscopic structures of tissues and organs in a simple and precise language. The text is extremely student-friendly. - Concise, point-wise presentation of text for easy learning and quick recapitulation during exams - Line diagrams for basic understanding of the tissues/organs - Pencil sketches of sections (haematoxylin & eosin stained) along with salient points of identification, well integrated with text for understanding technical details of structures at the backdrop of theory - Practicals comprising excellent quality large sized microphotographs at the end of the theory with detailed explanations of what students are expected to observe - Clinical

correlation of certain important structures - Self-assessment exercise at the end of each chapter for revision of the topics studied

Textbook of Human Neuroanatomy Jaypee Brothers Medical Publishers Pvt. Limited

The seventh edition of Inderbir Singh's Textbook of Human Histology has been fully revised to provide undergraduate and postgraduate medical students with the most recent developments in the field. The book begins with a colour atlas presenting more than 80 slides providing an overview of histology and a quick revision aid. Each of the following chapters discusses the histology of different parts of the body. Each chapter has been fully revised and the new edition includes an additional section on Microscopy and Histological Techniques. All figures have been redrawn and many new illustrations have been added, as well as clinical and pathological correlations. Key points Fully revised, new edition presenting students and trainees with recent developments in human histology Features a colour atlas presenting more than 80 histology slides Includes new chapter on Microscopy and Histological Techniques Previous edition published in 2011

Textbook of Human Histology Wife Goes On

The new edition of this well-known text brings undergraduates fully up to date with the latest information on human embryology. Beginning with an overview of genetics, the female reproductive system, fertilisation, and early development of the embryo, the following sections each examine the development of a different embryonic system. The genetic and molecular aspects of each system are presented in tabular format and clinical correlations are highlighted in separate boxes to enhance learning. The eleventh edition features new chapters on genetics and molecular biology, the skeletal and muscular system, clinical applications, and embryology ready reckoner. The text is highly illustrated with clinical photographs and tables and each chapter includes case scenarios and review questions for self-assessment. Key points Fully revised, new edition presenting undergraduates with the latest information on human embryology Eleventh edition includes several new chapters Features case scenarios and review questions for self-assessment Previous edition (9789351521181) published in 2014

Textbook of Anatomy Elsevier Health Sciences

This is a complete textbook on human histology for undergraduate medical students. It includes: - Concise text with functional correlation for quick recapitulation during examinations. - 117 photomicrographs to help identify the microscopic structures. - 122 flowcharts that help students to revise and memorize the microanatomy. - 106 practice figures (HE pencil drawings) which are easily reproducible in theory examinations. - 175 3D illustrations that provide a visual grasp of difficult concepts. - A summary (examination guide) to overcome the difficulty of summarizing the facts in written assessments. - Interesting facts to isolate them from main text, so that these facts should not be missed by the reader. - Clinical correlation for orientation towards pathogenesis of diseases (vertical integration).
