Incident s in an Educational Life chronicles the educational journey of John M. Swales. A leading scholar in the field of

Applied Linguistics and its subfield of English for Specific Purposes, Swales has taught across the globe in places such as Italy, Sweden, Libya, the United Kingdom, and the University of Michigan. His memoir offers a rare glimpse into the professional journey of a prominent scholar and educator./DIV

Incidents in an Educational Life explores the lessons Swales

learned by teaching and by being taught. The story follows his gradual transformation from an English as a Second Language teacher to one of the leading international figures in his field, stopping along the way to tell the sometimes amusing, sometimes painful anecdotes that have made him the recognized educator he is today. His entertaining prose make this volume a must-read for

anyone considering the field, or the many ways in which we all become teachers./DIV div /DIV divJohn M. Swales is one of the leading international scholars in the field of English for Specific Purposes. He retired in the summer of 2006 from the University of Michigan after teaching at multiple universities overseas. He is the co-author of the international bestseller *Academic Writing for Graduate Students* (3rd ed.). /DIV/DIV **Successful Academic Writing** Routledge This book bundle includes the four volumes in the revised and expanded editions of *English in Today's Research World*. The bundle is ideal for libraries and teacher resource centers. The book bundle packages together these 4 volumes: Volume 1, *Abstracts and the Writing of Abstracts*; Volume 2, *Telling a Research Story: Writing a Literature Review*; Volume 3, *Creating Contexts: Writing Introductions across Genres*; and Volume 4, *Navigating Academia: Writing Supporting Genres*. [From Student to Scholar](#) University of Michigan Press *ELT From Student to Scholar* guides graduate students through the "hidden" developmental transition required in

writing a dissertation and moving beyond, to become a successful scholar. Identifying common rhetorical challenges across disciplines, author Hjortshoj explains how to accommodate evolving audiences, motivations, standards, writing processes, and timelines. One full chapter is devoted to "writing blocks," and another offers advice to

international students who are non-native speakers of English. The text also offers advice for managing relations with advisors and preparing for the diverse careers that PhDs, trained primarily as research specialists, actually enter. On the basis of more than thirty years of consultations with graduate students, this volume is an important addition to graduate thesis seminars and composition courses, as

well as an invaluable reference for writing centers, workshops, and learning support centers. However, as

sexual

one of these
barriers. Over
thirty years
the incidence

yet now more
women are in

and in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory

behavior on women and the extent to which it is limiting their careers. Sexual Harassment of Women explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the fields of science, engineering, and medicine are victimized by sexual

harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices that have been the most successful in preventing and addressing sexual

Telling a Research Story
University Press of Colorado
An A to W of Academic Literacy is designed for graduate students of all

language backgrounds and at any level of study. It is created as a comprehensive reference for graduate students. As a glossary of terms, it can also be used as a supplemental textbook for graduate workshops and seminars and by writing consultants and instructors across the disciplines. The guide includes 65 common academic literacy terms and explores how they

relate to genres, writing conventions, and language use. Each entry briefly defines the term, identifies variations and tensions about its use across disciplines, provides examples, and includes reflection questions. An appendix lists further readings for each entry. Unique to this volume are comments featuring the experiences of the graduate students who wrote the entries,

comments that bring each entry to life and build a bridge to graduate student readers. *Understanding Audience and Becoming Part of an Academic Community* Moldy Rutabaga Books This book is for graduate students--and others--who want to become more productive writers. It's especially written for those who want to: • increase their motivation, focus, and

persistence to move a project to completion • overcome procrastination and perfectionistic tendencies • reduce (or write in spite of) their anxiety and fear of writing • manage their time, work, energy (and advisor) for greater productivity

The process or craft of sustained writing is not a matter that's taught to undergraduate or graduate students as part of their studies,

leaving most at sea about how to start a practice that is central to a career in academe and vital in many other professional occupations.

This book grew out of conversations Jan Allen has held with her graduate students for over 30 years and reflects the fruit of the writing workshops and boot camps she has conducted at three universities, her own and numerous colleagues' experiences

with writing and advising, as well as the feedback she receives from her popular Productive Writer listserv.

While Jan Allen recognizes that writing is not an innate talent for most of us, she demonstrates that it is a process based on skills which we can identify, learn, practice and refine. She focuses both on the process and habits of writing as well as on helping you uncover what kind of writer are you, and reflect on

your challenges and successes. With a light touch and an engaging sense of humor, she proposes strategies to overcome procrastination and distractions, and build a writing practice to enable you to become a more productive and prolific writer. Jan Allen proposes that you read one of her succinct chapters - each devoted to a specific strategy or

writing challenge - each day, or once a week. When you find one that increases your concentration, motivation or endurance, make it a habit. Try it for two weeks, charting the resulting increased productivity. It will become part of your repertoire of writing and productivity tools to which you can progressively add. *Writing Introductions Across Genres* Utah State University Press

care enough for their readers to write with figures of speech that craft seductive academic writing. Independently Published Eric Hayot teaches graduate students and faculty in literary and cultural studies how to think and write like a professional scholar. From granular concerns, such as sentence structure and grammar, to big-picture issues, such

as adhering to genre patterns for successful research and publishing and developing productive and rewarding writing habits, Hayot helps ambitious students, newly minted Ph.D.'s, and established professors shape their work and develop their voices. Hayot does more than explain the techniques of academic writing. He aims to adjust the writer's perspective, encouraging scholars to think of

themselves as makers and doers of important work. Scholarly writing can be frustrating and exhausting, yet also satisfying and crucial, and Hayot weaves these experiences, including his own trials and tribulations, into an ethos for scholars to draw on as they write. Combining psychological support with practical suggestions for composing introductions and conclusions,

developing a schedule for writing, using notes and citations, and structuring paragraphs and essays, this guide to the elements of academic style does its part to rejuvenate scholarship and writing in the humanities.

This comprehensive and detailed analysis of second language writers' text identifies explicitly and quantifiably where their text differs from that of native speakers of English. The book is based on the results of a large-scale study of university-level native-speaker and non-native-

speaker essays written in response to six prompts. Specifically, the research investigates the frequencies of uses of 68 linguistic (syntactic and lexical) and rhetorical features in essays written by advanced non-native speakers compared with those in the essays of native speakers enrolled in first-year composition courses. The selection of features for inclusion in this analysis is

based on their textual functions and meanings, as identified in earlier research on English language grammar and lexis. Such analysis is valuable because it can inform the teaching of grammar and lexis, as well as discourse, and serve as a basis for second language curriculum and course design; and provide valuable insight for second language pedagogical

applications of the study's findings. **Academic Writing for Graduate Students** Academic Writing for Graduate Students Essential Tasks and Skills Expert writing advice from the editor of the Boston Globe best-seller, *The Writer's Home Companion* Dissertation writers need strong, practical advice, as well as someone to assure them that their struggles aren't unique. Joan Bolker,

Using positive reinforcement, she begins by reminding thesis writers that being able to devote themselves to a project that truly interests them can be a pleasurable adventure. She encourages them to pay close attention to
