 Before 1941
 the United
 States had no
 intelligence
 service worthy
 of the name.
 While each
 military
 department
 had its own

parochial tactical intelligence apparatus and the State Department maintained a haphazard collection of 'country files' there was no American equivalent to the 400-year-old British espionage establishment or the German Abwehr. No one in Washington was charged with putting the jigsaw puzzle of fact, rumor, and foreign innuendo together to see what pictures might develop or

what portions might be missing. Even those matters of vital interest to policy makers remained uncoordinated, unevaluated, uninterrupted, and frequently in the wrong hands. That was in 1941. Four years later the scene was forever altered. The organization which achieved this dramatic turnabout was the Office of Strategic Services, better known by its initials: OSS. Headed by William J.

Donovan, a World War 1 hero, Republican politician, and millionaire lawyer, the OSS infiltrated agents into every country of occupied Europe and raised guerillas armies in most. This book examines the small but representative role played by Marines assigned to this country's first central intelligence agency. In so doing, it provides the first serious attempt to chronicle a

totally forgotten chapter of Marine Corps history. SPIN University of Chicago Press This easy-to-engage-with book is a short, practical guide with tips and suggested activities relating to the key stages of the dissertation-writing process. A range of topics is covered, from first steps in understanding research through to writing the final report. The book is

accompanied by a website that takes forward the themes of each chapter by providing additional reading and sources of information as well as an opportunity to join a discussion with fellow readers. There are video and audio clips from the authors and other experts as well as links to further digital tools and resources. Write Down Memories in This 150 Page Lined Journal Rowman & Littlefield Writing a research paper can seem as impossible as eating an elephant, but it can be done one bite at a time. Author Ceil Humphreys has created a workbook based on 20 years of classroom experience to help elementary, middle school, high school, and college students with their research paper

assignments. It is broken into seven easy action steps and includes evaluation guides. This light-hearted and encouraging book is also for teachers, homeschool moms, college professors, or anyone else who wants to help students learn how to research, organize, write, and present the best paper possible. Whether for an elementary report or a doctoral thesis, this book will

enable anyone to eat that elephant of a paper bite by bite.

 Groomed for a place at a Big Name School since their obsessed, status-conscious helicopter parents passed out cigars at the Stockstill General Hospital Neonatal Unit, the privileged students of Pemberton College Preparatory are ratcheting up the stakes in the race to

get into the nation's most prestigious colleges. The PCP juniors are gloating, jubilant at the rumor that the valedictorian presumptive has received a B on her report card, a grade that will relegate her to in-state hell. Her heir apparent, a three-generation Yale legacy, is the sole mourner at the demise of her future—if only because her thoughtless academic lapse is going to derail his plans to

attend MIT. Across town, in the graffiti-covered halls of Stockstill High School, the students slink to class, praying that they arrive without a knife wound—and dream of ivy-covered walls. And with the help of a take-no-prisoners principal and an enterprising parent, the students at SHS dare to encroach shamelessly on territory normally reserved for their wealthy private school

rivals. Join the fray as a memorable cast of characters engages in the latest rage in extracurricular activities: college admissions as a blood sport. Laugh out loud funny, *The Applicants* lampoons the heights we scale—and the depths to which we sink—to get into the “right” college. ? *Higher Education at Risk* Declining Degrees Higher Education at Risk

Biochemistry University of Chicago Press In the not too distant future, an ancient bacterium is discovered by a group of scientists in the depths of the Amazon River basin. Found to have miraculous healing powers on the human brain, it fills the research team, led by noted Neurologist Dr. Lemuel Sanderson, with tremendous hope. That is until something goes terribly wrong. An

unknown force is creating an army of undead bent on the destruction of the human race. Dr. Sanderson, with the assistance of an eccentric billionaire, sets out to track down one of his former test subjects. One he firmly believes holds the key to putting an end to this nightmare. Major Charles "Butch" Bradley has been entrusted with the evacuation of Washington

D.C. Along the way he rescues a group of college students, a mother and her two children, and a stubborn outdoorsman with a penchant for blowing things up. He is now responsible for their safety as he and his men navigate this dangerous new world, looking for a safe haven. As events unfold, the Major and Dr. Sanderson find themselves on a collision course whose outcome may

determine the fate of humanity.

Aspiring college students and their families have many options. A student can attend an in-state or an out-of-state school, a public or private college, a two-year community college program or a four-year university program. Students can attend full-

time and have a bachelor of arts degree by the age of twenty-three or mix college and work, progressing toward a degree more slowly. To make matters more complicated, the array of financial aid available is more complex than ever. Students and their families must weigh federal grants, state merit scholarships, college tax credits, and college savings accounts, just to name a few. In College

Choices, Caroline Hoxby and a distinguished group of economists show how students and their families really make college decisions—how they respond to financial aid options, how peer relationships figure in the decision-making process, and even whether they need mentoring to get through the admissions process. Students of all sorts are considered—fr

om poor students, who may struggle with applications and whether to continue on to college, to high aptitude students who are offered "free rides" at elite schools. College Choices utilizes the best methods and latest data to analyze the college decision-making process, while explaining how changes in aid and admissions practices inform those decisions as well.

No IQ Heinle & Heinle Pub Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks-- and those textbook assumptions about learning In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out

meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms. **Chicago Style for Students and Researchers** University of Chicago Press

A "bracing and well-argued" study of America's college debt crisis—"necessary reading for anyone concerned about the fate of American higher education" (Kirkus). College is far too expensive for many people today, and the confusing mix of federal, state, institutional, and private financial aid leaves countless students without the resources they need to pay for it. In

Paying the Price, education scholar Sara Goldrick-Rab reveals the devastating effect of these shortfalls. Goldrick-Rab examines a study of 3,000 students who used the support of federal aid and Pell Grants to enroll in public colleges and universities in Wisconsin in 2008. Half the students in the study left college without a degree, while less than 20 percent finished within five years. The

cause of their problems, time and again, was lack of money. Unable to afford tuition, books, and living expenses, they worked too many hours at outside jobs, dropped classes, took time off to save money, and even went without adequate food or housing. In many heartbreaking cases, they simply left school—not with a degree, but with crippling debt. Goldrick-Rab combines that

data with devastating stories of six individual students, whose struggles make clear the human and financial costs of our convoluted financial aid policies. In the final section of the book, Goldrick-Rab offers a range of possible solutions, from technical improvements to the financial aid application process, to a bold, public sector-focused “first degree free” program. “Honestly one of the most

exciting books I've read, because [Goldrick-Rab has] solutions. It's a manual that I'd recommend to anyone out there, if you're a parent, if you're a teacher, if you're a student."— Trevor Noah, The Daily Show

What is actually happening on college campuses in the years between admission and graduation?

Not enough to keep America competitive, and not enough to provide our citizens with fulfilling lives. When A Nation at Risk called attention to the problems of our public schools in 1983, that landmark report provided a convenient "cover" for higher education, inadvertently implying that all was well on America's campuses. Declining by Degrees blows higher education's

cover. It asks tough--and long overdue--questions about our colleges and universities. In candid, coherent, and ultimately provocative ways, Declining by Degrees reveals: - how students are being short-changed by lowered academic expectations and standards; - why many universities focus on research instead of teaching and spend more on recruiting and athletics

than on salaries for professors; - why students are disillusioned; - how administrations are obsessed with rankings in news magazines rather than the quality of learning; -why the media ignore the often catastrophic results; and - how many professors and students have an unspoken "non-aggression pact" when it comes to academic effort. Declining by

Degrees argues persuasively that the multi-billion dollar enterprise of higher education has gone astray. At the same time, these essays offer specific prescriptions for change, warning that our nation is in fact at greater risk if we do nothing. *College Choices* Good Press Most college professors assume students entering higher education come with

research and writing skills; because of the current educational focus on content acquisition over skill development, however, that is not the case. Skills I Wish I Learned in School: Building a Research Paper was written in direct response to the need new college students have for specific skills left out by current high school teaching standards, especially in the area of

<p>social studies. Written in an easy to follow, step-by-step manner, Skills I Wish I Learned in School: Building a Research Paper is a fantastic resource for new college students who need a frame of reference for how to research and write a college-level paper.
