This Book of
Abstracts is
the main
publication of
the 66th
Annual
Meeting of the
European
Federation for

Animal
Science 2015
in Warsaw,
Poland. It
contains
abstracts of
the invited
papers and
contributed
presentations.
The meeting
addressed
subjects
relating to
science and
innovation.
Important
problems
were also
discussed
during the
sessions of
EAAP's nine
Commissions:
Animal
Genetics,
Animal
Nutrition,
Animal
Management
and Health,
Animal

Physiology,
Cattle
Production,
Sheep and
Goat
Production,
Pig
Production,
Horse
Production
and Livestock
Farming
Systems.
A Roadmap

This work has
been selected
by scholars as
being
culturally
important and
is part of the
knowledge
base of
civilization as
we know it.
This work is in
the public

domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading

experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant. *A Guide to Creating and Managing a Profitable Business*

Cambridge University Press
This book features latest research insights into the study of the entrepreneurial ecosystem. The focus is on understanding its influence on the development of socially and physically defined 'places', and how these factors are related with each other. The book argues that regardless of how the concept of a 'place' is defined, be it

cities, regions, nations or otherwise, the impact of new technologies will influence much of our business, social, and economic landscapes. Evidently, there is an increasing pressure on 'places' to embrace new opportunities for strategic development and confront complacency. The solution may very well be in creating and sustaining entrepreneurial ecosystems where entrepreneurial action thrives and

innovation drives the new economy. *A Short History of the Spanish Civil War* Springer This book discusses how digital technology and demographic changes are transforming the patient experience, services, provision, and planning of health and social care. It presents innovative ergonomics research and human factors approaches to improving safety, working conditions and

quality of life for both patients and healthcare workers. Personalized medicine, mobile and wearable technologies, and the greater availability of health data are discussed, together with challenges and evidence-based practice. Based on the Healthcare Ergonomics and Patient Safety conference, HEPS2019, held on July 3-5, 2019, in Lisbon, Portugal, this book offers a

timely resource for graduate students and researchers, as well as for healthcare professionals managing service provision, planners and designers for healthcare buildings and environments, and international healthcare organizations. Public Policies in Media and Information Literacy in Europe Wageningen Academic Publishers
This book addresses new pedagogies

focusing on the use of geospatial technologies and geomedia in the classroom. Today, geospatial technologies are substantially influencing geography teaching and learning, particularly in secondary education. Web-GIS, virtual globes, storytelling, maps and apps for mobile devices are transforming the nature and design of geography curricula, instructional

processes, didactics, resources and assessments. Undoubtedly, geography is among those school subjects that have benefited most from the implementation of new technologies in the classroom. Geospatial technologies can be used to develop inquiry-based learning or project-based learning pedagogies and help students to acquire spatial reasoning and spatial citizenship

skills in the context of education for sustainable development. This book highlights a range of initiatives, projects and educational practices - from several European countries and settings - related to geospatial challenges in geography education. Given its scope, it will be equally appealing to scientists, students and teachers of geography and other fields using geospatial

technologies and geomedia. **Luces en el camino: filosofía y ciencias sociales en tiempos de desconcierto** transcript Verlag Finance Without Fear should be read by anyone starting or managing a business. The easy-to-read style helps remove the fear of finance for the entrepreneur, the small business owner, and the manager. Finance does not need to be

mysterious and intimidating. Basic business finance is not hard to understand, and the business owner or manager who understands finance has a leg up on the competition. Finance Without Fear explains the key financial statements the cash flow statement, profit and loss statement, and balance sheet and provides the tools to analyze these financial statements. Genuine case

studies of small businesses a retail shop, small manufacturing business, and medical office - are used throughout, so you can compare the way your business works to the case studies, and to industry norms. In the short amount of time it will take to read *Finance Without Fear*, you will learn the basics of finance, and the keys to creating and managing a profitable business.

Stavanger, Norway, 29 August - 2 September 2011 Springer

This is a much-needed new overview of Spanish social and political history which sets developments in twentieth-century Spain within a broader European context. Julián Casanova, one of Spain's leading historians, and Carlos Gil Andrés chart the country's experience of democracy, dictatorship and civil war and its

dramatic transformation from an agricultural and rural society to an industrial and urban society fully integrated into Europe. They address key questions and issues that continue to be discussed and debated in contemporary historiography, such as why the Republic was defeated, why Franco's dictatorship lasted so long and what mark it has left on contemporary Spain. This is an essential

book for students as well as for anyone interested in Spain's turbulent twentieth century. *Nutrition and Growth* Wageningen Academic Pub This book contains the abstracts of the presentations presented at the 50th annual meeting of the International Society for Applied Ethology (ISAE), held in Edinburgh, UK. The enduring aim of the ISAE is to encourage

and support basic and applied research into the behaviour of animals as related to their use by humans. Ever since a small group of veterinarians first met in Edinburgh to form the Society of Veterinary Ethology (SVE), inspirational ethologists and veterinarians have helped shape the field of Applied Ethology. Scientists such as Niko Tinbergen, Karl Von

Frisch and Konrad Lorenz, joint awardees of the 1973 Nobel Prize in physiology and medicine, have played an important part in helping to develop this subject. The 2016 ISAE conference will bring together applied ethologists from all over the world to share new discoveries and to discuss ways forward, under the general conference theme of 'Past and Future: Standing on the Shoulders

of Giants'.

<p>vitro protein degradation and apparent digestibility of <i>Pisum sativum</i>; • In vitro digestibility studies using equine fecal inoculum; • Effects of gas production recording system and pig fecal inoculum volume on kinetics; • In vitro methods of assessing protein quality for poultry; and • In vitro techniques using the DaisyII incubator. <u>Possibilities</u> Health and Social Care Systems of</p>	<p>the Future: Demographic Changes, Digital Age and Human Factors Proceedings of the Healthcare Ergonomics and Patient Safety, HEPS, 3-5 July, 2019 Lisbon, Portugal This book contains the summaries of the "Innovation in Pharmacy: Advances and Perspectives" that took place in Salamanca (Spain) in September 2018. The early science of chemistry and microbiology</p>	<p>were the source of most drugs until the revolution of genetic engineering in the mid 1970s. Then biotechnology made available novel protein agents such as interferons, blood factors and monoclonal antibodies that have changed the modern pharmacy. Over the past year, a new pharmacy of oligonucleotides has emerged from the science of gene expression such as RNA</p>
---	--	--

splicing and RNA interference. The ability to design therapeutic agents from genomic sequences will transform treatment for many diseases. The science that created this advance and its future promise will be discussed. Phillip Allen Sharp is an American geneticist and molecular biologist who co-discovered RNA splicing. He shared the 1993 Nobel Prize in Physiology or Medicine with Richard J. Roberts for "the discovery that genes in eukaryotes are not contiguous strings but contain introns, and that the splicing of messenger RNA to delete those introns can occur in different ways, yielding different proteins from the same DNA sequence. He works in Institute Professor Koch Institute for Integrative Cancer Research, Massachusetts Institute of Technology (MIT), Cambridge, MA, US. Este libro recoge los resúmenes de la «Innovation in Pharmacy: Advances and Perspectives» que tuvo lugar en Salamanca (España) en septiembre de 2018. La ciencia primitiva de la química y la microbiología fue la fuente de la mayoría de las drogas hasta la revolución de la ingeniería genética a mediados de la década de 1970. Luego, la biotecnología puso a

<p>disposición agentes proteínicos novedosos como interferones, factores sanguíneos y anticuerpos monoclonales que han cambiado la farmacia moderna. Durante el año pasado, surgió una nueva farmacia de oligonucleótidos a partir de la ciencia de la expresión génica, como el empalme de ARN y la interferencia de ARN. La capacidad de diseñar agentes terapéuticos a</p>	<p>partir de secuencias genómicas transformará el tratamiento de muchas enfermedades . La ciencia que creó este avance y su promesa futura será discutida. Phillip Allen Sharp es un genetista y biólogo molecular estadounidense que co- descubrió el empalme de ARN. Compartió el Premio Nobel de 1993 en Fisiología o Medicina con Richard J. Roberts por "el descubrimient</p>	<p>o de que los genes en eucariotas no son cadenas contiguas, sino que contienen intrones, y que el empalme del ARN mensajero para eliminar esos intrones puede ocurrir de diferentes maneras, produciendo diferentes proteínas de la misma secuencia de ADN. Trabaja en el Instituto Profesor Koch Institute for Integrative Cancer Research, Instituto Tecnológico de</p>

<p>Massachusetts (MIT), Cambridge, MA, EE. UU. <i>International Handbook of Universities</i> MDPI</p> <p>The theory of networks aims at developing theoretical views on the design and management of alliances, franchise chains, licensing, joint ventures, cooperatives, and venture capital relations. The current trend in economics and management of networks is twofold: First there is a strong</p>	<p>tendency toward application of theoretical approaches developed both in organizational economics, strategic management and organization theory. The second trend refers to the development of more integrative views on networks. Especially, combining organizational economics, strategic management and relational views on networks are very promising</p>	<p>research directions. Starting from this status of research, the current book emphasizes network research as a theory-driven field by offering new perspectives on contract design, decision and ownership rights, value creation, knowledge management and the role of social capital in franchising networks, alliances and cooperatives. <u>Corpus Linguistics</u> Ediciones Universidad de Salamanca</p>
---	---	--

<p>This Book of Abstracts is the main publication of the 70th Annual Meeting of the European Federation of Animal Science (EAAP). It contains abstracts of the invited papers and contributed presentations of the sessions of EAAP's eleven Commissions: Animal Genetics, Animal Nutrition, Animal Management and Health, Animal Physiology, Cattle</p>	<p>Production, Sheep and Goat Production, Pig Production, Horse Production and Livestock Farming Systems, Insects and Precision Livestock Farming. <u>Políticas de cierre de escuelas rurales en Iberoamérica.</u> <u>Debates y experiencias.</u> National Academies Press The Spanish Civil War has gone down in history for the horrific violence that it generated.</p>	<p>The climate of euphoria and hope that greeted the overthrow of the Spanish monarchy was utterly transformed just five years later by a cruel and destructive civil war. Here Julián Casanova, one of Spain's leading historians, offers a magisterial new account of this critical period in Spanish history. He exposes the ways in which the Republic brought into the open simmering</p>
--	--	--

tensions between Catholics and hardline anticlericalists, bosses and workers, Church and State, order and revolution. In 1936 these conflicts tipped over into the sacas, paseos and mass killings which are still passionately debated today. The book also explores the decisive role of the international instability of the 1930s in the duration and outcome of the conflict. Franco's

victory was in the end a victory for Hitler and Mussolini and for dictatorship over democracy.

Twentieth-Century Spain

Academic Press
Due to computers' ability to combine different semiotic modes, texts are no longer exclusively comprised of static images and mute words. How have digital media changed the way we write and read?

What methods of textual and data analysis have emerged? How do we rescue digital artifacts from obsolescence? And how can digital media be used or taught inside classrooms? These and other questions are addressed in this volume that assembles contributions by artists, writers, scholars and editors such as Dene Grigar, Sandy Baldwin, Carlos Reis, and Frieder Nake. They

offer a multiperspectival view on the way digital media have changed our notion of textuality. *Health and Social Care Systems of the Future: Demographic Changes, Digital Age and Human Factors* Wageningen Academic Publishers In this revised edition of *A Short History of the Spanish Civil War*, Julián Casanova tells the gripping story of the Spanish Civil War. Written in elegant and

accessible prose, the book charts the most significant events and battles alongside the main players in the tragedy. Casanova provides answers to some of the pressing questions (such as the roots and extent of anticlerical violence) that have been asked in the 70 years that have passed since the painful defeat of the Second Republic. Now with a revised introduction, Casanova

offers an overview of recent historiographical shifts; not least the wielding of the conflict to political ends in certain strands of contemporary historiography towards an alarming neo-Francoist revisionism. It is the ideal introduction to the Spanish Civil War. [Overeducation in Europe](#) Wageningen Academic Publishers The aim of the Special Issue is to discuss the main current topics concerning

marketing for sustainable tourism with reference to territories (i.e., tourism destinations, protected areas, parks and/or natural sites, UNESCO World Heritage Sites, rural regions/areas, etc.) and tourism enterprises and/or organisations (i.e., destination management organisations, hospitality enterprises, restaurant enterprises, cableway companies, travel agencies, etc.). In destinations where natural resources are pull factors for tourism development, the relationships among local actors (public, private, and local community), as well as marketing choices, are essential to develop sustainable tourism products. To this end, the Special Issue encourages papers that analyse marketing strategies adopted by tourism destinations and/or tourism enterprises to avoid overtourism, to manage mass sustainable tourism (as defined by Weaver, 2000), and to encourage and promote sustainable tourism in marginal areas or in territories suffering lack of integration in the tourism offer. Special attention will be given to contributions on the best practices to manage territories and/or enterprises adopting

sustainable marketing strategies. Barcelona, Spain, August 24th - 27th, 2009 Karger Medical and Scientific Publishers This book is a printed edition of the Special Issue "Environmentally Sustainable Livestock Production" that was published in *Sustainability Book of Abstracts of the 70th Annual Meeting of the European Federation of Animal Science* AK Press

Organizations of all types are consistently working on new initiatives, product lines, and workflows as a way to remain competitive in the modern business environment. No matter the type of project at hand, employing the best methods for effective execution and timely completion of the task is essential to business success. Operations and Service Management: Concepts,

Methodologies, Tools, and Applications is a comprehensive reference source for the latest research on business operations and production processes. It examines the need for a customer focus and highlights a range of pertinent topics such as financial performance measures, human resource development, and business analytics, this multi-volume book is ideally

designed for managers, professionals, students, researchers, and academics interested in operations and service management.
