Orthotic Design and
Fabrication for the Upper
Extremity: A Practical
Guide by Drs. Katherine
Schofield and Deborah
Schwartz is a unique
guide that illustrates
orthotic design and

fabrication in a clear step-
by-step fashion by
presenting printed textual
material along with
instructional videos. The
first chapters lay the
foundation for orthotic
design and detail the
anatomical knowledge
and background
information that is
required before molding
orthoses on clients. Each
chapter explores a
specific part of the upper
extremity, describes
several common clinical
diagnoses, and highlights
typical orthoses that
might be utilized to

immobilize and protect it.
Together, these chapters
communicate core,
foundational knowledge
for the use of orthoses as
an intervention in
occupational therapy
practice. The instructional
videos also emphasize the
application of
biomechanical, anatomic,
and clinical constructs in
orthotic design,
fabrication, and
evaluation. The textbook
and video content work
together enabling
students and entry-level
practitioners to learn with
visual and versatile

resources. University faculty members will gain access to ample activities and exercises to augment their classroom and laboratory teaching. This allows for more efficient use of time and appeals to the learning styles of current and future students. This text includes: Chapters devoted to specific type of orthosis for parts of the upper extremity linked to step -by -step instructional videos Case studies to promote a grasp of the knowledge and application to the

development of clinical reasoning skills Multiple choice and short answer review questions and activities for most chapters Presentation of current evidence to support the use of the specific orthoses in clinical practice Patterns that can be replicated and check out sheets to critique each orthosis The combination of text materials and instructional video material makes Orthotic Design and Fabrication for the Upper Extremity: A Practical Guide a uniquely

valuable resource for occupational therapy students, new graduates, and novice clinicians.
