This manual contains a description of the components of the Twin Rotor MIMO System (TRMS), and assembly and test procedures. It is intended for the Twin Rotor MIMO System Es Documentation. The Twin Rotor MIMO system is the general assumption that the toolbox is an open system as distinct from the RTK. This approach by its nature makes the basic functions of the toolbox available to the user, and enables the user to create a system of his own and then further customise it to satisfy the requirements better.
