Structuring Commercial Real Estate Workouts: Alternatives to Bankruptcy and Foreclosure, Second

Edition presents a concise introduction to the legal and business considerations involved in real estate loan workouts. It is designed to aid lenders, borrowers and their legal counsel in confronting the variety of issues encountered in working out an acceptable solution to the dilemma posed by a loan in default. The parties associated with a defaulting loan face a number of potential pitfalls, ranging from imminent insolvency of the borrower (and the diminution in value or loss of a lender's security interest) to draconian penalties incurred through liability for environmental hazards present on the property. Structuring Commercial Real Estate Workouts introduces the varied issues, discusses the limitations and advantages of foreclosure and other remedies, and presents suggestions for guiding potential alternative courses of action. The Second Edition features extensive coverage of environmental liabilities that may arise under federal statutes and regulations such as RCRA and CERCLA and how lenders can avoid or minimize these liabilities. A new chapter has been added on the state mini-RCRAs and CERCLAs, necessitated by the growing importance of state environmental laws to real estate financing. A detailed discussion is presented on the laws and programs that have been developed to minimize lender liability at andquot;brownfieldsandquot; sites in urban areas. Excellent coverage is provided for such key areas as prepackaged plans, single asset real estate cases, cash collateral and adequate protection, deeds in lieu of foreclosure and dealing with guarantors and other sureties.

The Economics of Access Versus Ownership offers library professionals a model economic analysis of providing access to journal articles through interlibrary loan as compared to library subscriptions to the journals. This model enables library directors to do an economic analysis of interlibrary loan and collection development in their own libraries and to then make cost-efficient decisions about the use of these services. This practical book's analysis and conclusions are based on 1994/95 academic year research conducted by the State University of New York libraries at Albany, Binghamton, Buffalo, and Stony Brook. The research determined the costs and benefits of high-priced, low-use scholarly journals, focusing on journals in the mathematics and sciences that historically have high prices, low levels of use, and increasing rates of price escalation. The libraries' financial costs of access by interlibrary loan versus journal subscriptions was calculated and, using this information, a set of decision rules was established. Library directors and interlibrary loan/collection development heads can use this set of decision rules to determine, based on the level of use and subscription price, whether they should provide access to journal articles via interlibrary loan or journal subscriptions. The research findings presented in The Economics of Access Versus Ownership are significant to library professionals as journal subscription prices escalate and commercial document delivery services, consortium agreements, and interlibrary loan hardware and software proliferate. Contributors explore important factors necessary to understanding the economics of access. They encourage readers to consider the

following when choosing between journal subscriptions and interlibrary loan: financial costs fixed and marginal costs decision rules which determine the most economically efficient method of access the use of a library consortium and joint collection development within the consortium as an economically efficient method of access added benefits of a library consortium Information found in The Economics of Access Versus Ownership makes it a useful guide for university and college library directors, interlibrary loan department heads, and collection development heads trying to choose the most economically sound, both for their libraries and their patrons, form of access to journal articles.

Teacher candidates need authentic practice with language learners so that they can test and hone their skills based on the concepts learned in their teacher education programs with real students. These candidates need practice before and beyond student teaching and fieldwork. If they are given the chance to practice during as many teacher education courses as possible and have access to language learners throughout their programs, they can focus on applying the specific content of each class they take in a real-world context with real students. Engaging Teacher Candidates and Language Learners With Authentic Practice highlights strategies teacher educators can use to give their teacher candidates authentic practice attached to coursework. By focusing on ways that authentic practice has been integrated into teacher preparation programs and studies that have been realized, this publication will provide practical ways for others to provide this authentic practice, which is much needed in teacher preparation programs. This book highlights topics such as pedagogy, student engagement, and intercultural competence and is ideal for educators, administrators, researchers, and students.
