BLAINE RAIDEN

Frederike Helwig - Kriegskinder Lontar "How did Singapore's health care system transform itself into one of the best in the world? It not only provides easy access, but its standards of health care, not only in curative medicine but also in prevention, are exemplary. Fifty years ago, the infant mortality rate (IMR) was 26 per thousand live births; today the IMR is 2. Life expectancy was 64 years then; today, it is 83. The Singapore Medicine brand is trusted internationally, and patients are drawn to Singapore from all over the world. And while many countries struggle to finance their health care, Singapore has developed a health care financing

framework that makes health care affordable for its people and gives sustainability to the health care system. Reliability is provided by a professional workforce that seeks to continually learn, improve and become ever more proficient with cutting edge technology while emphasizing the relational aspects of health care by nurturing compassion and maintaining high standards of integrity. Convenience and safety are enhanced by a unifying IT system that enables the portability of medical records across health care institutions. All these have been achieved not by chance but by careful planning, strong leadership and dedicated people who are prepared to learn from Singapore's own experience while adapting best practices from around the world. But the system is not without challenges -- not least those of an aging

population, and an increasing market influence. This book provides a fascinating insight into the development of Singapore's health care system from the early days of fighting infections and providing nutrition supplementation for school children, to today's management of lifestyle diseases and high-end tertiary care. It also discusses how the system must adapt to help Singaporeans continue to "live well, live long, and with peace of mind."--
Four Theories of the Press Quid Pro Books Includes an Indonesian-English glossary (over 3,700 words), as well as a description of the Indonesian use of the Arabic alphabet.
Fifty Years with the Ford Foundation, 1953-2003 Penguin
As constitutional scholar John Nowak noted when the book was first released,

"Professor Choper's Judicial Review and the National Political Process is mandatory reading for anyone seriously attempting to study our constitutional system of government. It is an important assessment of the democratic process and the theoretical and practical role of the Supreme Court." That view is no less true today, as borne out by the countless citations to this landmark work over the decades, including scores in the last few years alone. It is simply part of the foundational canon of constitutional law and political theory, an essential part of the library of scholars, students, and educated readers interested in considering the hard choices inherent in what the courts should decide and how they should decide them.

Handbook of Early Childhood Literacy

Cornell University Press

'Understanding Stewardship for Children' is a book that will enlighten your children on how they can be good and obedient stewards over the blessings of God upon their lives. This book will teach them what they are supposed to take care of and how to care of their gifts, talents, abilities, the resources at their disposal, their time, money, their families, friends, neighbors, schoolmates, and so much more. Because God trusts them well enough and he has placed them in charge of everything he has made. Every child of God has been given a job to do and with his help, they can do it well indeed!

A Novel Harmony

First published in 1922, the novel "Sitti Nurbaya: A Love Unrealized," by Marah Rusli, retains the poignancy that made it a modern Indonesian classic. In terms of its social impact in what was then the Dutch East Indies, "Sitti Nurbaya" may be compared to "Uncle Tom's Cabin" in the ante-bellum United States. Even to this day, the issues of injustice and indignities suffered by women that this novel raised continue to be debated throughout the country. Rich in description, dense with ironic foreboding and the inexorable workings of fate, Sitti Nurbaya is Samsu and "Sitti Nurbaya"'s ill-fated love story. But in their wishes, the reader might also

also discern young people's tantalizing dream of what the East Indies society might become, or could become, if only local genius, embodied in a modernizing youth emancipated from stifling traditions, could fuse with European genius in mutual respect and admiration. This too was, of course, a dream never to be realized, and one perhaps which never could have been realized.

How Our Schools Can Teach Respect and Responsibility Walter de Gruyter

Sexual Victimization: Then and Now provides scholars easy access to information that specifically examines the continuum of sex crimes and the perception of victims by our criminal justice system and society as a whole. This text features contributions from well-known researchers in the field and serves as an important resource to provide scholars with up-to-date research on sexual victimization that will educate students on this complex and evolving challenge for the criminal justice system. Editors Tara N. Richards and Catherine D. Marcum approach the concept by examining how the criminal justice system handles sexual victimization, the association between individuals in a relationship and sexual assault, and unusual and special issues associated with contemporary sexual victimization. By discussing these issues, the theoretical explanations for these crimes and the effectiveness of the policy that has been applied will effectively link the criminological areas of theory, research, and policy.

Singapore's Health Care System

McGraw Hill Professional

Taking a cognitive approach, this book provides students with concise coverage of the field of educational psychology. It contains 21 chapters and several cases.

Windows on Teaching GENERAL PRESS

Presented here are four major theories behind the functioning of the world's presses: (1) the Authoritarian theory, which developed in the late Renaissance and was based on the idea that truth is the product of a few wise men; (2) the Libertarian theory, which arose from the works of men like Milton, Locke, Mill, and Jefferson and avowed that the search for truth is one of man's natural rights; (3) the Social Responsibility theory of the modern day: equal radio and television time for political candidates, the obligations of the newspaper in a one-paper town, etc.; (4) the Soviet Communist theory, an expanded and more positive version of the old Authoritarian theory.

Taking Care of God's Stuff "Understanding Stewardship for Children" Lovely Story

Publisher

The charmingly oblivious elephant Little Jumbo "saves the day" in a superhero story that's perfect for fans of Ian Falconer's Olivia Being a superhero isn't easy. All Little Jumbo wants to do is fight crime and defend the weak, by doing things like halting traffic for snails to cross the street and stopping Dad from sneaking cookies. It's not his fault grown-ups don't appreciate his heroic deeds! Luckily, Little Jumbo doesn't give up easily. He even powerfully resists cake (his greatest weakness!) to help a new friend in need! Super Jumbo is the hilariously sweet companion to Fred Koehler's standout debut, How to Cheer Up Dad, which received three starred reviews.

Sexuality and Nation in Indonesia

Princeton University Press

Henry Coningsby is the orphaned grandson of a wealthy Marquess. While at Eton he befriends Oswald, whose father is an enemy of the Marquess. The older men represent old and new money in society. Coningsby begins to develop liberal political views, so his grandfather disinherits him, and Coningsby is forced to work for a living.

The Gay Archipelago is the first book-length exploration of the lives of gay men in Indonesia, the world's fourth most populous nation and home to more Muslims than any other country. Based on a range of field methods, it explores how Indonesian gay and lesbian identities are shaped by nationalism and globalization. Yet the case of gay and lesbian Indonesians also compels us to ask more fundamental questions about how we decide when two things are "the same" or "different." The book thus examines the possibilities of an "archipelagic"

perspective on sameness and difference. Tom Boellstorff examines the history of homosexuality in Indonesia, and then turns to how gay and lesbian identities are lived in everyday Indonesian life, from questions of love, desire, and romance to the places where gay men and lesbian women meet. He also explores the roles of mass media, the state, and marriage in gay and lesbian identities. *The Gay Archipelago* is unusual in taking the whole nation-state of Indonesia as its subject, rather than the ethnic groups usually studied by anthropologists. It is by looking at the nation in cultural terms, not just political terms, that identities like those of gay and lesbian Indonesians become visible and understandable. In doing so, this book addresses questions of sexuality, mass media, nationalism, and modernity with implications throughout Southeast Asia and beyond.

Welding and Cutting Metals by Aid of Gases Or Electricity SAGE Publications
CONTRIBUTIONS TO THE SOCIOLOGY OF LANGUAGE brings to students, researchers and practitioners in all of the social and language-related sciences carefully selected book-length publications dealing with sociolinguistic theory, methods, findings and applications. It approaches the study of language in society in its broadest sense, as a truly international and interdisciplinary field in which various approaches, theoretical and empirical, supplement and complement each other. The series invites the attention of linguists, language teachers of all interests, sociologists, political scientists, anthropologists, historians etc. to the development of the sociology of language.

Wafa Ghnaim brings traditional Palestinian

embroidery to life by resuscitating its roots as a powerful, provocative, and profound storytelling tool used by Palestinian women for hundreds of years to document their stories, observations, and experiences.

The Gay Archipelago SAGE

US psychologist Abraham Maslow's A Theory of Human Motivation is a classic of psychological research that helped change the field for good. Like many field-changing thinkers, Maslow was not just a talented researcher, he was also a creative thinker – able to see things from a new perspective and show them in a different light. He studied what he called exemplary people such as Albert Einstein, Jane Addams, Eleanor Roosevelt, and Frederick Douglass rather than mentally ill or neurotic people. Maslow generated new ideas, forging what he called 'positive' or 'humanistic psychology'. His argument was that humans are psychologically motivated by a series of hierarchical needs, starting with the most essential first. His theories parallel many other theories of human developmental psychology, some of which focus on describing the stages of growth in humans.

Communications Media in the Information Age Rodale Books

Why we need a daily dose of touch: an investigation of the effects of touch on our physical and mental well-being. Although the therapeutic benefits of touch have become increasingly clear, American society, claims Tiffany Field, is dangerously touch-deprived. Many schools have "no touch" policies; the isolating effects of Internet-driven work and life can leave us hungry for tactile experience. In

this book Field explains why we may need a daily dose of touch. The first sensory input in life comes from the sense of touch while a baby is still in the womb, and touch continues to be the primary means of learning about the world throughout infancy and well into childhood. Touch is critical, too, for adults' physical and mental health. Field describes studies showing that touch therapy can benefit everyone, from premature infants to children with asthma to patients with conditions that range from cancer to eating disorders. This second edition of *Touch*, revised and updated with the latest research, reports on new studies that show the role of touch in early development, in communication (including the reading of others' emotions), in personal relationships, and even in sports. It describes the physiological and biological effects of touch, including areas of the brain affected by touch, and the effects of massage therapy on prematurity, attentiveness, depression, pain, and immune functions. Touch has been shown to have positive effects on growth, brain waves, breathing, and heart rate, and to decrease stress and anxiety. As Field makes clear, we enforce our society's touch taboo at our peril.
