This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. This life-span approach to parent-child relations gives students a comprehensive, contemporary look at theories, research, and techniques within historical and cultural contexts. It covers every stage of development, including older parents and their adult children, and uses an inclusive approach that looks at a variety of different family contexts, such as foster families, military families, and families with an LGBTQ member, as well as the influence of culture and ethnicity on family beliefs and behaviors. The first chapter focuses on the history of theoretical and research influences of childrearing to help students understand why parents today hold certain beliefs regarding how to raise children. Theory and research are then interwoven through the book. An early chapter on strategies and techniques also sets the stage for upcoming discussions of parent-child relations. Written with the student in mind, the book presents numerous examples. Critical thinking questions in every chapter encourage students to stop and consider their views regarding the material, and Spotlight features throughout provide examples of the influence of technology, diversity, and poverty on families. The Enhanced Pearson eText version includes embedded video examples and Test Your Knowledge quizzes with feedback that enable students to check their understanding of the material.

A tightly argued and expansive examination of the pitfalls of transhumanism that acquaints us with what it means to live well. Advocates of transhumanism, or "radical" enhancement, urge us to pursue the biotechnological heightening of select capacities - above all, cognitive ability - so far beyond any human limit that the beings with those capacities would exist on a higher

ontological plane. For proponents of such views, humanity's self-transcendence through advancements in science and technology may even be morally required. Consequently, the human stakes of how we respond to transhumanism are immeasurably high. In *Posthuman Bliss? The Failed Promise of Transhumanism*, Susan B. Levin challenges transhumanists' overarching commitments regarding the mind and brain, ethics, liberal democracy, knowledge, and reality, showing their notion of humanity's self-transcendence into "posthumanity" to be little more than fantasy. Uniting philosophical with scientific arguments, Levin mounts a significant challenge to transhumanists' claim that science and technology support their vision of posthumanity. In a clear and engaging style, she dismantles transhumanists' breezy assurances that posthumans will emerge if we but allocate sufficient resources to that end. Far from offering theoretical and practical "proof of concept" for the vision that they urge upon us, Levin argues, transhumanists engage inadequately with cognitive psychology, biology, and neuroscience, often relying on questionable or outdated views within those fields. Having shown in depth why transhumanism should be rejected, Levin argues forcefully for a holistic perspective on living well that is rooted in Aristotle's virtue ethics but that is adapted to liberal democracy. This holism is thoroughly human, in the best of senses: It directs us to consider worthy ends for us as human beings and to do the irreplaceable work of understanding ourselves rather than relying on technology and science to be our salvation.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

Presenting the history of relations between the European Union and Japan, this book explains the origins and significance of the momentous 2018 Economic Partnership Agreement and its parallel Strategic Partnership Agreement. Set within the historical context of the 1991 Hague Declaration and Action Plan of 2001, this book analyses the impact of recent background changes to the liberal trading order, the proliferation of free trade agreements, and uncertainty about role of the United States in the world on relations between Japan and the EU. Adopting a path-dependent approach, it illustrates how these agreements were reached as a result of growing patterns of cooperative behaviour between the EU and Japan, and the imprint of shared past experiences in areas from trade to security. In so doing, this book also raises important questions about the future of multilateral cooperation, exploring the potential for bilateral agreements to undermine the possibility of finding international solutions to increasingly international problems. *EU-Japan Relations and the Crisis of Multilateralism* will appeal to students and scholars of European and Japanese politics and international relations, as well as policymakers internationally with an interest in these significant agreements.

Monsters explores questions about the central concept of the monstrous: Why do we create monsters? Are they animal, human, both, or neither? Which of our fears and desires do monsters embody? What can monsters tell us about our cultural and historical moments? How do we cope with the monsters that haunt our imaginations--and our societies? Readings by classic

poets, contemporary fiction writers, pop culture critics, philosophers, psychologists, occultists, veterinarians, ethicists, historians, and others take up these questions and more. Questions and assignments for each selection provide a range of activities for students to write about vampires, werewolves, zombies, mermaids, serial killers, classic horror movie monsters, and more strange things that go bump in the night.
