This book is one of the first research studies on Western Rite Orthodox communities of Oriental Orthodox Churches, with emphasis and special reference to the Syriac Orthodox Church of Antioch and the Indian Orthodox Malankara Church. Two Western Rites, the Independent Catholic Church of Ceylon, Goa and India and the Christian (Old Orthodox) Catholic Rite Church of America was constituted with the blessings and permission of Moran Mor Ignatius Peter IV (III) - Patriarch of Antioch and All East. These communities came into existence as a result of the great missionary vision of Patriarch Ignatius Peter IV (III) and the Prelates of Malankara. The book is a journey

through the great missionary efforts of Patriarch Ignatius Peter IV (III), Malankara Metropolitan Pulikkottil Mar Joseph Dionysius II, Metropolitan Alvares Mar Julius, Archbishop Rene Vilatte Mar Timotheus I, Dr. Lisboa Pinto, St. Gregorious of Parumala and other great leaders of Syriac and Malankara Churches.

This book chronicles the visual history of the Basilica of Bom Jesus, one of the longest-surviving churches from Goa's Portuguese colonial era. In the sixteenth century, this baroque church in Old Goa was constructed to house the sacred relics of St. Francis Xavier and is emblematic of Goa Dourada or Golden Goa. Despite their early modern origins,

monuments like the Basilica continue to influence visual culture that pertains to Goa. Accordingly, this book uncovers the traces of architectural images of Goa's sixteenth- and seventeenth-century monuments and conducts a genealogical study of how uses of religious architecture shift over time. Thus, even as the Basilica originally functioned to portray or recall a grand empire by evoking the notion of Goa Dourada, its iconicity has been employed in marking Goa's difference from the rest of India thereafter. By employing an analysis of historical texts, illustrations, photography, film, and pageantry, this volume demonstrates how the image of the Basilica has been employed to create a discourse on Goan identity. In fact, right from the colonial period, when

Goa was heralded as the Rome of the East, to the post-Portuguese period, when Goa became an idyllic destination for leisure tourism, architectural images of Bom Jesus have been central in shaping Goa's identity. Goa's Bom Jesus as Visual Culture will be useful to students and educators in the fields of architecture, history, anthropology, sociology, history of architecture, and colonial/postcolonial studies. Finally, the long history of a single monument that the book documents highlights how Goans have been shaping their unique culture. At the same time as Goans imbibed Portuguese and other European influences, they also domesticated and remade such colonial heritage in South Asian fashion and, in turn, contributed to global aesthetics.

Taking the three continents in turn, the documents trace chronologically the transfer of Christianity from the beginning of Western colonization

through the end of the Cold War. Traditional forms of Christianity in Asia and Africa are not covered. The emphasis is on the voices of people working in the field--both missionaries and Indigenous people--rather than those at the imperial centers.

"[The author] draws out the complex relationship between religion and climate change. He shows that the religious movements and ideas that emerge from climate shocks often last for many decades, and become a familiar part of the religious landscape, even though their origins in particular moments of crisis may be increasingly consigned to remote memory" -- From jacket flap.

"Norms beyond Empire seeks to rethink the relationship between law and empire by emphasizing the role of local normative production. While European imperialism is often viewed as being able to shape colonial law and government to its image, this volume argues that early modern empires could

never monolithically control how these processes unfolded. Examining the Iberian empires in Asia, it seeks to look at norms as a means of escaping the often too narrow concept of law and look beyond empire to highlight the ways in which law-making and local normativities frequently acted beyond colonial rule. The ten chapters explore normative production from this perspective by focusing on case studies from China, India, Japan, and the Philippines. Contributors are: Manuel Bastias Saavedra, Marya Svetlana T. Camacho, Luisa Stella de Oliveira Coutinho Silva, Rômulo da Silva Ehalt, Patricia Souza de Faria, Fupeng Li, Miguel Rodrigues Lourenço, Abisai Perez Zamarripa, Marina Torres Trimállez, and Ângela Barreto Xavier"--

Parish Churches in the Early Modern World BRILL

The grandeur of St. Peter's, the Baroque ecstasy of the churches at Cholula in Mexico, the intimate peace of Fairford Church in Gloucestershire... The two thousand years' heritage of Christian churches is a fascinating one. For anyone interested in the evolution of architectural styles, the subject is of inescapable interest. For a far wider group of people, however, it is clear that churches are much more than architectural monuments. Through their rich historical associations and special emotional quality that is largely denied to secular buildings, they exert a power that crosses national boundaries and even beliefs. Edward Norman sees churches as both acts of faith and works

of art. The clarity, knowledge, and insight of his chronological survey are supported and enhanced by a brilliantly researched collection of illustrations. The result is a perfect mix between the most-loved master buildings such as Hagia Sophia and the freshness of the less familiar mission church in Paraguay or a Baroque shrine in Goa. Whether coming from the Catholic, Orthodox, or Protestant traditions, whether drawn to the sublimity of Sainte-Chapelle in Paris or the simplicity of a Puritan chapel, Christians everywhere will respond to Norman's celebration of churches. 387 illustrations, 80 in color.

Goa's Bom Jesus as Visual Culture

Harper Collins

Across Europe, the parish church has stood for centuries at the centre of local

communities; it was the focal point of its religious life, the rituals performed there marked the stages of life from the cradle to the grave. Nonetheless the church itself artistically and architecturally stood apart from the parish community. It was often the largest and only stone-built building in a village; it was legally distinct being subject to canon law, as well as consecrated for the celebration of religious rites. The buildings associated with the "cure of souls" were sacred sites or holy places, where humanity interacted with the divine. In spite of the importance of the parish church, these buildings have generally not received the same attention from historians as non-parochial places of worship. This collection of essays redresses this balance and reflects on

the parish church across a number of confessions - Catholic, Lutheran, Reformed and Anti-Trinitarian - during the early modern period. Rather than providing a series of case studies of individual buildings, each essay looks at the evolution of parish churches in response to religious reform as well as confessional change and upheaval. They examine aspects of their design and construction; furnishings and material culture; liturgy and the use of the parish church. While these essays range widely across Europe, the volume also considers how religious provision and the parish church were translated into a global context with colonial and commercial expansion in the Americas and Asia. This interdisciplinary volume seeks to identify what was distinctive

about the parish church for the congregations that gathered in them for worship and for communities across the early modern world.

The Heroic Saint Francis Xavier

Indiana University Press

Built during the 16th and 17th centuries AD, the churches and convents of Goa -- the former capital of the Portuguese in India -- illustrate the evangelization of India. The book traces the spread of Christianity in Goa, the historic development of the churches and convents, particularly the Se Cathedral Complex, and the influence of European building styles on the indigenous architecture. Se Cathedral, one of the largest churches in Old Goa, is built in the Portuguese-Gothic style. With a Tuscan interior and a Corinthian exterior,

its main altar is dedicated to St. Catherine of Alexandria; paintings on either side depict scenes from her life. An interesting example of religious architecture is the Church of St. Francis of Assisi, adorned with gilded and carved woodwork, murals portraying scenes from the life of St. Francis, and a floor made substantially of carved gravestones. Briefly touching upon the building traditions and technology, the book also talks about other monuments and churches in Goa.

Few letters have been so enthusiastically received & so widely diffused as those of the sixteenth-century Jesuit missionary & Saint, Francis Xavier. Written from India, the Indonesian archipelago, Japan, & the

island of Sancian off the coast of China, these letters were copied, recopied, translated into Latin, German, French, & other languages, & frequently printed for wider circulation. They are filled with information on newly discovered lands & cultures, & they are filled with the missionary spirit, the zeal for the honor & glory of God, which animated the whole of Xavier's life & work. They constitute a religious classic & an historical resource heretofore unavailable in English. Francis Xavier was one of the first companions & followers of Ignatius Loyola, the founder of the Society of Jesus (Jesuits). In 1540, he set off as a missionary to southern Asia, where in the midst of ten years of ceaseless labor he produced the 138 letters & instructions that this book

contains. The translator of this highly readable English version, M. Joseph Costelloe, S.J., is well known in scholarly circles for his masterful translation of the definitive four-volume biography, FRANCIS XAVIER, HIS LIFE, HIS TIMES by Georg Schurhammer, S.J., published by the Jesuit Historical Institute in Rome. A detailed history of churches and their association with Hindu temples, covering a distinctive number of Churches situated in India Highlights the significance of architecture Depicts different segregated groups of

Christianity The Churches of India takes the reader on a fascinating journey through India to discover the history and architecture of the country's Christian churches. With fine illustrations and an informative, easy-to-read text the book reveals the diverse architectural styles that have evolved in different regions from the very beginnings of the Common Era identified with the birth of Christ. Churches have been built in greater numbers from the middle of the last millennium when settlers such as the Armenians and colonizers, Portuguese, French and British, brought their own branches of Christianity and religious architecture with them. Many churches were indigenized over time while others have retained their architecture in its pure form. Joanne Taylor's work gives

the reader a deep feeling for the range of churches and their architecture, from the humble to the grand. It is also a fine history of the search by those who design or adapt buildings for a self-identity through the symbolism, explicit or implicit, expressed in built forms. Religious buildings give India its identity as a nation of diverse people with their own cultures. It is a country with one of the world's richest architectural traditions. Complemented by over 300 photographs, this absorbing book is the most comprehensive work on India's churches to date.

The state of Goa on India's southwest coast was once the capital of the

Portuguese-Catholic empire in Asia. When Vasco Da Gama arrived in India in 1498, he mistook Hindus for Christians, but Jesuit missionaries soon declared war on the alleged idolatry of the Hindus. Today, Hindus and Catholics assert their own religious identities, but Hindu village gods and Catholic patron saints attract worship from members of both religious communities. Through fresh readings of early Portuguese sources and long-term ethnographic fieldwork, this study traces the history of Hindu-Catholic syncretism in Goa and reveals the complex role of religion at the intersection of colonialism and modernity.
