Chapter 6: the Skeletal System Flashcards - Cram.com NAME \_\_\_\_\_ PER \_\_\_\_\_ Chapter 6 Notes: The Skeletal System 6-1 Functions of the Skeletal System 1) \_\_\_\_\_ Provided for the entire body by the entire skeletal system Bones provide attachments

for soft tissues and organs 2) \_\_\_\_\_ Provided by the bones for \_\_\_\_\_ salts for body fluids Lipids are stored in \_\_\_\_\_ marrow for energy reserves 3) \_\_\_\_\_ Occurs in the \_\_\_\_\_ marrow and results in increases in ... The interaction between the skeletal system and the muscular system is so constant that sometimes the two organ systems are referred to as one system-- the musculoskeletal system.

Skeletal muscles must be attached to something at either end to give them support while they contract. Typically this means each end of a skeletal muscle is attached to a bone. According to Hillendale Health, when a muscle contracts, it brings the two bones closer together.
