The American republic will survive only if its citizens are educated--this was an article of faith of its founders. But seeking common civic ground in public schools has never been easy in a society where schoolchildren followed different religions, adhered to different cultural traditions, spoke many languages, and were identified as members of different "races." In this wise and enlightening book, filled with vivid characters and memorable incidents that make history but don't always make history books, David Tyack describes how each American generation grappled with the knotty task of creating political unity and social diversity. Seeking Common Ground illuminates puzzles about democracy in education and chronic conflicts that continue to make news. Americans mistrusted government, yet they entrusted the civic education of their children to public schools. American history textbooks were notoriously dull, but they were also highly controversial. Although the people liked local control of schools, educational experts called it "democracy gone to seed" and campaigned to "take the schools out of politics." Reformers argued about whether it was more democratic to teach all students the same subjects or to tailor curriculum to individuals. And what was the best way to "Americanize" immigrants, asked educators: by forced-fed assimilation or by honoring their ethnic heritages? With a broad perspective and an eye for telling detail, Tyack lets us see that debates about the civic purposes of schools are an essential part of a democratic culture, and integral to its future.

In the tradition of Michael Pollan, Joan Gussow, and Verlyn Klinkenborg's *The Rural Life*, This Common Ground is an inspirational evocation of a life lived close to the earth, written by the head farmer at one of the country's first community-supported farms. By reflecting on four seasons of activity at his beloved Quail Hill Farm in eastern Long Island, Scott Chaskey offers stirring insight into the connections between land and the human family. Whether writing about the voice of a small wren nesting in the lemon balm or a meadow of oats, millet, and peas rising to silver and green after a fresh rain, this poet-farmer's contagious sense of wonder brings us back to our bond with the soil.

Common Ground is a fascinating tour of the edges of ecosystemsurban and natural. It is in these heterogeneous landscapes that human animals encounter those of the non human variety. Cowen is an acclaimed nature and travel writer, but much of his writing has taken readers to vast pristine landscapesnational parks, the Arctic, etc. In this work he turns his focus to an underappreciated and under-illuminated landscapethe edgeland, or what he also refers to as the no man s land between city and country. Like an archaeologist, Cowen unearths human and natural histories. He carries the reader into the worlds of owls, foxes, and wheat fields, glimpses of what lies beneath and beyond, but also grounds the narrative in the everyday immediacies of iPhones, WiFi, and cafes. It is

particularly appealing in its focus on the edges, spaces many creatures pass through and yet which few really appreciate. The edge-land's inhabitants are here introduced in immersive, kaleidoscopic detail as their voices and visions rise from the fields and woods: beasts, birds, insects, plants, and people and their changes across the seasons. Under constant, increasingly militarized surveillance, the Arizona-Sonora border is portrayed in the media as a site of sharp political and ethnic divisions. But this view obscures the region's deeper history. Bringing to light the shared cultural and commercial ties through which businessmen and politicians forged a transnational Sunbelt, *Standing on Common Ground* recovers the vibrant connections between Tucson, Arizona, and the neighboring Mexican state of Sonora. Geraldo L. Cadava corrects misunderstandings of the borderland's past and calls attention to the many types of exchange, beyond labor migrations, that demonstrate how the United States and Mexico continue to shape one another. In the 1940s, a flourishing cross-border traffic developed among entrepreneurs, tourists, and students, as politicians on both sides worked to cultivate a common ground of free enterprise. However, the modernizing forces of manufacturing, ranching, and agriculture marginalized the very workers who propped up the regional economy, and would eventually lead to the social and economic instability that has troubled the Arizona-Sonora corridor in recent times. *Standing on Common Ground* clarifies why we cannot understand today's fierce debates over illegal immigration and border enforcement without identifying the roots of these problems in the Sunbelt's complex pan-ethnic and transnational history.

Two friends—a Democrat and a Republican—travel across America "on a deeply personal journey through the heart of a divided nation . . . to find growth, hope and fundamental strength in their own lives" (Bob Woodward) and the country they love, in good times and bad. In the year before Donald Trump was elected president, Jordan Blashek, a Republican Marine, and Chris Haugh, a Democrat and son of a single mother from Berkeley, CA, formed an unlikely friendship. Jordan was fresh off his service in the Marines and feeling a bit out of place at Yale Law School. Chris was yearning for a sense of mission after leaving Washington D.C. Over the months, Jordan and Chris's friendship blossomed not in spite of, but because of, their political differences. So they decided to hit the road in search of reasons to strengthen their bond in an era of strife and partisanship. What follows is a three-year adventure story, across forty-four states and along 20,000 miles of road to find out exactly where the American experiment stands at the close of the second decade of the twenty-first century. In their search, Jordan and Chris go from the tear gas-soaked streets of a Trump rally in Phoenix, Arizona to the Mexican highways running between Tijuana and Juarez. They witness the full scope of American life, from lobster trawlers and jazz clubs of Portland and New Orleans to the streets of Tulsa, Oklahoma and the prisons of Detroit, where former addicts and inmates painstakingly put their lives back together. Union is a road narrative, a civics lesson, and an unforgettable window into one epic friendship. We ride along with Jordan and Chris for the whole

journey, listening in on front-seat arguments and their conversations with Americans from coast to coast. We also peer outside the car to understand America's hot-button topics, including immigration, mass incarceration, and the military-civilian divide. And by the time Jordan and Chris kill the engine for the last time, they answer one of the most pressing questions of our time: How far apart are we really?

This volume makes the case for global visioning: the collective process of looking at a larger picture and building common ground for the future. The contributors agree that only by such a process will people be able to address mounting problems like global warming, war, terrorism, and poverty, which threaten the Earth's population. This latest volume in the Peace & Policy series addresses three main themes. "On Spirituality and Ethics" advocates an international culture of nonviolence. "International and Transnational Relations" makes a case for global fellowship. "On Education and Culture" argues that educating children is the first step in reforming the world. The contributors seek solutions to the question of how people can start seeing issues from a global point of view, rather than from narrow national perspectives. In keeping with the global nature and scope of the world's problems, the contributions come from very diverse countries, including Japan, Morocco, South Africa, Germany, Italy, Belgium, and the United States. This work will inspire participation in this much-needed exercise of collective global problem solving.

Written by the Mayor of Beaufort, SC, "Sharing Common Ground: Promises Unfilled but Not Forgotten" is a call to action for the nation to learn the informative untold stories of the Reconstruction Era during and following the Civil War. Understanding this period can help unshackle us from our unknown past and help us understand, where we can from, why the chaotic racial discord separates us and how through history we can rebound to be the America that promises freedom, social, legal and economic justice and opportunity for all. Having achieved the Reconstruction Era National Historical Park in his hometown in 2019, the Mayor and many who worked to attain recognition of this important period, are reaching out to assemble a network of teachers who are learning how to teach, through experiential arts infused methods, the sensitive subject to 11-15 year old students who ask the questions about people, places and stories and then tell them to their peers, families and others in a vernacular that all can understand. Students will produce short documentary videos, visual art, and written and spoken words to delivery their messages so that others can understand. The net result will be conversations in homes, among faith based and community organizations, publications and materials for teachers to share.

This book brings together academics, legal practitioners and activists with a wide range of pro-choice, pro-life and other views to explore the possibilities for cultural, philosophical, moral and political common ground on the subjects of abortion and reproductive justice more generally. It aims to rethink polarized positions on sexuality, morality, religion and law, in relation to abortion, as a way of laying the groundwork for productive and collaborative dialogue. Edited by a leading figure on gender issues and emerging voices in the quest for reproductive justice - a broad concept that encompasses the interests of men, women and children alike - the contributions both search for 'common ground' between opposing positions in our struggles around abortion, and seek to bring balance to these contentious debates. The book will be valuable to anyone interested in law and society, gender and religious studies and philosophy and theory of law.

The partisan divide in the United States has widened to a chasm. Legislators vote along party lines and rarely cross the aisle. Political polarization is personal, too—and it is making us miserable. Surveys show that Americans have become more fearful and hateful of supporters of the opposing political party and imagine that they hold much more extreme views than they actually do. We have cordoned ourselves off: we prefer to date and marry those with similar opinions and are less willing to spend time with people on the other side. How can we loosen the grip of this toxic polarization and start working on our most pressing problems? *The Way Out* offers an escape from this morass. The social psychologist Peter T. Coleman explores how conflict resolution and complexity science provide guidance for dealing with seemingly intractable political differences. Deploying the concept of attractors in dynamical systems, he explains why we are stuck in this rut as well as the unexpected ways that deeply rooted oppositions can and do change. Coleman meticulously details principles and practices for navigating and healing the difficult divides in our homes, workplaces, and communities, blending compelling personal accounts from his years of working on entrenched conflicts with lessons from leading-edge research. *The Way Out* is a vital and timely guide to breaking free from the cycle of mutual contempt in order to better our lives, relationships, and country.

For four years, Diane Hessian has been in weekly conversation with voters across the United States.

What she has learned will surprise you, enlighten you, give you hope, and change the way you think about your fellow Americans. Our inability to hear each other, our suspicion, and our impatience is stressing us out and tearing us apart. It's a sickness that permeates the American culture, erodes our collective mental health, and makes us hate each other. To gain insight into how we can move forward, Hesson undertook a massive listening project, conducting an ongoing series of weekly interviews with 500 voters from every state, of every age and ethnicity, and along different points of the political spectrum. The topics ranged from race to guns, from character to party politics, from masks to rallies, from the Supreme Court to the pandemic to immigration and climate change. After more than a million individual communications, two things became clear: We have more common ground than we realize. And we are, sadly, failing at understanding each other. On issue after issue, our "divided" nation isn't nearly as polarized as we imagine. An overwhelming majority of voters believe in commonsense gun licensing and regulation. They are pro-immigration. They believe climate change is real and the coronavirus is deadly. They care deeply about their families and are willing to work hard to make ends meet. And, they believe that Washington is slow, bureaucratic, and not working in their best interests. In dozens of columns on these topics published in *The Boston Globe*, Hesson has upended common political wisdom. Presented together for the first time as part of this book, they reveal a unique perspective on how Americans actually think, what they value, and how we can move forward. The path to healing our divided nation is both simple and profound. We must turn down the heat. We must begin to listen, to stop presuming, to try to understand, to treat each other with dignity, and to know that most Americans are not crazy radicals. We truly share common ground. If we can pull together, we can have a much better America.

When it comes to Confederate monuments, there is no common ground. Polarizing debates over their meaning have intensified into legislative maneuvering to preserve the statues, legal battles to remove them, and rowdy crowds taking matters into their own hands. These conflicts have raged for well over a century--but they've never been as intense as they are today. In this eye-opening narrative of the efforts to raise, preserve, protest, and remove Confederate monuments, Karen L. Cox depicts what these statues meant to those who erected them and how a movement arose to force a reckoning. She lucidly shows the forces that drove white southerners to construct beacons of white supremacy, as well as the ways that antimonument sentiment, largely stifled during the Jim Crow era, returned with the civil rights movement and gathered momentum in the decades after the Voting Rights Act of 1965. Monument defenders responded with gerrymandering and "heritage" laws intended to block efforts to remove these statues, but hard as they worked to preserve the Lost Cause vision of southern history, civil rights activists, Black elected officials, and movements of ordinary people fought harder to take the story back. Timely, accessible, and essential, *No Common Ground* is the story of the seemingly invincible stone sentinels that are just beginning to fall from their pedestals.

This thought-provoking volume confronts the expected tension between care and justice as moral orientations. These original essays, by renowned educators, reveal how these two moral orientations can work together to produce wiser and more practical policies and practices. The authors explore problems at every level of education and tackle tough questions in theory, practice, and policy making. Using real-life examples, they illustrate the great value of theoretical collaboration, instead of competing with each other, justice and care should complement each other in both moral theory and practice. Contents and Contributors: PART I: Theory of Justice and Caring (1) Care, Justice, and Equity—Nel Noddings (2) Justice, Caring, and Universality: In Defense of Moral Pluralism—Kenneth A. Experience of Community A Search for Common Ground Conversations about the Toughest Questions in K-12 Education At a time of bitter national polarization, there is a critical need for leaders who can help us better communicate with one another. In *A Search for Common Ground*, Rick Hess and Pedro Noguera, who have often fallen on opposing sides of the ideological aisle over the past couple of decades, candidly talk through their differences on some of the toughest issues in K-12 education today--from school choice to testing to diversity to privatization. They offer a sharp, honest debate that digs deep into their disagreements, enabling them to find a surprising amount of common ground along the way. Written as a series of back-and-forth exchanges, this engaging book illustrates a model of responsible, civil debate between those with substantial, principled differences. It is also a powerful meditation on where 21st-century school improvement can and should go next. Book Features: Modeling dialogue: Rick and Pedro provide a model for how to sort through complicated issues and find common ground in today's atmosphere of distrust. Deliberate, sustained exchange: Rick and Pedro demonstrate how deliberate, sustained reflection allows them to respectfully flesh out differences and sharpen their own thoughts. Left and Right Politics: Rick (generally Right) and Pedro (generally Left) offer a window into where they do and don't agree on education and point the way to principled cooperation. Readable and conversational: Rather than pushing a partisan agenda, Rick and Pedro have crafted a stimulating read for education newcomers and experts alike. Unique approach: While other books about the different sides of the education

debates simply present paired essays, Rick and Pedro actually engage with each other to strive for a deeper understanding of their differences. A Search for Common Ground Conversations about the Toughest Questions in K-12 Education

Over the past forty years, media education research has emerged as a historical, epistemological and practical field of study. Shifts in the field—along with radical transformations in media technologies, aesthetic forms, ownership models, and audience participation practices—have driven the application of new concepts and theories across a range of both school and non-school settings. The Handbook on Media Education Research is a unique exploration of the complex set of practices, theories, and tools of media research. Featuring contributions from a diverse range of internationally-recognized experts and practitioners, this timely volume discusses recent developments in the field in the context of related scholarship, public policy, formal and non-formal teaching and learning, and DIY and community practice. Offering a truly global perspective, the

Handbook focuses on empirical work from Media and Information Literacy (MIL) practitioners from around the world. The book's five parts explore global youth cultures and the media, trans-media learning, media literacy and scientific controversies, varying national approaches to media research, media education policies, and much more. A ground breaking resource on the concepts and theories of media research, this important book: Provides a diversity of views and experiences relevant to media literacy education research Features contributions from experts from a wide-range of countries including South Africa, Finland, India, Italy, Brazil, and many more Examines the history and future of media education in various international contexts Discusses the development and current state of media literacy education institutions and policies Addresses important contemporary issues such as social media use; datafication; digital privacy, rights, and divides; and global cultural practices.
