The rich history and social significance of the "Divine Nine" African American Greek-letter organizations is explored in this comprehensive anthology. In the long tradition of African American benevolent and secret societies, intercollegiate African American fraternities and sororities have strong traditions of fostering brotherhood and sisterhood among their members, exerting considerable influence in the African American community and being in the forefront of civic action, community service, and philanthropy. Dr. Martin Luther King, Jr., Toni Morrison, Arthur Ashe, and Sarah Vaughn are just a few of the trailblazing members of these organizations. African American Fraternities and Sororities places the history of these organizations in context, linking them to other movements and organizations that predated them and tying their history to the Civil Rights movement. It explores various cultural aspects of the organizations, such as auxiliary groups, branding, calls, and stepping, and highlights the unique role of African American sororities.

In the wake of the 1967 Detroit riots, in which 43 people were killed, President Lyndon Johnson established the National Advisory Commission on Civil Disorders and posed these questions: What happened? Why did it happen? What can be done to prevent it from happening again? The commission concluded that white racism spurred the violence and that "our society is moving toward two societies, one black, and one white—separate and unequal." "The State of Black Michigan" takes Johnson's questions further and applies them to Michigan's black citizens today: Are the ingredients of the explosive mixture that erupted in 1967 still present? What differences are there forty years later? Is Michigan in fact a state with two separate and unequal societies? The twenty essays in this volume pursue the answers to these questions by studying a broad range of topics, including socioeconomic inequality, black self-help, black business development, residential segregation, crime, health, and political repr

Who's who Among Black Americans Americana Group Publishing  
"During the college years most students face the three most important decisions of life: the choice of a vocation, the choice of a mate, the choice of a way of life. Their experience in the college years may help them move toward the crucial decisions, or it may bog them down in indecision. But colleges afford resources to help students make decisions that can open up a happy and effective life. For instance, the college curriculum offers courses that develop interest and skill in various fields of knowledge related to many occupations. College courses are organized in sequences that lead to the choice of a major field in which to specialize, and to an occupation in which the knowledge and skill can be applied. The student has a course mapped out for him to follow, leading to an occupational choice and a career. The college years also provide close and frequent association with students of both sexes. On a coeducational campus, or during weekends at a men's or women's college, association with students of the opposite sex offers unsurpassed opportunity for acquaintance to ripen into friendship, friendship into courtship and marriage. Perhaps never again will a student find so many people of his age and of like abilities and interests so conveniently grouped together. Even the inevitable rules and regulations, the organizations and committees, that seem so confining or boring, help students develop enduring patterns of living and working with others. The values found in college life also endure as a foundation of the way of life followed in later years"--Introduction. (PsycINFO Database Record (c) 2013 APA, all rights reserved).

The Paper Bag Principle: Class, Colorism, and Rumor in the Case of Black Washington, D.C. considers the function of oral history in shaping community dynamics among African American residents of the nation's capitol. The only attempt to document rumor and legends relating to complexion in black communities, The Paper Bag Principle looks at the divide that has existed between the

black elite and the black "folk." The Paper Bag Principle focuses on three objectives: to record lore related to the "paper bag principle" (the set of attitudes that granted blacks with light skin higher status in black communities); to investigate the impact that this "principle" has had on the development of black community consciousness; and to link this material to power that results from proximity to whiteness. The Paper Bag Principle is sure to appeal to scholars and historians interested in African American studies, cultural studies, oral history, folklore, and ethnic and urban studies.

Entrepreneurial Leadership is written for K-12 educational leaders who understand their critically important role as motivators, influencers, and entrepreneurs. These are leaders who have a mindset for pursuing opportunities that positively impact their organizations. They know that they need to go beyond their own institutions to see and seize opportunities that will bring resources and services to their schools to help their students achieve. This book helps them to develop and use their entrepreneurial skills to cultivate partnerships with businesses, community organizations and individuals, and colleges/universities. General and specific guidelines are provided to initiate, develop, implement, evaluate, and sustain partnerships. Such partnerships can be with individuals, groups, institutions, organizations, and corporations at the local, regional, statewide, and national levels. Policies, procedures, and practices for effective negotiations within school systems and with potential partners are included throughout the book to promote enriched opportunities and noteworthy successes.

In its totality, this book explores subjects that are rarely available in primary literature publications and brings diverging fields together that are generally addressed separately in specialty journals. The book argues that past school failures are instructive. The author identifies the structural and emotional triggers that make it difficult for educators' to overcome the social constructs that control the progress of Black students, reproduce inequities, subvert the socio-economic progress of the nation, and threaten the legitimacy of the U.S. public school system. One failure is informative; successive school failures are chock-full of must avoid school policies and instructional practices. The book analyzes the lessons learned from a list of school-imposed policies that have molded and determined the academic progress of Black students. The author argues that much can be discerned from that which undermined the performance of schoolteachers' and public school systems. The quantifiable outcomes of past school practices can better inform educators and future teachers and school leaders. The book carefully analyzes the organic evolution of educators' social constructs that regenerated inequities to reveal the road map for rebuilding genuinely inclusive and equitable public school systems that serve the interests of students and society. The book also provides in-depth analysis of various disciplines that identify the best methodologies to improve the teaching and learning of Black students, homeless students, and all other students. The book aims to offer a unique perspective by

carefully unfolding the built in school structures that obstruct the abilities of school administrators and teachers to bridge the student achievement gaps and meet the objectives of consecutive school reform initiatives. The author's distinctive approach stimulates the thinking of the entire field of education, and challenges accepted propositions commonly assumed about African American students. In short, this book offers a perspective that is rarely shared or understood by educators and practitioners in the field of education.
