MACK NATHANIAL

Tropical Deforestation and Climate Change Legare Street Press
 "This book provides an analysis of the recent governance of the Amazon in Brazil, Peru, Bolivia and Colombia with a particular focus on deforestation processes, demonstrating that current policies and political and socioeconomic dynamics in the four countries are risking the forest's resilience. The authors examine and compare Amazonian politics and policies under different administrations, concentrating on the main actors, policies and dynamics that have affected the region, as well as on the institutional and political environment in which deforestation processes were embedded in different periods. Essentially, the book makes an analytical contribution towards a better understanding of the political, economic and social challenges confronting conservation policy in the Amazonian countries.
Climate Change and Biodiversity Governance in the Amazon: At the Edge of Ecological Collapse? is essential reading for students and researchers in the fields of environmental studies and sustainability, Latin American studies, political science and international relations, as well as for policymakers and practitioners working in conservation and development"--
An Introduction to the Old Testament in Greek Cambridge University Press
 Focus on the Five Practices: A Congregation-Wide Initiative Based on the book, *Five Practices of a Fruitful Congregation* by Bishop Robert Schnase Imagine a congregation-wide focus on these practices that includes a five week sermon series, five weeks with every household reading daily devotions and sharing prayers on these practices, five weeks of leadership teams and small groups stimulated to take new initiatives, five weeks of conversation and commitment focused on the mission of the church. These are the practices that lead to excellence and fruitfulness, and they can change your church. Imagine! *Five Practices - Passionate Worship* is a planning workbook for use in group study. It helps lead the group to develop a plan to implement the practices of *Passionate Worship* in your congregation. **FREE TEACHING GUIDE!** Click here to download the free Teaching Guide for "Passionate Worship."
The Agricultural College Of The State Of Michigan BRILL
 Neurons in the brain communicate by short electrical pulses, the so-called action potentials or spikes. How can we understand the process of spike generation? How can we understand information transmission by neurons? What happens if thousands of neurons are coupled together in a seemingly random network? How does the network connectivity determine the activity patterns? And, vice versa, how does the spike activity influence the connectivity

pattern? These questions are addressed in this 2002 introduction to spiking neurons aimed at those taking courses in computational neuroscience, theoretical biology, biophysics, or neural networks. The approach will suit students of physics, mathematics, or computer science; it will also be useful for biologists who are interested in mathematical modelling. The text is enhanced by many worked examples and illustrations. There are no mathematical prerequisites beyond what the audience would meet as undergraduates: more advanced techniques are introduced in an elementary, concrete fashion when needed.
Moody's International Manual Regnery Publishing
 This book offers a unique perspective on the history of agricultural education in the United States, focusing on the founding and early years of the Agricultural College of the State of Michigan (now Michigan State University). Through firsthand accounts and historical records, readers can learn about the challenges and opportunities facing early agricultural educators and their students. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.
The Diary of Heinrich Witt (10 vols.) Jovis Verlag
Atom-Photon Interactions: Basic Processes and Applications allows the reader to master various aspects of the physics of the interaction between light and matter. It is devoted to the study of the interactions between photons and atoms in atomic and molecular physics, quantum optics, and laser physics. The elementary processes in which photons are emitted, absorbed, scattered, or exchanged between atoms are treated in detail and described using diagrammatic representation. The book presents different theoretical approaches, including: Perturbative methods The resolvent method Use of the master equation The Langevin equation The optical Bloch equations The dressed-atom approach Each method is presented in a self-contained manner so that it may be studied independently. Many applications of these approaches to simple and important physical phenomena are given to illustrate the potential and limitations of each method.
Johns's Notable Australians Architect Publications
 Although interest in machine learning has reached a high point, lofty expectations often scuttle projects before they get very far. How can machine learning—especially deep neural

networks—make a real difference in your organization? This hands-on guide not only provides the most practical information available on the subject, but also helps you get started building efficient deep learning networks. Authors Adam Gibson and Josh Patterson provide theory on deep learning before introducing their open-source *Deeplearning4j* (DL4J) library for developing production-class workflows. Through real-world examples, you'll learn methods and strategies for training deep network architectures and running deep learning workflows on Spark and Hadoop with DL4J. Dive into machine learning concepts in general, as well as deep learning in particular Understand how deep networks evolved from neural network fundamentals Explore the major deep network architectures, including Convolutional and Recurrent Learn how to map specific deep networks to the right problem Walk through the fundamentals of tuning general neural networks and specific deep network architectures Use vectorization techniques for different data types with DataVec, DL4J's workflow tool Learn how to use DL4J natively on Spark and Hadoop
Dictionary of Indian Biography Food & Agriculture Org.
 Investigates the political and financial forces that have shaped AIDS research, including the growing dissension within scientific ranks, the power politics among virologists, and other controversial issues
Estimating Biomass and Biomass Change of Tropical Forests John Wiley & Sons
 People are searching for a church shaped and sustained by Radical Hospitality, Passionate Worship, Intentional Faith Development, Risk-Taking Mission and Service, and Extravagant Generosity. These fundamental practices are critical to the success of congregations. Their presence and strength demonstrate congregational health, vitality, and fruitfulness. By repeating and improving these practices, churches fulfill their mission to make disciples of Jesus Christ for the transformation of the world. Robert Schnase astutely weaves theological insight, practical advice, and exemplary stories into an inspiring book for pastors and laity alike. —L. Gregory Jones, Dean and Professor of Theology, Duke Divinity School Robert Schnase's words are thoughtful, provocative, and challenging. Any congregation will find encouragement and insight to deepen faithfulness and multiply fruitfulness. —Lovett H. Weems, Jr., Distinguished Professor of Church Leadership, Wesley Theological Seminary Stimulating. Challenging. Uniquely helpful. Bishop Schnase gives us powerful language, rich examples, and practical suggestions for fulfilling the mission God gives us. —Janice Riggle Huie, Bishop of the Texas Conference of The United Methodist Church
Spiking Neuron Models Springer Science & Business Media
 Working from home, online shopping, undertourism: the disruptive

upheavals caused by the COVID-19 pandemic challenge architecture and urban planning. New spaces for action are opening up, but are they being utilized? From dividing traffic space fairly to urban food policies, from new places for work and recreation to the question on how communities can be oriented towards the common good: Post-pandemic Urbanism envisions a near future and discusses how cities and their transformative power can help to handle this current crisis and those to come.

The Lichen Book Abingdon Press

The Social Contours of Risk Volume I: Publics, Risk Communication and the Social Amplification of Risk We live in a 'risk society' where the identification, distribution and management of risks, from new technology, environmental factors or other sources are crucial to our individual and social existence. In *The Social Contours of Risk*, Volumes I and II, two of the world's leading and most influential analysts of the social dimensions of risk bring together their most important contributions to this fundamental and wide-ranging field. Volume I collects their fundamental work on how risks are communicated among different publics and stakeholders, including local communities, corporations and the larger society. It analyses the problems of lack of transparency and trust, and explores how even minor effects can be amplified and distorted through media and social responses, preventing effective management. The final section investigates the difficult ethical issues raised by the unequal distribution of risk depending on factors such as wealth, location and genetic inheritance - with examples from worker and public protection, facility-siting conflicts, transporting hazardous waste and widespread impacts

such as climate change.

Gender Dynamics and Post-conflict Reconstruction Otto Harrassowitz Verlag

A dictionary of biography containing records of the careers of men and women of distinction in the Commonwealth of Australia and the Dominion of New Zealand.

Gear Handbook Peter Lang

This book provides both the research and practitioner communities with a comprehensive coverage of the metaheuristic methodologies that have proven to be successful in a wide variety of real-world problem settings. Moreover, it is these metaheuristic strategies that hold particular promise for success in the future.

The various chapters serve as stand alone presentations giving both the necessary background underpinnings as well as practical guides for implementation.

Deep Learning McGraw-Hill Companies

Verse work on mercury and its uses in the ayurvedic system in Indian medicine.

The Ancient Geography of India Abingdon Press

This book is a fascinating journey along the history of architectural structures over the last 150 years, taking the World Expos as an original unifying thread. Nevertheless, it does not solely focus on the exhibition buildings; on the contrary, these are continuously being related to buildings beyond the scope of the Expos, thus ultimately providing a general vision of the history of modern structures. This essay is destined to become an essential work of reference within the history of architectural structures. It is generously illustrated with more than nine hundred large-scale

illustrations, many of which have not appeared in contemporary publications. It offers innumerable facts that will interest architects, engineers or art historians. Likewise, members of the general public far-removed from these fields will also be able to enjoy many of the passages which are accessible to those who do not have any specific knowledge of architecture or engineering.

The Russian Revolution, 1917-1921 "O'Reilly Media, Inc."

The diary of Heinrich Witt (1799-1892) is the most extensive private diary written in Latin America known to us today. Written in English by a German migrant who lived in Lima, it is a unique source for the history of Peru, and for international trade and migration.

Current Experiments in Elementary Particle Physics Earthscan
Tropical deforestation, fires and emissions: measurement and monitoring; How to reduce deforestation emissions for carbon credit: compensated reduction; Policy and legal frameworks for reducing deforestation emissions.

Atom-Photon Interactions

This volume by international authors deals with the role of gender dynamics in the development of post-conflict societies. The authors describe and analyze diverse aspects of the intertwining of gender and other social and cultural relations from an interdisciplinary perspective. They analyze gendered post-conflict dynamics in diverse contexts asking for the consequences these developments have in the settings under investigation, such as Eastern and Southeastern Europe, Palestine and Afghanistan.
