NFPA 14: Standard for the Installation of Standpipe and Hose Systems, 2010 Edition Oxford Business Group
 Providing a detailed and comparative assessment of the humanitarian responses to a series of major disasters in Asia over the past two decades, including massive earthquakes, volcanic eruptions, and tsunamis, this book explores complex and changing understandings and practices of relief, recovery, and reconstruction. These critical investigations raise questions about the position and responsibilities of a growing range of stakeholders, and provide in-depth explorations of the ways in which local communities are transformed on multiple levels - not only by the impact of disaster events, but also by the experiences of rebuilding. This timely volume highlights how the experiences of Asia can contribute towards post-disaster responses globally, to safeguard future communities and reduce vulnerabilities. This

is a valuable resource for academic researchers interested in post-disaster transformations and development studies, practitioners in NGOs, and government officials dealing with disaster response and disaster risk reduction.

Summary of World Broadcasts Aspen Law & Business

The relationship between government and the businesses that contribute towards the defence and security of the state is a

critical one; it often underscores a modern state's foreign policy and sense of place in the world. Yet, despite its clear importance, this subject is underexplored and rarely analysed in a rigorous manner. As a consequence, government defence industrial policies, if they exist at all, often seem somewhat contrived, ill-considered and contradictory. The Defence Industrial Triptych systematically analyses the components and drivers of the relationships that bind a government to its defence industrial base by examining three major case studies: the UK, US and Germany, who between them account for over three quarters of NATO defence spending. The features of their defence industrial relationships - whether common or unique - provide vital lessons for policy-makers, industrialists and the taxpayer. As defence cuts bite across NATO and as the UK approaches the 2015 Strategic Defence and Security Review, the relationships this Whitehall Paper considers are more important than ever.

Qatar Oxford University Press

This book makes an original contribution to our knowledge of the world's major defence industries. Experts from a wide range of different countries - from the major economies of North America and Western Europe to developing economies and some unique cases such as China, India, Singapore, South Africa and North Korea - describe and analyse the structure, conduct and performance of the defence industry in that country. Each chapter opens with statistics on a key nation's defence spending, its spending on defence R&D and on procurement over the period 1980 to 2017, allowing for an analysis of industry changes following the end of the Cold War. After the facts of each industry, the authors describe and analyse the structure, conduct and performance of the industry. The analysis of 'structure' includes discussions of entry conditions, domestic monopoly/oligopoly structures and opportunities for competition. The section on 'conduct' analyses price/non-price competition, including private and state funded R&D, and 'performance' incorporates profitability, imports and exports together with spin-offs and technical progress. The conclusion explores the future prospects for each nation's defence industry. Do defence industries have a future? What might the future defence firm and industry look like in 50 years' time? This volume is a vital resource and reference for anyone interested in defence economics, industrial economics, international relations, strategic studies and public procurement.

The Oil & Gas Year Qatar 2010 Oxford Business Group
Governance in the Middle East is topic of interest to scholars, activists and policy makers. The currently proposed book is intended to present the first comprehensive framework of the question of governance in the Middle East in its various forms and manifestations: political, economic, and government performance. This study will supply the context that is missing in the existing literature on, perhaps, the last bastion of authoritarianism in the world. Proposed Contents This book will be structured into two parts: Part I (Chapters 1-11) provides some theoretical background and analyzes the patterns and challenges of governance in the Middle East, providing some global context; Part II (12-Conclusion) will examine specific cases in selected countries and regions in the Middle East. Part I: Theory and Context Chapter 1 will be an introduction describing the main aspects of the book and highlighting the main points made by the contributors. Chapter 2 will present the theoretical dimensions of governance and review the "state of the discipline" and the latest trends in the literature on governance. The author of this chapter will be an authority in the subject of governance, but does not have to be necessarily a Middle East scholar. Chapter 3 will examine the general political trends in the Middle East and provide a historical background: nation-state formation, colonial

and postcolonial experiences in the Middle East and the nature of the Middle Eastern political environment at the present time. Chapter 4 will look into the economic aspects of governance in the Middle East and contextualize the economic challenges and deficiencies affecting the region. Chapter 5 will examine the areas of success and failure in government performance in the region and the aspects of human development. Chapter 6 will look into the role of religion in shaping the governance in the Middle East. After all, most Middle Eastern governments declare Islam as the State religion, while a few consider Islam the source of governance and legislation (e.g. Saudi Arabia and Iran). Chapter 7 will shed light on the sectarian division among Muslims (Shi'a vs. Sunnis) and the significance of this division for the governance, particularly in countries where the ruling groups belong to a different sect than the governed, such as Bahrain, Saudi, Kuwait and Lebanon. Chapter 8 will examine relation between the state of governance in the Middle East and the progress of human rights, or lack thereof. The Middle East remains one of the most troubling regions on human rights and the respect for human dignity. All of the region's governments are heavily implicated in very serious violations of the most basic in human rights. Chapter 9 will focus on the status of women in the Middle East and the governmental performance in the region in relevance to women rights and status. The recent years have witnessed many positive changes in this regard, but there remains a lot of work to be done, which is going to be outlined in this chapter. Chapter 10 will look into the role of oil and other natural sources in shaping the economic and political performance of Middle Eastern governments. Also, it will shed light on the various ways these governments distribute the revenues (rents) from these resources and how they use them, or don't, in the development of their countries or, in most cases, on the military and state oppressive machine. Chapter 11 will examine the role of international organizations and trade agreements on the performance of governments and whether or not such factors influence or shape governance in the region. It is well-known that Turkey has changed many of its laws and social policies in response to the demands of EU members and in hopes of being admitted into the EU. The chapter will elaborate on this and similar cases throughout the region. Part II: Case Studies Chapter 12 will examine the case of Iraq. The country is experiencing perhaps the most dramatic scenarios of governance in the region. This chapter will shed light on the unfolding political process and the struggle of Iraqis to forge a path toward democracy in a region determined to resist any political change within its boundaries. Key issues: Power-sharing, pluralism, federalism, ethnic and sectarian conflict, trust-building, corruption and political violence. Chapter 13 will examine the case of Iran. Thirty years after the Islamic Revolution, Iran is entering into a soul-searching phase in its history. The ongoing battle between the reformers and the hardliners is only a sign on the larger problem of governance. A majority of Iranians have no personal recollection of the problems that led to the Revolution. It is vitally important that the government changes its claims to legitimacy from being the force that toppled the Shah to being the provider of prosperity and development of the country and its young population. Key issues: Political reform, human rights, reconciliation with the West, allocation of resources and services. Chapter 14 will examine the case of Egypt. The country is facing an unknown future with President Mubarak reaching advanced age. The debate over his succession is dividing the country in a dramatic way. Egypt is also a country with depleted infrastructure and an ever-shrinking middle class. If the country falls into a violent cycle after the looming departure of Mubarak, the entire region could fall into the abyss. Key issues: Succession of

Mubarak, economic performance, services, religious extremism (Muslim Brotherhood) and Nationalism. Chapter 15 will examine the case of Israel. While politically different from its neighbors, Israel is sinking fast into the same problems that plague the Middle East. The country suffers political corruption and many leadership crises. The government is trying to redefine the identity of the state, which is going to create a showdown with the fast-growing non-Jewish Israeli population, and there is the problem of the government's inability to conclude peace with Israel's neighbors. Key issues: corruption, violence and security. Chapter 16 will examine the case of Saudi Arabia. The country is perhaps the most authoritarian regime in the world. The lack of individual liberties and abuses of human rights are the main problems. The government's treatment of its Shia subjects (approx. 12% of the population) as second-class residents is extremely troubling. The country does not have a meaningful public participation and the Royals who run the government have no accountability to anyone. Key issues: human rights, religious freedom, political reform, public participation. Chapter 17 will examine the case of Bahrain. This small country in the Persian Gulf is facing many challenges. Like Iraq before 2003, it is a country with a clear Shia majority ruled by a small Sunni minority. The Shia are excluded from the government (they were allowed to run for the parliament in the last election for the first time), the military and many other important arenas. The government uses the naturalization of Sunnis as a political tool to change the demographic balance in the country. Key issues: political reform, popular participation, naturalization, human rights. Chapter 18 will examine the case of Yemen. The current struggle over government performance and fairness toward the South has given rise to the calls for separation of the two parts of Yemen. Also, there is the issue of religious freedom, which cases the ongoing war with the Houthi faction that accuses the government of making alliance with the Saudi government and the Sunni extremists in the country to form an existential threat to Shi'ism. Yemen is also a country with many ungoverned spaces and the governance in the "governed" areas is abysmal. Key issues: political violence, human and religious rights, terrorism, tribalism and poverty. Chapter 19 will examine the case of Turkey and its impressive rise as a model for a strong Muslim nation which tries to reconcile Islam and democracy. Turkey's longstanding problems with social rights, especially of its 12 million Kurds, have always been a formidable challenge to the image of the nation. However, the country's bid to join the EU has forced many changes that inadvertently helped the government's international standing. Chapter 20 will examine the case of Syria and the influence of the Arab nationalist ideology on keeping the country as one of the most oppressive regimes in the region. Also examined will be the affect of Syrian-Israeli conflict on the country's governance. Chapter 21 examines the case of Lebanon. This country which witnessed more governance challenges than any other in the region makes a very interesting case study. The country's sectarian politics and the client-patron relations and loyalties among the various Muslim and Christian elements of society have undermined the country's potential to become a fully democratic state. Chapter 22 will focus on the case of Sudan. This country has been in the center of world attention because of the internal conflict and the accusations of serious violations of human rights and the rise of separatist movements that receive much foreign sympathy and support. The country has missed many opportunities to attain social and political reconciliation, but it should not be considered a lost cause. There is a lot of potential in the country, especially when we consider the vibrant politics of government and opposition. Chapter 23 will examine the case of Jordan and the role of the uniqueness of the

regime in creating relative social and political stability. Unlike the most of the governments in the region, the Jordanian Monarchy keeps the government as a convenient buffer between the Royals and the people. When popular sentiments turn very negative, the King, acting as the good cop, dismisses the government and orders the formation of a new one. Also, Jordan has achieved some good success in absorbing the Islamist groups into the political system, but not without challenges. The chapter will also focus on the Palestinian factor - Palestinians make more than half of the Jordanian population. Chapters 24, 25 & 26 will examine the Maghreb states (Morocco, Algeria and Tunisia). These states face many challenges in their governance: separatism, terrorism and the government oppressive history in Morocco; the Islamism challenge, internal war in the tribal areas and ethnic conflict in Algeria; and the stifling of personal freedom and liberties in Tunisia in the name of secularism and the war on extremism are all challenges that need to be highlighted in a chapter about each country. Chapter 27 will focus on governance in Libya. Having ruled the country for forty-seven years, the Libyan president is the dean of Middle Eastern dictators. He has taken his country through all kinds of political adventures. The rule through popular committees is a unique system that gives Col. Mu'ammarr Qadhafi the opportunity to oppress through popular participation and acquiescence. Chapter 28 will focus on the governance in the United Arab Emirates. This confederation of seven emirates has witnessed some excellent success in the economic and infrastructural development, especially in Dubai, which competes with the richest cities in the world, thanks to the energy and vision of its Emir, Muhammad b. Rashid. While it is generally considered much better than its fellow Gulf States, the UAE has its own challenges, especially in light of the absence of unified system of governance, because each emirate has the autonomy to shape its internal affairs. Chapter 29 will examine the governance and, in certain cases, lack thereof in the countries that form the Horn of Africa, i.e. Somalia, Eritrea and Djibouti. These countries face some tremendous challenges in the areas of refugees, resources, stability and ethnic & conflict. The failure of these states, as seen in the case of Somalia, can make the problems of security in the whole region much worse than it is now. Famine and anarchy have already led to wars, piracy and the flood of refugees, not to say much about the humanitarian catastrophes in the region. This chapter will highlight the problems of governance in these often forgotten countries. Chapter 30 will be a conclusion and final remarks on the general framework of the regional governance and the way forward. This book is aimed at a wide variety of audience. Policy makers, policy analysts, as well as journalists will benefit from the history and analysis that will be presented in the book. Also, academics will find in the book important materials for research and class work. Professors teaching courses on US Foreign policy, Middle East, International Relations, Comparative Politics and many related fields will find the book a very suitable choice for their students to read. Given the media and general public's interest in the Middle East and the Middle East, the book will also appeal to a wide range of educated readers in the United States, the United Kingdom and many other countries world-wide.

 Qatar's support for regional Muslim Brotherhood organizations and its Al Jazeera media network have contributed to a backlash against Qatar led by fellow GCC states Saudi Arabia and the UAE. In June 2017, Saudi Arabia, the UAE, and Bahrain, joined by Egypt and a few other governments, severed relations with Qatar and

imposed limits on the entry and transit of Qatari nationals and vessels in their territories, waters, and airspace. The Trump Administration sought a resolution of the dispute, in part because the rift was hindering U.S. efforts to formalize a "Middle East Strategic Alliance" of the United States, the GCC, and other Sunni-led countries in the region to counter Iran. Qatar has countered the Saudi-led pressure with new arms purchases and deepening relations with Turkey and Iran. On January 5, 2021, Saudi Arabia, the UAE, Bahrain, and Egypt agreed to lift the blockade, and Qatar agreed to drop its pursuit of legal cases against those countries in international organizations. Qatar's leaders work with the United States to secure the Persian Gulf, as do the other GCC leaders. The United States and Qatar have had a formal Defense Cooperation Agreement (DCA) that reportedly addresses a U.S. troop presence in Qatar, consideration of U.S. arms sales to Qatar, U.S. training, and other defense cooperation. Under the DCA, Qatar hosts more than 8,000 U.S. forces and the regional headquarters for U.S. Central Command (CENTCOM) at various military facilities, including the large Al Udeid Air Base. U.S. forces deployed at these facilities participate in operations throughout the region. Qatar is a significant buyer of U.S.-made weaponry, including combat aircraft. In January 2018, Qatar and the United States inaugurated a "Strategic Dialogue" that has included discussion of efforts to improve accommodations for U.S. personnel deployed to Al Udeid Air Base. In 2017, the United States and Qatar signed a broad memorandum of understanding to cooperate against international terrorism. The voluntary relinquishing of power in 2013 by Qatar's former Amir (ruler) departed from GCC patterns of governance in which leaders generally remain in power for life. At the same time, Qatar is the only one of the smaller GCC states that has not yet held elections for a legislative body. U.S. and international reports, which are scrutinizing Qatar as its hosting of the World Cup soccer tournament approaches in 2022, criticize Qatar for not adhering to international standards of labor rights practices, but credit it for taking steps to improve the conditions for expatriate workers. Like other GCC states, Qatar is wrestling with the fluctuations in global hydrocarbons prices that started in 2014 and were compounded by the Coronavirus Disease 2019 (COVID-19). As of early April, Qatar has reported about 178,000 infections and 290 deaths from the disease, which has affected Qatar's expatriate population disproportionately. Qatar has been able to weather economic headwinds because of its small population, substantial financial reserves, and its favorable business conditions for entrepreneurs. But, Qatar shares with virtually all the other GCC states a lack of economic diversification and reliance on revenues from sales of hydrocarbon products. On December 3, 2018, Qatar withdrew from the Organization of Petroleum Exporting Countries (OPEC) in order to focus on its natural gas export sector; Qatar has the third largest proven reserves of natural gas in the world. *Readiness Subcommittee Hearings on Title III--Operation and Maintenance : Hearings Held March 13, 14, 20, April 9, 16, 18, 23, 24, 25, and 30, 1991* Cambridge University Press

The U.S. Department of Defense (DoD) faces short-term and long-term challenges in selecting and recruiting an enlisted force to meet personnel requirements associated with diverse and changing missions. The DoD has established standards for aptitudes/abilities, medical conditions, and physical fitness to be used in selecting recruits who are most likely to succeed in their jobs and complete the first term of service (generally 36 months). In 1999, the Committee on the Youth Population and Military

Recruitment was established by the National Research Council (NRC) in response to a request from the DoD. One focus of the committee's work was to examine trends in the youth population relative to the needs of the military and the standards used to screen applicants to meet these needs. When the committee began its work in 1999, the Army, the Navy, and the Air Force had recently experienced recruiting shortfalls. By the early 2000s, all the Services were meeting their goals; however, in the first half of calendar year 2005, both the Army and the Marine Corps experienced recruiting difficulties and, in some months, shortfalls. When recruiting goals are not being met, scientific guidance is needed to inform policy decisions regarding the advisability of lowering standards and the impact of any change on training time and cost, job performance, attrition, and the health of the force. *Assessing Fitness for Military Enlistment* examines the current physical, medical, and mental health standards for military enlistment in light of (1) trends in the physical condition of the youth population; (2) medical advances for treating certain conditions, as well as knowledge of the typical course of chronic conditions as young people reach adulthood; (3) the role of basic training in physical conditioning; (4) the physical demands and working conditions of various jobs in today's military services; and (5) the measures that are used by the Services to characterize an individual's physical condition. The focus is on the enlistment of 18- to 24-year-olds and their first term of service.

Created by the Journal of International Law and Politics at New York University, the Guide to Foreign and International Legal Citations is the most comprehensive source for international citations rules. Including 45 country citation systems, as well as citation rules for international organizations, tribunals, and treaties, the updated Second Edition offers updated and expanded coverage. The only reference that focuses entirely on international citation, *Guide to Foreign and International Legal Citation, Second Edition*, features: manageable length, convenient Wire-O binding, and easy-to-use page format logical three-part organization: Country Citation Guides Citation Guides for International Organizations Citation Guides for International and Regional Tribunals a Country Profile for each listing followed by its Citation Guide examples that reflect acceptable variability of citation in practice

Journals of the House of Commons Routledge

Export controls definitively impact international cooperation in outer space. Civil and commercial space actors that engage in international endeavors must comply with space technology export controls. In the general discourse, members of the civil and commercial space community have an understanding of their domestic export control regime. However, a careful reading of the literature on space technology export controls reveals that certain questions relevant to international engagements have not been identified or answered. What is the legal-political origin of space technology export controls? How do they relate to the current international legal structure? What steps can be taken to evolve our current unilateral paradigm of space technology within the context of peaceful exploration and use of outer space? In this book, these and other relevant questions on space technology export controls are identified and assessed through an insightful case-study of the U.S. commercial communication export control regime. The findings of this case-study are used in

an international legal-political analysis of international space law, public international law, and international cooperation. Breaking new ground in international legal theory, a self-justified security dilemma that is manifest in international law is identified and explained as the origin for the current paradigm of space technology export controls.
