MATHEWS HEAVEN

Popular Mechanics Magazine W. W. Norton & Company
 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
Popular Mechanics Harvard University Press
 "A deeply moving, funny, and brilliantly written account from one of India's most original new voices." —Katherine Boo Like Dave Eggers's *Zeitoun* and Alexander Masters's *Stuart*, this is a tour de force of narrative reportage. Mohammed Ashraf

studied biology, became a butcher, a tailor, and an electrician's apprentice; now he is a homeless day laborer in the heart of old Delhi. How did he end up this way? In an astonishing debut, Aman Sethi brings him and his indelible group of friends to life through their adventures and misfortunes in the Old Delhi Railway Station, the harrowing wards of a tuberculosis hospital, an illegal bar made of cardboard and plywood, and into Beggars Court and back onto the streets. In a time of global economic strain, this is an unforgettable evocation of persistence in the face of poverty in one of the world's largest cities. Sethi recounts Ashraf's surprising life story with wit, candor, and verve, and *A Free Man* becomes a moving story of the many ways a man can be free.

Modern life is full of stuff yet bereft of time. An economic sociologist offers an ingenious explanation for why, over the past seventy-five years, Americans have come to prefer consumption to leisure. Productivity has increased steadily since the mid-twentieth century, yet Americans today work roughly as much as they did then: forty hours per week. We have witnessed, during this same period, relentless growth in consumption. This pattern represents a striking departure from the preceding century, when working hours fell precipitously. It also contradicts standard economic theory, which tells us that increasing consumption yields diminishing marginal utility, and empirical research, which shows that work is a significant source of discontent. So why do we continue to trade our time for more stuff? Time for Things offers a novel explanation for this puzzle. Stephen Rosenberg argues that, during the twentieth century, workers began to construe consumer goods as stores of potential free time to rationalize the exchange of their labor for a wage. For example, when a worker exchanges his labor for an automobile, he acquires a duration of free activity that can be held in reserve, counterbalancing the unfree activity represented by work. This understanding of commodities as repositories of hypothetical utility was made possible, Rosenberg suggests, by the advent of durable consumer goods—cars, washing machines, refrigerators—as well as warranties, brands, chain stores, and product-testing magazines, which assured workers that the goods they purchased would not be subject to rapid obsolescence. This theory clarifies perplexing aspects of behavior under industrial capitalism—the urgency to spend earnings on things, the preference to own rather than rent consumer goods—as well as a variety of historical developments, including the coincident rise of mass consumption and the legitimation of wage labor.

AN INSTANT NEW YORK TIMES

BESTSELLER • A REESE'S BOOK CLUB PICK

Tired, stressed, and in need of more help from your partner? Imagine running your household (and life!) in a new way... It started with the Sh*t I Do List. Tired of being the "shefault" parent responsible for all aspects of her busy household, Eve Rodsky counted up all the unpaid, invisible work she was doing for her family—and then sent that list to her husband, asking for things to change. His response was...underwhelming. Rodsky realized that simply identifying the issue of unequal labor on the home front wasn't enough: She needed a solution to this universal problem. Her sanity, identity, career, and marriage depended on it. The result is *Fair Play*: a time- and anxiety-saving system that offers couples a completely new way to divvy up domestic responsibilities. Rodsky interviewed more than five hundred men and women from all walks of life to figure out what the invisible work in a family actually entails and how to get it all done efficiently. With 4 easy-to-follow rules, 100 household tasks, and a series of conversation starters for you and your partner, *Fair Play* helps you prioritize what's important to your family and who should take the lead on every chore, from laundry to homework to dinner. "Winning" this game means rebalancing your home

life, reigniting your relationship with your significant other, and reclaiming your Unicorn Space—the time to develop the skills and passions that keep you interested and interesting. Stop drowning in to-dos and lose some of that invisible workload that's pulling you down. Are you ready to try *Fair Play*? Let's deal you in.

In 1868, the state of Georgia began to make its rapidly growing population of prisoners available for hire. The resulting convict leasing system ensnared not only men but also African American women, who were forced to labor in camps and factories to make profits for private investors. In this vivid work of history, Talitha L. LeFlouria draws from a rich array of primary sources to piece together the stories of these women, recounting what they endured in Georgia's prison system and what their labor accomplished. LeFlouria argues that African American women's presence within the convict lease and chain-gang systems of Georgia helped to modernize the South by creating a new and dynamic set of skills for black women. At the same time, female inmates

struggled to resist physical and sexual exploitation and to preserve their human dignity within a hostile climate of terror. This revealing history redefines the social context of black women's lives and labor in the New South and allows their stories to be told for the first time.
