Star Trek Voyager: A Celebration Pascal Press
Research on humor is carried out in a number of areas in psychology, including the cognitive (What makes something funny?), developmental (when do we develop a sense of humor?), and social (how is humor used in social interactions?) Although there is enough interest in the area to have spawned several societies, the literature is dispersed in a number of primary journals, with little in the way of integration of the material into a book. Dr. Martin is one of the best known researchers in the area, and his research goes across subdisciplines in psychology to be of wide appeal. This is a singly authored monograph that provides in one source, a summary of information researchers might wish to know about research into the psychology of humor. The material is scholarly, but the presentation of the material is suitable for people unfamiliar with the subject-making The Psychology of Humor suitable for use for advanced undergraduate and graduate level courses on the psychology of humor-which have not had a textbook source. 2007 AATH Book Award for Humor/Laughter Research category! Up-to-date coverage of research on humor and laughter in every area of psychology Research findings are integrated into a coherent conceptual framework Includes recent brain imaging studies, evolutionary models, and animal research Draws on contributions from sociology, linguistics, neuroscience, and anthropology Provides an overview of theories of

humor and early research Explores applications of humor in psychotherapy, education, and the workplace Points out interesting topics for further research and promising research methodologies Written in a scholarly yet easily accessible style 2007 AATH Book Award for Humor/Laughter Research category

Will some students ever learn from their mistakes? We hope not! A new collection of real—and really hilarious—wrong answers. This all-new collection of hilarious, totally wrong, real test answers serves a fresh batch of A+ wit misapplied to F- quiz scores. A little studying would reveal that the most powerful light source known to man isn’t “lightsabers,” nor do we salt the roads when it snows “to make them taste better.” But where’s the fun in that? From the same wellspring of failure as the million-selling F in Exams series, this special pop quiz collection will amuse and entertain anyone preparing to face down a test paper as well as those just glad to be far away from a classroom.
Funny You Should Ask Routledge

names), math, or other subjects, these 250 entries prove that while everyone enjoys the spectacle of failure, it's even sweeter to see a FAIL turn into a WIN.

WALL STREET JOURNAL, LOS ANGELES TIMES, AND USA TODAY BESTSELLER • Anyone—even you!—can learn how to harness the power of humor in business (and life), based on the popular class at Stanford’s Graduate School of Business. Don’t miss the authors’ TED Talk, “Why great leaders take humor seriously,” online now. “The ultimate guide to using the magical power of funny as a tool for leadership and a force for good.”—Daniel H. Pink, #1 New York Times bestselling author of *When and Drive* We are living through a period of unprecedented uncertainty and upheaval in both our personal and professional lives. So it should come as a surprise to exactly no one that trust, human connection, and mental well-being are all on the decline. This may seem like no laughing matter. Yet, the research shows that humor and laughter are among the most valuable tools we have at our disposal for strengthening bonds and relationships, diffusing stress and tension, boosting resilience, and performing when the stakes are high. That’s why Jennifer Aaker and Naomi Bagdonas teach the popular course *Humor: Serious Business* at the Stanford Graduate School of Business, where they help some of the world’s most hard-driving, blazer-wearing business minds infuse more humor and levity into their work and lives. In *Humor*, Seriously, they draw on findings by behavioral scientists, world-class comedians, and inspiring business leaders to reveal how humor works and—more important—how you can use more of it, better. Aaker and Bagdonas unpack the theory and application of humor: what makes something funny, how to mine your life for material, and simple ways to identify and leverage your unique humor style. They show how to use humor to rebuild vital connections; appear more confident, competent, and authentic at work; and foster cultures where levity and creativity can thrive. President Dwight David Eisenhower once said, “A sense of humor is part of the art of leadership, of getting along with people, of getting things done.” If Dwight David Eisenhower, the second least naturally funny president (after Franklin Pierce), thought humor was necessary to win wars, build highways, and warn against the military-industrial complex, then you might consider learning it too.

Kids love to be asked questions almost as much as they love to ask them. And asking is important—parents know the value of having meaningful conversations with their kids, especially as family time is under continuous assault from gadgets and devices. Now the book that solves those needs is back—announcing a fresh new edition of *The Kids’ Book of Questions*. Including subjects like the Internet, school violence, and climate change, the book remains a timeless treasure. Here is a collection of questions designed to challenge, entertain, provoke, and expand young minds. These are the questions that let kids discover how they feel; let people know what they think; raise issues that everyone loves to discuss. Gregory Stock, author of the original #1 bestselling *Book of Questions*, took his question-asking ways into schools and came back with over 200 questions, including Thorny dilemmas: Would you rather have a job you didn’t like that paid a lot or a job you loved that paid just enough to get by? Embarrassing challenges: Would you kiss someone in front of your whole class for \$250? Provocative ideas: What things do you think your parents do just to set an example for you? Intriguing fantasies: If you could text any famous person and be sure they’d read and answer your text, who would you write to and what would you say? There is only one requirement: Give an honest answer. Then be amazed to see where one little question leads.

Hoffmann's complete and well-documented account of the failings and dangers of mechanical testing illustrates the inherent flaws in aptitude and achievement tests. It demonstrates the inadequacies of multiple-choice testing, in which candidates simply choose answers and need not justify their replies, revealing the tests' inclination to reward superficiality rather than subtlety and creativity. Aimed at teachers and others involved in education, this polemic exposes the corporate testing giants whose dubious claims to scientific accuracy shield them from public scrutiny.

Against the backdrop of his most haunting, high-profile murder and child abuse cases, a veteran prosecutor goes beyond an insider's reflection to shine a light on the humanlike qualities personified in the U.S. criminal justice system and what this means for our future.The Humanity of Justice is a procedural true-crime book told through the eyes and heart of a veteran criminal prosecutor who cares about the people he meets and their life-altering circumstances. Burke E. Strunsky, a senior deputy district attorney in southern California, takes the reader inside the courtroom for some of the most haunting criminal cases in the state as well as the nation, including: a highly respected church leader who brutally murders his wife for the insurance money while their baby sleeps peacefully in another room; a twisted father who sexually molests his daughter's own friends at her slumber parties; a former police chief who drowns his wife of thirty years in their backyard spa; and a young man who sadistically tortures and kills a helpless three-year-old boy, yet manages to dodge the death penalty.Strunsky's own impassioned social and moral commentary is woven throughout this thought-provoking book on issues significant to the world of criminal justice.
