## FRANKLIN EMILIANO

Commemorating the 150th Anniversary of the American Society of Civil Engineers

BoD - Books on Demand

This text book brings together 26 chapters, 546 figures, 166 tables, a glossary of 332 definitions. Being the result of ILRI's core business: bringing together the principles and applications of drainage, by giving international courses on drainage

Morphology and genesis of actual acid sulphate soils without jarosite in the Ha Tien Plain, Mekong Delta, Viet Nam; Les sols du domaine fluvio-marin de Casamance (Senegal): evolution recente et reevaluation des contraintes majeures pour mise en valeur; The process of pyrite formation in mangrove soils; Evidence of evaluation-illuviation of sulphur and heavy metals in sulfaquepts in recent Baltimore harbor(MD) dredged materials;

Engineering impacts of acid sulphate deposits in California; Inhibition of Pyrite oxidation in coal mine waste; Spatial analysis as a reconnaissance survey technique: an example from acid sulphate soil regions of the Mekong Delta, Viet Nam; Should acid sulphate soils be classified among the inceptisols or the entisols?; Using morphological data for the simulation of water regimes in clay soils; A field laboratory method to determine total potential and actual acidity in acid sulphate soils; The evaporation and acidification process in acid sulphate soil; Excessive iron uptake (iron toxicity) by wetland rice (*Oryza sativa* L.) on an acid sulphate soil in the Casamance/Senegal; Rice improvement in the mangrove swamps of West Africa; La mangrove a usages multiples de l'estuaire

du Saloum (Senegal); Consequences sur l'environnement equatique et la peche d'un barrage-ecluse anti-sel en Casamento (Senegal); Reclamation and management of brackish water fish ponds in acid sulphate soils: Philippine experience; Soil reclamation: a technical or a social-economic problem? reclaiming the acid ...

**Plant Breeding Abstracts** Scarecrow Press

Fully updated and expanded into two volumes, the new edition of *Groundwater Contamination* explains in a comprehensive way the sources for groundwater contamination, the regulations governing it, and the technologies for abating it. Volume 1 covers all major contaminants and explains the hydrology and data used to determine the extent of pollution. Volume 2 discusses aquifer management, including technologies to control and stabilize multiple influxes into the water table. Among the many new features of this edition are a full discussion of risk assessment, the preparation of groundwater protection plans, and references linking the text to over 2,300 water-related Web sites.

*Sources and Hydrology Abstract Journals on Irrigation, Drainage and Water Resources Engineering* A Selected Bibliography Selected Water Resources Abstracts Fertilizer Abstracts Selected Water Resources Abstracts Guide to Sources for Agricultural and Biological Research This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1981. Abstracts and Indexes in Science and Technology A Descriptive Guide

Directory of "2805 database in 2509 entries." Science, technology, medicine, business, law, humanities, and social sciences are covered. Entries give such detailed information as data elements, subject matter, and user aids. Name, subject, producer and processor indexes.

*A Selected Bibliography* CRC Press

This report contains 27 papers that serve as a testament to the state-of-the-art of civil engineering at the outset of the 21st century, as well as to commemorate the ASCE's Sesquicentennial. Written by the leading practitioners, educators, and researchers of civil engineering, each of these peer-reviewed papers explores a

particular aspect of civil engineering knowledge and practice. Each paper explores the development of a particular civil engineering specialty, including milestones and future barriers, constraints, and opportunities. The papers celebrate the history, heritage, and accomplishments of the profession in all facets of practice, including construction facilities, special structures, engineering mechanics, surveying and mapping, irrigation and water quality, forensics, computing, materials, geotechnical engineering, hydraulic engineering, and transportation engineering. While each paper is unique, collectively they provide a snapshot of the profession while offering thoughtful predictions of likely developments in the years to come. Together the papers illuminate the mounting complexity facing civil engineering stemming from rapid growth in scientific knowledge, technological development, and human populations, especially in the last 50 years. An overarching theme is the need for systems-level approaches and consideration from undergraduate education through advanced engineering materials, processes, technologies, and design methods and tools. These papers speak to the need for civil engineers of all specialties to recognize and embrace the growing interconnectedness of the global infrastructure, economy, society, and the need to work for more sustainable, life-cycle-oriented solutions. While embracing the past and the present, the papers collected here clearly have an eye on the future needs of ASCE and the civil engineering profession.

**Characterisation and Engineering Properties of Natural Soils, Two Volume Set** Springer Science & Business Media

Molecular Toxinology has been consolidated as a scientific area focused on the intertwined description of several aspects of animal toxins. In an inquiring biotechnological world, animal toxins appear as an invaluable source for the discovery of therapeutic polypeptides. Animal toxins rely on specific chemical interactions with their partner molecule to exert their biological actions. The comprehension of how molecules interact and recognize their target is essential for the rational exploration of bioactive polypeptides as therapeutics. Investigation on the mechanism of molecular interaction and recognition offers a window of opportunity for the pharmaceutical industry and clinical medicine. Thus, this book brings examples of two interconnected themes - molecular

recognition and toxinology concerning to the integration between analytical procedures and biomedical applications. *CAB Abstracts Online Manual* BoD - Books on Demand

"Advances in Water Resources and Hydraulic Engineering - Proceedings of 16th IAHR-APD Congress and 3rd Symposium of IAHR-ISHS" discusses some serious problems of sustainable development of human society related to water resources, disaster caused by flooding or draught, environment and ecology, and introduces latest research in river engineering and fluvial processes, estuarine and coastal hydraulics, hydraulic structures and hydropower hydraulics, etc. The proceedings covers new research achievements in the Asian-Pacific region in water resources, environmental ecology, river and coastal engineering, which are especially important for developing countries all over the world. This proceedings serves as a reference for researchers in the field of water resources, water quality, water pollution and water ecology. Changkuan Zhang and Hongwu Tang both are professors at Hohai University, China.

*Incidence Des Maladies Animales*

International Inst for Land Reclamation & Introduction; definition of the problem; method of investigation applied; some results not directly related to irrigation efficiency; analysis and evaluation of the data from the questionnaire with respect to irrigation efficiency; practical application of the study results with some examples; evaluation of the applied approach; conclusions and recommendations.

**Groundwater Contamination, Volume I** ASCE Publications

Following on from the first two volumes, published in 2002, volumes 3 and 4 of *Characterisation and Engineering Properties of Natural Soils* review

laboratory testing, in-situ testing, and methods of characterising natural soil variability, illustrated by actual site data. Less well-documented soil types are highlighted and the various papers take i

*Annual Report*

Soiless Culture - Use of Substrates for the Production of Quality Horticultural Crops provides useful information on the techniques of growing horticultural crops using either inert organic or inorganic substrates and also on use of substrates consisting locally available and inexpensive materials with adequate physical and chemical properties. The

contents mainly includes influence of different substrates on horticultural crops grown under soiless culture, production of vegetables and ornamental crops in water shortage area, comparative evaluation of commercial inert substrate used for growing high value horticultural crops. In this book, interesting researches from around the world are brought together to produce a resource for teachers, researcher, and advanced students of biological science.
