The untold story of an eccentric, scientific visionary whose death-defying research has saved millions of lives. Sixty years ago, cars and airplanes were still deathtraps waiting to happen. Today, both are safer than ever, thanks in part to one pioneering air force doctor's research on seatbelts and ejection seats. The exploits of John Paul Stapp (1910-1999) come to thrilling life in this biography of a Renaissance man who was once blasted—faster than a .45 caliber bullet—across the desert in his Sonic Wind rocket sled, only to be slammed to a stop in barely a second. The experiment put him on the cover of Time magazine and allowed his swashbuckling team to gather the data needed to revolutionize automobile and aircraft design. But Stapp didn't stop there. From the legendary high-altitude balloon tests that ensued to the ferocious battles for car safety legislation, Craig Ryan's book is as much a history of America's transition into the Jet Age as it is a biography of the man who got us there safely. *What We Should Know about the People We Don't Know* John Wiley & Sons

Malcolm Gladwell, host of the podcast Revisionist History and author of the #1 New York Times bestseller *Outliers*, offers a powerful examination of our interactions with strangers and why they often go wrong—now with a new afterword by the author. A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Press How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to one another that isn't true? Talking to Strangers is a classically Gladwellian intellectual adventure, a challenging and controversial excursion through history, psychology, and scandals taken straight from the news. He revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, the suicide of Sylvia Plath, the Jerry Sandusky pedophilia scandal at Penn State University, and the death of Sandra Bland—throwing our understanding of these and other stories into doubt. Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we don't know. And because we don't know how to talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world. In his first book since his #1 bestseller *David and Goliath*, Malcolm Gladwell has written a gripping guidebook for troubled times.

Everyone has a dream. Having taught school for fifty plus years, selling World Book Encyclopedias, setting up school libraries, and a special chemical library, I have catalogued a lot of books. For many years I have wanted to write a book sharing my story. *Janie's Unbelievable Journey: Inspirational Letters Along the Way* is Janie Wilkins's true story of life as a wife, mother, and educator. She is a lifelong educator with a host of experiences and accomplishments. Growing up in rural north Louisiana, the daughter of a mail carrier, Wilkins went on to attend Louisiana Tech University and was the first student in Louisiana Tech's history to graduate with certification in library science and as president of Tech's first library club. Janie also graduated with a B.A. in English and social studies from Louisiana Tech University. In her career, she has touched many lives through classroom instruction in English and social studies and by setting up numerous public school libraries in Brevard County, Florida. In her

free time, she continued her investment in children by becoming one of World Book Encyclopedia's best sales representatives in the south. She was presented the keys to the city of Dallas for her outstanding World Book sales as a teacher representative. Active in the Methodist church, Wilkins has followed John Wesley's 'call to serve' and has been a shepherd, participating in church missions, leading Sunday school classes and divorce recovery classes. She has also been an active citizen, working polls in local, state, and national elections. She worked hard to help Senator Hillary Clinton secure the Democratic nomination; but when that didn't happen, Wilkins worked very hard to elect President Barack Obama. *Janie's Unbelievable Journey* is a legacy for her children and grandchildren—a piece of history recorded through photos, letters, and narrative to shine the spotlight on a successful, full life. Her proudest accomplishments by far are her three adult children: Linda, Tommy, and Eric.

Throughout the 1940s, Zachary Scott (1914-1965) was the model for sophisticated, debonair villains in American film. His best-known roles include a mysterious criminal in *The Mask of Dimitrios* and the indolent husband in *Mildred Pierce*. He garnered further acclaim for his portrayal of villains in *Her Kind of Man*, *Danger Signal*, and *South of St. Louis*. Although he earned critical praise for his performance as a heroic tenant farmer in *Jean Renoir's The Southerner*, Scott never quite escaped typecasting. In *Zachary Scott: Hollywood's Sophisticated Cad*, Ronald L. Davis

writes an appealing biography of the film star. Scott grew up in privileged circumstances—his father was a distinguished physician; his grandfather was a pioneer cattle baron—and was expected to follow his father into medical practice. Instead, Scott began to pursue a career in theater while studying at the University of Texas and subsequently worked his way on a ship to England to pursue acting. Upon his return to America, he began to look for work in New York. Excelling on stage and screen throughout the 1940s, Scott seemed destined for stardom. By the end of 1950, however, he had suffered through a turbulent divorce. A rafting accident left him badly shaken and clinically depressed. His frustration over his roles mounted, and he began to drink heavily. He remarried and spent the rest of his career concentrating on stage and television work. Although Scott continued to perform occasionally in films, he never reclaimed the level of stardom that he had in the mid-1940s. To reconstruct Scott's life, Davis uses interviews with Scott and colleagues and reviews, articles, and archival correspondence from the Scott papers at the University of Texas and from the Warner Bros. Archives. The result is a portrait of a talented actor who was rarely allowed to show his versatility on the screen.

In 2017, a white supremacist rally at the University of Virginia forced many to consider how much progress had been made in a country that, nine years prior, had elected its first Black president. Beyond these racial flashpoints, the increasingly polarized nature of US politics has reignited debates around the meaning of identity, citizenship, and acceptance in America today. In this pioneering book, Khalilah L. Brown-Dean moves beyond the headlines to examine how contemporary controversies emanate from longstanding struggles over power, access, and belonging. Using intersectionality as an organizing framework, she draws on current tensions such as voter suppression, the Me Too movement, the Standing Rock protests, marriage equality, military service, the rise of the Religious Right, protests by professional athletes, and battles over immigration to show how conflicts over group identity are an inescapable feature of American political development. Brown-Dean explores issues of citizenship, race, ethnicity, gender, sexual identity, and religion to argue that democracy in the United States is built upon the battle of ideas related to how we see ourselves, how we see others, and the mechanisms available to reinforce those distinctions. *Identity Politics in the United States* will be an essential resource for students and engaged citizens who want to understand the link between historical context, contemporary political challenges, and paths to move toward a stronger democracy.
