 Speed Control Technology has had a strong association with Ansaldo Sistemi Industriali spa Italy. Ansaldo is world renowned for electronic drive systems of high quality and technological innovation. Thyristor Control. AC10 Technology. Despite the popularity of frequency control and cage motor systems, there is a certain class of machine, in particular hot ladle cranes, for which the combination of slip-ring motor and thyristor control is preferred.  Thyristor operates only in switching mode. Thyristor can be used for control high DC currents and loads. Thyristor behaves like Electronic Latch while using as a switch, because when triggered once it remains in conduction state until getting reset manually. In this project, we are going to show you how to control a load or DC motor using a Thyristor. You can
