Interviews, reviews and major essays chart the evolution of Bausch's pioneering approach and explore this evocative new mode of

performance. Edited by noted Bausch scholar, Royd Climenhaga, The Pina Bausch Sourcebook aims to open up Bausch's performative world for students, scholars, dance and theatre artists and audiences everywhere.

In Soviet times, anthropologists in the Soviet Union were closely involved in the state's work of nation building. They helped define official nationalities, and gathered material about traditional customs and suitably heroic folklore, whilst at the same time refraining from work on the reality of contemporary Soviet life. Since the end of the Soviet Union anthropology in Russia has been transformed. International research standards have been adopted, and the focus of research has shifted to include urban culture and difficult subjects, such as xenophobia. However, this transformation has been, and continues to be, controversial, with, for example, strongly contested debates about the relevance of Western

anthropology and cultural theory to post-Soviet reality. This book presents an overview of how anthropology in Russia has changed since Soviet times, and showcases examples of important Russian anthropological work. As such, the book will be of great interest not just to Russian specialists, but also to anthropologists more widely, and to all those interested in the way academic study is related to prevailing political and social conditions.

DD Barant launches The Bloodhound Files with Dying Bites—a "fresh and original take on urban fantasy" (Romantic Times) with a heroine who's "remarkable, strong-willed and smart" (Publishers Weekly). Her job description is the "tracking and apprehension of mentally-fractured killers." What this really means in FBI profiler Jace Valchek's brave new world—one in which only one percent of the population is human—is that a woman's work is never done. And reality is getting stranger every day... Jace has been ripped from her reality by

David Cassius, the vampire head of the NSA. He knows that she's the best there in the business, and David needs her help in solving a series of gruesome murders of vampires and werewolves. David's world—one that also includes lycanthropes and golems—is one with little knowledge of mental illness. An insane serial killer is a threat the NSA has no experience with. But Jace does. Stranded in a reality where Bela Lugosi is a bigger box office draw than Bruce Willis and every full moon is Mardi Gras, Jace must now hunt down a fellow human before he brings the entire planet to the brink of madness. Or she may never see her own world again...

This issue discusses a number of factors affecting global growth, as well as growth prospects across the world's main countries and regions. It assesses the ongoing recovery from the global financial crisis in advanced and emerging market economies and evaluates risks, both upside and downside, including those associated with commodity prices, currency fluctuations, and financial market volatility.

A special feature examines in detail causes and implications of the recent commodity price downturn; analytical chapters look at the effects of commodity windfalls on potential output and of exchange rate movements on trade.

The story of the missions is a compelling human drama that is a vital piece not only of California history, but also of American history. Indeed, many keys to California's past lie in the stories of the 20 missions that stretch along the state's west coast from San Diego to San Francisco. This vital series is compatible with the mission-based curriculum used in fourth-grade California classrooms. It resonates equally with all social studies programs that explore the defunct notion of colonialism and its controversial role in the history of the United States, and with curricula that seek to explore the interaction of different cultures and the rights and voices of indigenous peoples.

Un uomo che ha perso la memoria ma che non si dà per vinto. Il suo

percorso alla ricerca della verità: Una verità che non avrebbe mai voluto scoprire. Adriano ha perso la memoria, non sa chi è né da dove viene. È in carcere accusato di omicidio. Neanche questo ricorda. E, quando viene provata la sua innocenza e viene scarcerato, la sua vita ricomincia. Da zero! Piano piano riesce a ricostruire la sua vita grazie a luoghi e persone che gradualmente gli fanno ritornare la memoria. Vuole ritrovare il padre, che ricorda lo amava profondamente e che scopre averlo abbandonato in ospedale dopo un incidente. Questa ricerca lo porterà a scoprire una verità che sarebbe stato meglio non conoscere. Piazzetta Paoli 2, è un viaggio introspettivo, un romanzo che si può tranquillamente inserire fra le opere di formazione. La narrazione è incentrata sul percorso di riscoperta del protagonista che, attraverso le sue esperienze, cresce ritrovandosi e nel farlo offre anche degli spunti di riflessione al lettore, per un percorso di arricchimento interiore. Per anni mi sono immaginato libero. Pensiero, credo, comune a chiunque debba scontare

una condanna, anche se nel mio caso è più complicato immaginare un futuro oltre quelle mura. La differenza sostanziale fra ciò che mi aspetto io e ciò che sognano tutti gli altri sta nel fatto che non ho la minima idea di come sia il mondo lì fuori. Non ricordo nulla del mio passato!

The life of a female war photographer killed in action is told by three of her friends in this biographical novel by the author of *Bloody Cow*. Gerda Taro was a German-Jewish war photographer, anti-fascist activist, artist, and innovator who, together

with her partner, the Hungarian Endre Friedmann, was one half of the alias Robert Capa, widely considered to be the twentieth century's greatest war and political photographer. She was killed while documenting the Spanish Civil War and tragically became the first female photojournalist to be killed on a battlefield. August 1, 1937, Paris. Taro's twenty-seventh birthday, and her funeral. Friedmann leads the procession. He is devastated, but there are others, equally bereft, with him: Ruth Cerf, Taro's old friend from Leipzig with whom she fled to Paris; Willy Chardack, ex-lover; Georg Kuritzkes, another lover and a key figure in the International Brigades. They have all known a different Gerda, and one who is at times radically at odds with the heroic anti-fascist figure being mourned by the multitudes . . . Another character in the novel is the era itself, the 1930s, with economic depression, the rise of Nazism, hostility towards refugees in France, the century's ideological warfare, the cultural ferment, and the ascendancy of photography as the age's

quintessential art form. Winner of the Strega Prize, *The Girl with the Leica* is a must-read for fans of historical fiction centered on extraordinary women's lives. "A biography, a feminist parable, a declaration of love for photography, and a tableau of the 1930s: *The Girl with the Leica* is all this at once." —*Il Sole 24 Ore* (Italy) "Janeczek creatively and seamlessly spotlights war photographer Gerda Pohorylle." —*Publishers Weekly*

The Educational Role of the Museum Prentice Hall Jacques Le Goff sets out in this book to explain the role of money, or rather of the various types of money, in the economy, life and mentalities of the Middle Ages. He seeks also to explain how, in a society dominated by religion, the Church viewed money, and how it taught Christians what attitudes they should adopt towards it and towards the uses to which it could be put. He shows that, although money played an important role

in the rise of towns and trade and in state formation, there was no capitalism but only a pre-capitalism in the Middle Ages, even by their end, in the absence of a truly global market. This is why economic development remained slow and limited, in spite of some remarkable success stories. It was a period in which it was as important to give money as it was to earn it. True wealth was not yet the wealth of this world, even though money played an increasingly large role in reality and in mentalities. No similar discussion of this subject, aimed at a wide readership, has previously been published. Written by one of the greatest medievalists, this book will be recognized as a standard work on the topic.

In this exquisitely written journal-turned-journey of

self-discovery, international bestselling author Paolo Cognetti examines our universal desire for connection through a voyage in the Himalayas. Why climb a mountain without ever reaching the summit? In 2017, Paolo Cognetti returned to Nepal, not to conquer the mountains but to journey through the high valleys of the Dolpo with a copy of Peter Matthiessen's *The Snow Leopard* in hand. Drawing on memories of his childhood in the Alps, Cognetti explored the roots of life in the mountains, truly getting to know the communities and the nature that forged this resilient, almost mythical region. Accompanying him was Remigio, a childhood friend who had never left the mountains of Italy, and Nicola, a painter he had recently met. Joined by a stalwart team of local sherpas, the trio started out in the remote Dolpo region of Nepal. From there, a journey of self-discovery shaped by illness, human connection, and empathy was born. *Without Ever Reaching the Summit* features line illustrations drawn by the author.

Uncertainty is interwoven into human existence. It is a powerful incentive in the search for knowledge and an inherent component of scientific research. We have developed many ways of coping with uncertainty. We make promises, manage risks and make predictions to try to clear the mists and predict ahead. But the future is inherently uncertain - and the mist that shrouds our path an inherent part of our journey. The burning question is whether our societies can face up to uncertainty, learn to embrace it and whether we can open up to a constantly evolving future. In this new book, Helga Nowotny shows how research can thrive at the cusp of uncertainty. Science, she argues, can eventually transform uncertainty into certainty, but into certainty which remains always provisional. Uncertainty is never completely static. It is constantly evolving. It encompasses geological time scales and, at the level of human experience, split-second changes as cells divide. Life and death decisions are taken in the blink of the eye, while human

interactions with the natural environment may reveal their impact over millennia. Uncertainty is cunning. It appears at unexpected moments, it shuns the straight line, takes the oblique route and sometimes the unexpected short-cut. As we acknowledge the cunning of uncertainty, its threats retreat. We accept that any scientific inquiry must produce results that are provisional and uncertain. This message is vital for politicians and policy-makers: do not be tempted by small, short-term, controllable gains to the exclusion of uncertain, high-gain opportunities. Wide-ranging in its use of examples and enriched by the author's experience as President of the European Research Council, one of the world's leading funding organisations for fundamental research.

The Cunning of Uncertainty is a must-read for students and scholars of all disciplines, politicians, policy-makers and anyone concerned with the fundamental role of knowledge and science in our societies today.

E' comodo definirsi scrittori da parte di chi non ha arte né parte. I

letterati, che non siano poeti, cioè scrittori stringati, si dividono in narratori e saggisti. E' facile scrivere "C'era una volta...." e parlare di cazzate con nomi di fantasia. In questo modo il successo è assicurato e non hai rompiballe che si sentono diffamati e che ti querelano e che, spesso, sono gli stessi che ti condannano. Meno facile è essere saggisti e scrivere "C'è adesso...." e parlare di cose reali con nomi e cognomi. Impossibile poi è essere saggisti e scrivere delle malefatte dei magistrati e del Potere in generale, che per logica ti perseguitano per farti cessare di scrivere. Devastante è farlo senza essere di sinistra. Quando si parla di veri scrittori ci si ricordi di Dante Alighieri e della fine che fece il primo saggista mondiale. Le vittime, vere o presunte, di soprusi, parlano solo di loro, inascoltati, pretendendo aiuto. Io da vittima non racconto di me e delle mie traversie. Ascoltato e seguito, parlo degli altri, vittime o carnefici, che l'aiuto cercato non lo concederanno mai. "Chi

non conosce la verità è uno sciocco, ma chi, conoscendola, la chiama bugia, è un delinquente". Aforisma di Bertolt Brecht. Bene. Tante verità soggettive e tante omertà son tasselli che la mente corrompono. Io le cerco, le filtro e nei miei libri compongo il puzzle, svelando l'immagine che dimostra la verità oggettiva censurata da interessi economici ed ideologie vetuste e criminali. Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, rapportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Perché la massa dimentica o non conosce. Denuncio i difetti e caldeggio i pregi italiani. Perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare, tutelare e promuovere quello che abbiamo ereditato dai nostri avi. Insomma, siamo bravi a farci del male e qualcuno deve pur essere diverso! *Delivered to the Students of the Royal Academy* Rowman & Littlefield A no-nonsense, fact-filled

debunking of all the main "Moon hoax" conspiracy theories, collected in a single book. If you're an open-minded doubter, you'll find technically accurate but plain-English answers to your questions; if you're a space enthusiast or professional, you'll find a handy reference for dealing with the most obstinate hoax believers and for clarifying popular objections and misconceptions about the Moon landings. "Moon Hoax: Debunked!" is also an opportunity to rediscover and celebrate one of mankind's greatest voyages, which doesn't need conspiracy theories to be a fascinating adventure. For example, did you know how close to failure each flight actually came? Did you know that pictures of Playmates were smuggled to the Moon to prank the astronauts? Or that there was a secret Soviet plan to land a Russian on the Moon before the US?
